Report

The Anti-Drug Club of Vivekanandha College of Engineering for Women (VCEW) organized an essay writing competition to raise awareness about the harmful effects of drug abuse. The competition aimed to engage students in critical thinking and encourage them to explore the causes, consequences, and preventive measures associated with drug abuse.

The competition, open to all students of VCEW, attracted numerous participants from various departments. Each participant was tasked with submitting a thoughtful and well-researched essay on the theme “Drug Abuse: Causes, Consequences, and Prevention.” The goal of the competition was to inspire students to express their understanding of drug abuse and advocate for a drug-free lifestyle.

The submitted essays were evaluated by a panel of judges consisting of faculty members from various departments. The criteria for evaluation included originality, clarity of thought, depth of research, and the ability to present practical solutions for combating drug abuse in society.

The best essays were displayed on notice boards across the campus, further raising awareness among the student body. In addition to the competition, the Anti-Drug Club distributed informational pamphlets on drug abuse, outlining key facts, dangers, and resources available for those seeking help.

Through this initiative, the Anti-Drug Club succeeded in fostering greater awareness and dialogue on drug abuse, its consequences, and the importance of prevention. The competition encouraged students to take a stand against drug abuse and serve as advocates for healthy, drug-free living both on campus and in their communities. The event was a testament to VCEW's ongoing commitment to promoting student well-being and social responsibility.
