

# **VIVEKANANDHA**

# **COLLEGE OF ENGINEERING FOR WOMEN**

(An Autonomous Institution Affiliated to Anna University-Chennai

Approved by AICTE – Accredited by NBA New Delhi)

Elayampalayam, Tiruchengode – 637 205, Namakkal District, Tamilnadu.

# **CURRICULUM**

#### **FOR**

# **B.E. COMPUTER SCIENCE AND ENGINEERING**

# **REGULATION 2019**

(After 16<sup>th</sup> BoS)

Curriculum and Syllabus (1 to 8 Semester)

(Applicable to the students admitted from the academic year 2021 - 2022 onwards)

#### VIVEKANANDHA COLLEGE OF ENGINEERING FOR WOMEN

(Autonomous)

# B.E. COMPUTER SCIENCE AND ENGINEERING REGULATIONS – 2019

#### **COLLEGE VISION**

To impart value based education in Engineering and Technology to empower young women to meet the societal exigency with a global outlook.

#### **COLLEGE MISSION**

- To provide holistic education through innovative teaching-learning practices
- To instill self confidence among rural students by supplementing with co-curricular and extra-curricular activities
- To inculcate the spirit of innovation through training, research and development
- To provide industrial exposure to meet the global challenges
- To create an environment for continual progress through lifelong learning

#### **DEPARTMENT VISION**

To empower women technocrats in the field of Computer Science and Engineering and prepare them for globalized high-tech society to orient them towards serving the dynamic needs of our nation.

#### **DEPARTMENT MISSION**

- To foster and strengthen the core competence of Computer Science by adopting innovative methods.
- To elevate the research, entrepreneurial and employability skills in women technocrats through quality education.
- To induce values of professional ethics and spirit of social commitment among the students.

#### PROGRAMME EDUCTIONAL OBJECTIVES (PEOs):

#### PEO 1

Graduates will have successful careers with strong fundamental and technical skills in industry that meet the needs of Indian and multinational companies.

#### PEO<sub>2</sub>

Graduates will become successful entrepreneurs with determination, development, self-reliance, leadership, ethic and moral values to exploit employability.

#### **PEO 3**

Graduates will pursue higher education and engage in lifelong learning to foster personal and organizational growth.

#### **PROGRAMME OUTCOMES (POs):**

Graduates of Computer Science and Engineering can able to:

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2: Problem Analysis**: Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3: Design/Development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5: Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7: Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development

**PO8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice

**PO9: Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11: Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12: Life-Long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### PROGRAM SPECIFIC OUTCOMES (PSOs)

Graduates of Computer Science and Engineering can able to

**PSO1:** Develop computational solution to complex real world problems with modern programming tools

**PSO2:** Demonstrate basic knowledge of computer applications and apply standard practices in developing feasible solutions for IT enabled services

<sup>\*</sup> Common to CSE & IT

CA - Continuous Assessment, ESE - End Semester Examination, EEC- Employability Enhancement Courses, PEC- Professional Elective courses, OEC- Open Elective courses

<sup>\*</sup> Professional Readiness for Innovation, Employability and Entrepreneurship –Mandatory Course may offer by Anna University

CA - Continuous Assessment, ESE - End Semester Examination, EEC- Employability Enhancement Courses, PEC- Professional Elective courses

Cumulative Credits = 165 (Applicable to the students admitted in the academic year 2021- 2022)

Cumulative Credits = 167 (Applicable to the students admitted in the academic year 2022- 2023)

#### PROFESSIONAL ELECTIVE COURSES: VERTICALS

Vertical I	Vertical II	Vertical III	Vertical IV	Vertical V
NETWORKS	CYBER SECURITY	ARTIFICIAL INTELLIGENCE & MACHINE LEARNING	INTERNET OF THINGS & CLOUD COMPUTING	PROBLEM SOLVING & SOFTWARE DEVELOPMENT
Mobile Adhoc Networks	Information Security	Data Warehousing and Data Mining	Embedded Systems	Design Thinking
Wireless Sensor Networks	Cyber Security	Data Science and Analytics	Smart Sensor Technologies	Agile Software Development
Parallel and Distributed Computing	Cryptography and Network Security	Fundamentals of Deep Learning	Security in Computing	Software Project Management
Green Computing	Cyber Law and Ethical Hacking	Advanced Database Systems	Industry 4.0	Software Testing and Quality Assurance
Advanced Java & Framework	Social Network Analysis	Soft Computing	Software Defined Networks	Total Quality Management
Network Programming	Semantic Web	Knowledge Management	Information Storage and Management	E-Commerce
Service Oriented Architecture	Cyber Forensics	Business Intelligence & Its Applications	Fundamentals of Virtualization	Professional Ethics in Engineering
Socket Programming	Biometrics Systems	Digital Image Processing	Big Data Tools and Techniques	Building Enterprise Applications
				Full Stack Development

Registration of Professional Elective Courses from Verticals: Professional Elective Courses are listed in groups called verticals that represent a particular area of specialisation / diversified group. Students are permitted to choose all the Professional Electives from a particular vertical or from different verticals. Further, only one Professional Elective course shall be chosen in a semester horizontally (row-wise). However, two courses are permitted from the same row, provided one course is enrolled in Semester V to VIII. The registration of courses for B.E./B.Tech (Honours) or Minor degree shall be done from Semester V to VIII. The procedure for registration of courses explained above shall be followed for the courses of B.E/B.Tech (Honours) or Minor degree also.

# Content of the syllabus

Unit - I Periods Listening-Introduction to Different Types of Listening, Listening to Casual Conversations, Speaking-Introduction to develop the Art of Speaking, Giving Self Introduction, Reading-Understanding the Basics of Reading Skills, Reading Instructions and Technical Manuals, Writing-Introduction to writing strategies, Writing Definitions, Focus on Language --Technical terms (Jargon), Word Formation with Prefixes and Suffixes, Using Active Voice and Passive Voice, Basic sentence patterns, Tenses (past, present, perfect and continuous tenses). Unit - II Periods **Listening**- Listening to lectures, listening to description of equipment, **Speaking-** Strategies for Developing Conversational Skills, Short Conversations through Role Play Activities, **Reading**—Reading Comprehension, Reading emails, Reading Headlines, Predicting the Content, Writing- Note making, Writing Descriptions, Focus on Language-Collocations, Functional Use of Tenses, Subject - verb agreement Unit - III Periods Listening- Listening to different kinds of interviews (Face - to - face, radio, TV and telephone interviews), Speaking-Describing an Object, Asking Questions, Participating in Discussions Reading-Intensive reading, Reading passages for gist. Writing- Informal writing -short e-mails with emphasis on Brevity, Clarity, Coherence and Cohesion), Focus on Language-Sequential Connectives, Impersonal Passive **Unit - IV** Periods 9 Listening-Note Taking, Speaking- Improving Fluency through Narration. Reading—Reading passages for specific information- Phone messages, Reading and Transferring Information. Writing- Effective writing strategies, Informal writing, Writing a Memo, Focus on Language- Pronunciation Practice (Phonetic sounds - Vowels, Consonants and Diphthongs), Cause and Effect, Conditional Statements (if - clauses and types), Usage of Modal Verbs. Unit - V Periods Listening- Listening to understand Modulation, Listening to Welcome Speeches, Speaking- Delivering Welcome Address, Understanding Segmental and Suprasegmental Features-Practicing Stress, Pause and Intonation, Reading - Reading for a purpose, Reading Business Documents, Interpreting Charts and Graphs,. Writing-Writing Business e-mails, Describing a Process. Focus on Language -Synonyms and Antonyms, Common Errors in English. **Total Periods** 45 **Text Books:** Sumant. s, Pereira Joyce, Shameem.M, Selvarajan.R-English Communication Skills, Vijay Nicole imprints Pvt.Ltd, 1. 2. Unit – I	INTRODUCTION TO PROBLEM SOLVING	Periods	9
----------	---------------------------------	---------	---

Basic Organization of Computer - Programming Languages- Flowchart - Pseudocode - Compilers-Interpreter-Algorithm - Building Blocks of Algorithm - Algorithmic Problem Solving-Simple Strategies for Developing Algorithms - Illustrative Problems: Find Minimum value from list of elements, Guess an Integer Number in a Range, Factorial of a given number.

Unit -	II	C PROGRAMMING	Periods	9								
Introduction	on to C	- Features - Data Types - Constants - Variables - I/O State	ement - Opera	tors –Expressions -								
Decision N	Making	and Branching - Looping Statements - Break, Goto, Contin	iue.									
Unit –	III	ARRAYS AND POINTERS	Periods	9								
Arrays: Co	oncepts	- Need - one dimensional array - array declaration - feat	ures – array ir	nitialization - Two-								
Dimension	nal Arra	ys- Multidimensional Arrays.										
Pointers: 1	Introdu	ction, pointer declaration-accessing variable through point	er-pointers an	d Arrays, Pointers								
and strings	and strings – Pointers structures-pointer Arithmetic - Array of Pointers – dynamic memory allocation.											
Unit - 1	IV	FUNCTIONS AND STRINGS	Periods	9								
Function:	Introd	action, function declaration, defining and accessing fun	ctions, User-o	lefined Functions-								
storage cla	asses-fu	nction prototypes-parameter passing methods-recursion.										
Strings: C	Concept	s - Strings manipulation - String Input / Output Functio	ns- Strings st	andard functions -								
Arrays of	Strings											
Unit –	V	STRUCTURES AND UNIONS	Periods	9								
Structures-	-Introd	action- nested structures- Arrays of Structures - Structure	res and Funct	ions - Pointers to								
Structures	– Unio	ns- Type Definition – Bitfields- Enumerated Types.

LIST OF EXPERIMENTS:	Course Outcome
1. Design an algorithm and flowchart using word processor that reads the customer number and power consumed and prints the amount to be paid by the customer. An electric power distribution company charges its domestic consumers as follows	CO1
Consumption Units Rate of Charge	
0-200 Rs.0.50 per unit 201-400 Rs.100 plus Rs.0.65 per unit excess 200 401-600 Rs.230 plus Rs.0.80 per unit excess of 400.	
2. Design an algorithm and flowchart for a simple calculator program using word processor for performing various arithmetic operations such as	CO2
"+" - Addition  "-" - Subtraction  "*" - Multiplication  "/" - Division  "0%" - Modulus	
3. Design and develop a C program to accept a number from the user and check whether it is a palindrome or not.  Palindrome number: (a number is a Palindrome which when read in reverse order is same as read in the right order)	CO3
Example: Palindrome:11, 101, 151	
Not a Palindrome:123, 100	
4. Develop a C program to find the sum of the digits of an integer and the number of digits in the integer that is given as input by the user.	
Test Case:	соз
Sample Input: 15390 Sample Output: Sum of the digits=18 No. of digits = 5 For an incorrect choice, an appropriate error message should be displayed.	
5. Develop a program to perform the following operations using two dimensional or multi-dimensional matrices:	
<ul> <li>a. Addition of two matrices (3x3)</li> <li>b. Subtraction of two matrices (2x2)</li> <li>c. Multiplication of two matrices using dynamic memory allocation.</li> </ul>	CO3
6. Write a program to find the maximum and minimum element in a set of inputs using one dimensional array.	CO3
7. Write a program to count the total number of vowels and consonants in a string. For	CO4

example	
Input string: I am proud to be an Indian Output: Total vowels – 10 and Total consonants – 10	
8. Develop a program to perform the following string manipulations without using string functions:	CO4
a. String copy	
b. String Concatenate	
c. String length	
d. String Compare	
9. The Fibonacci numbers are defined recursively as follows:	CO4
F1=1	
F2=1	
$F_n = F_{n-1} + F_{n-2}, n > 2$	
Write a function that will generate and print the first n Fibonacci numbers.	
Test the function for n=5,10,15	
10. Write a function using pointers to exchange the values stored in two locations in the memory.	CO4
Test Case:	
Input: A=10, B=-5	
Output: $A = -5$ , $B = 10$	
11. Develop a program to build a database of students with the following attribute: Roll no, Name, Course, Stream, Percentage, and Division. Take input for each student in all fields except division. Calculate division of each student such that those students having percentage >=60% are belongs to first division. Similarly, for second and third division students having conditions 50 %< =percentage<60% and 35 %< =percentage<50% respectively. If any student has percentage less than 35% then write "fail" in division field. After building the database display the database of the students. Hint: create database using structure.	CO5

Objective	<ul> <li>To j</li> <li>To i</li> <li>Assenge</li> </ul>	<ul> <li>The main objective of this course is to:</li> <li>To provide suitable listening tasks to develop communicative ability for academic and professional progress</li> <li>To inculcate channelized reading to make learners proficient in the chosen professional writing contexts.</li> <li>To improve learners' vocabulary and grammar to supplement their language use at professional contexts</li> <li>Assist students in the development of intellectual flexibility, creativity, and cultural literacy so that they may engage in life-long learning.</li> <li>Identify and begin to apply the language features of academic and professional writing and speaking</li> </ul>													
Outcomes	CO1: A context CO2: V reading: CO3: V enrichm CO4: S informa	The students who complete this course successfully are expected to:  CO1: Acquire sufficient command over language to speak at an academic or professional context through continuous exposure to similar listening tasks.  CO2: Write technically well at a professional contexts through exposing them to similar readings.  CO3: Use language at length at technical and professional situations through the enrichment of vocabulary and strengthening of grammatical knowledge.  CO4: Students should be able to ethically gather, understand, evaluate and synthesize information from a variety of written and electronic sources.  Knowledge  K2  K2  K3  K3  K3  K3  K3  K4

	Content	t of the	syllabı	18											

Unit - I Periods Listening- Listening for Cultural Awareness, Listening to Professional Conversations, Talks, Interviews and Lectures Speaking- Developing Confidence to get rid of Fear on the Dias, Discussion at a Corporate Context. Reading-Inferential Reading, Reading Short Messages and Technical Articles, Writing-Introduction to Letter Writing, Writing Formal and Informal Letters, Thanking Letters, Letters Calling for Quotations, Letters Placing an Order, Seeking clarification, Letters of Complaint. Focus on Language-Adjectives and Degrees of Comparisons Unit - II Periods Listening- Listening to specific information relating to technical content, Listening for statistical information **Speaking-** Expressing opinions, Formal Discussions, Describing Role Play at Business Context and Consolidating Ideas. Reading-Reading Technical Articles in Journals and Comparing Articles. Writing- Letter seeking permission to undergo practical training and to undertake project work. Focus on Language- Simple, compound and complex sentences and Transformation of Sentences. Periods **Unit - III** Listening- Listening to understand the overall meaning, Listening to Interviews and Presentations. Speaking- Giving Instructions and Showing Directions and Rephrasing Instructions. Reading-Skimming and Scanning, Reading Job Advertisements. Writing- Applying for a Job, Writing a CV. Focus on Language- Pronouns, Phrasal verbs, Restrictive and Non - restrictive clauses. Periods Unit - IV 9 Listening- Listening and retrieving Information. Speaking- Developing fluency and Coherence, Accent Neutralization, Voice Modulation, and Intonation, Improving Voice Quality. Reading-Reading and understanding Advertisements. Writing- Letters to the Editor, Letter of Complaint, Various kinds of Reports, Permission to go for Industrial visits. Focus on Language- Countable, Uncountable nouns, Recommendations, Discourse Markers and Comparative and Contrastive Connectives, Imperatives. Unit - V Periods Listening- Listening to Fragmented Texts and Filling in the Blanks. Speaking-Mind Mapping, Developing Coherence and Self-Expression, Making presentations, Paralinguistic and Extra linguistic Features (body language), Reading-Predicting content, Interpreting Reports. Writing- Writing Proposals, Agenda, Minutes of the Meeting. Focus on Language- British and American Vocabulary, Editing, Error Detection, and Punctuation. **Total Periods** 45 Text books 1. Sumant.S, Pereira Joyce, English for Communication, Vijay Nicole Imprints Pvt.Ltd., 2014. Sokkaalingam, S.RM., The Art Of Speaking EnglishVersatile Publishing House, 2018. 2. Unit - I		WATER TEC	CHNOLOG	τΥ				Periods		Ç	)		

Unit - IWATER TECHNOLOGYPeriods9Introduction-Sources and impurities in Water, Soft and Hard water, Water quality parameters, Types of Hardness –<br/>Determination of Hardness by EDTA method, Domestic Water Treatment. Boiler Feed Water –Requisites, Problems due

to hard water in boilers - Scale and Sludge formation in boilers-Caustic Embrittlement-Boiler corrosion, Treatment of boiler feed Water - Internal conditioning (Carbonate, Phosphate, and Calgon conditioning) External conditioning - Ion exchange process, Zeolite process, Brackish water –Water purification by Reverse osmosis. POLYMER CHEMISTRY Introduction - Occurrence, definitions - Functionality - Degree of Polymerization, Classification of polymers - structure (Linear, Branched & network polymer structure) block, random & graft copolymers, properties of polymers, Tacticity, Tg, molecular weight - number and weight average method. Types of polymerizations: Addition, condensation and copolymerization. Mechanism of polymerization: Addition - Free radical, cationic and anionic polymerization. Preparation, properties and applications of PE, PMMA, PC, nylon6, nylon 66, PET, and Bakelite. 9 **NANO CHEMISTRY** Basics- distinction between molecules, nanoparticles and bulk materials; size dependent properties. Nanoparticles: nanocluster, nanorod, nanotube (CNT) and nanowires. Synthesis: Sol-gel, Precipitation, Thermolysis - hydrothermal, solvothermal, Electro deposition, Spray Pyrolysis, Chemical Vapour deposition, Laser ablation; Properties and applications of nano materials in medical and electronic devices. **Unit - IV** RENEWABLE ENERGY AND STORAGE DEVICES Periods Renewable energy and its sources - Solar Energy - Photo voltaic cells, Importance of Solar cells - p-n junctions in Solar cells - Working of Photovoltaic cell, Recent advances in solar cell materials, Wind energy - Types of Wind Power Plants (WPPs), Components and working of WPPs, Tidal energy - Types of Tidal power plants (TPPs), Barrage and Non-Barrage Tidal power systems. Batteries and fuel cells: Types of batteries - Dry cells-Alkaline battery, lead storage battery, Ni-Cd battery, lithium battery, Fuel cell - H<sub>2</sub>-O<sub>2</sub> fuel cell-applications. Unit - V **CORROSION AND ITS CONTROL** Periods Introduction, Types of corrosion - chemical and electrochemical corrosion, mechanism, Pilling -Bedworth rule, Types of electrochemical corrosion – Galvanic corrosion, Pitting corrosion, Crevice corrosion, Corrosion on wire fence and Pipeline corrosion, Factors influencing rate of corrosion, corrosion control methods - Sacrificial anode and impressed cathodic current. Protective coatings - Paints: constituents and functions, Metallic coatings - steps involved in cleaning the surface for Electroplating, Electroplating (Au), Electro less plating (Ni). **Total Periods** 45 **Text Books:** 1. # Course Objective

The students should made to

- Learn the basic concepts of electrical parameters and electrical machines
- Learn the electrical wiring methods
- Learn the basics about semiconductor families and digital logics

# Course Outcome

At the end of the course, the student should be able to,	Knowledge Level
CO1:Understand the basics of electric circuits and type of the connection	K2
<b>CO2:</b> Understand the basics of electromagnetic laws and basic working principle of DC and AC machines.	K2
<b>CO3:</b> Understand the concepts of tariff, energy saving, illumination, electric lamps and safety measures.	K2
<b>CO4:</b> Understand the basic operating characteristics of semiconductor devices.	K2
CO5:Understand the fundamentals of digital logics and integrated circuits.	K2

### Content of the syllabus

	Unit – I	INTRODUCTION OF ELECTRICAL CIRCUITS	Periods	9
--	----------	-------------------------------------	---------	---

Definition of Voltage, Current, Power, Energy, Power factor, Circuit parameters, Ohm"s law, Kirchoff"s law. Concepts of AC Circuits-RMS value, Average value, Form and Peak factors, Concept of real and reactive power. Introduction

to three pha	se syste	ms - types of connections, relationship between line and phase va	alues. Concept of	of DC circuits
Unit - I		INTRODUCTION OF ELECTRICAL MACHINES AND MEASUREMENTS	Periods	9
		electromagnetic induction - Lens law - Fleming's left hand r		
		ruction of AC and DC machines -Working principle and constru	uction of Trans	former- Introduction
		ing instruments – Analog and Digital Instruments (Qualitative)		
Unit – I		WIRING AND ILLUMINATION	Periods	9
Electrical ta	ariff - 1 - Diffe	aircase and corridor wiring - wiring accessories. Different types conservation. Simple layout of power system-various rent types of electrical lamps.	s energy resou	rces,. The Laws of
Unit - I	$\mathbf{V}$	SEMICONDUCTOR DEVICES	Periods	9
	configu	s - Zener diodes - characteristics. Transistors: PNP and NPN rations -characteristics - comparison. Special semiconductor dS - SMPS.		
Unit – `	V	DIGITAL FUNDAMENTALS	Periods	9
•		Boolean Theorems – De Morgan's Theorem - Logic gates -Impluction to Operational Amplifier.	elementation of	Boolean Expression
			<b>Total Periods</b>	45

The student should be made to,

# Course **Objective**

- Understand the fundamentals of Python programming
- Handle list, tuples, sets and Dictionaries data types
- Learn function prototypes and string functions.
- Use files and modules for data processing

	Understand packages in Python and data visualization	
	At the end of the course, the student should be able to,	Knowledge Level
Course	<b>CO1:</b> Interpret the fundamental Python syntax and semantics and be fluent in the use of Python control flow statements.	K3
Outcome	CO2: Perform operations on list, tuples, sets and Dictionaries using python.	K3,K4
	CO3: Implement function prototypes and string functions.	K3,K4
	CO4: Apply files and modules and perform operations on CSV files.	K3,K4
	CO5:Perform data visualization and apply Python packages for CSV files	K3,K4

1. Course - End survey

#### Content of the syllabus

Unit – I	INTRODUCTION TO PYTHON	Periods	12
Introduction	to Python, features, installing Python, writing and executir	ng Python p	rogram — native

data types, comments, constants, variables, operators, expression, conditional statements, control statements, continue, pass, break.

**Illustrative programs**: finding factorial of n, generating Fibonacci series, exchange the values of two variables, calculating student grade, sum and average of n elements, linear search, printing a

pattern. Unit - II 12 Periods LISTS, TUPLES, SETS AND DICTIONARIES Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Sets: methods and operators, Dictionaries: operations and methods. **Illustrative programs**: find minimum in a list, list operations, create and insert elements in a Dictionary, operations on sets and tuples. Unit – III Periods **FUNCTIONS AND STRINGS** Functions definition, declaration, arguments, parameters – formal and local, parameter passing methods function prototypes, recursion; Strings: string slices, immutability, string functions and methods, string module, regular expressions. **Illustrative programs**: String manipulations, function that takes a list of words and returns the length of the longest one, counting the vowels and consonants in a given string, exchanging of two values using recursion. **Unit - IV** Periods FILES AND MODULES Files and exception: Text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, accessing CSV file. **Illustrative programs:** Word count, file copy, file operations: accessing a CSV file and generate reports. Unit – V Periods 12 PACKAGES AND DATA VISUALIZATION Text processing, Numerical processing: numpy package – mean, medium and mode, pandas package – vector, dataframe, data visualization: matplotlib, Time operations. **Illustrative programs**: Bar chart, Pie Chart, Create and display a data frame from a dictionary input using Pandas, Create a 3x3 matrix with values from 2 to 10 using numpy. **Total Periods** 60 **Text Books** Anurag Gupta, G.P. BISWAS," Python Programming – Problem solving, packages and Libraries, Edition 1, McGraw Hill, 2019 2. E Balagurusamy, "Problem Solving and Python Programming", Edition1, McGraw Hill, 2018 Reema Thareja, "Python Programming using Problem Solving Approach", OXFORD University Press, 2017. Content of the syllabus

### LANGUAGE AND LITERATURE

Periods

Language Families in India – Dravidian Languages — Tami las a Classical Language – Classical Literature in Tamil —Secular Nature of Sangam Literature — Distributive Justice in Sangam Literature — Management Principles in Thirukural-Tamil Epics and Impact of Buddhism & Jainism in Tamil Land - Bakthi Literature Azhwars and Nayanmars -Forms of minor Poetry - Development of Modem literature in Tamil -Contribution of Bharathiyar and Bharathidhasan.

#### UNIT II HERITAGE - ROCK ART PAINTINGS TO MODERN Periods 3 ART - SCULPTURE

Herostone to modern sculpture – Bronze icons – Tribes and their handicrafts – Art of temple carmaking -Massive Terracotta sculptures Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments -Mridhangam, Parai Veenai, Yazh and Nadhaswaram - Role of Temples in Social and Economic Life of Tamils

UNIT III	FOLK AND MARTIAL ARTS	Periods	3	
	Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Le dance – Sports and Games of Tamils.	eather puppetry,	Silambattam,	

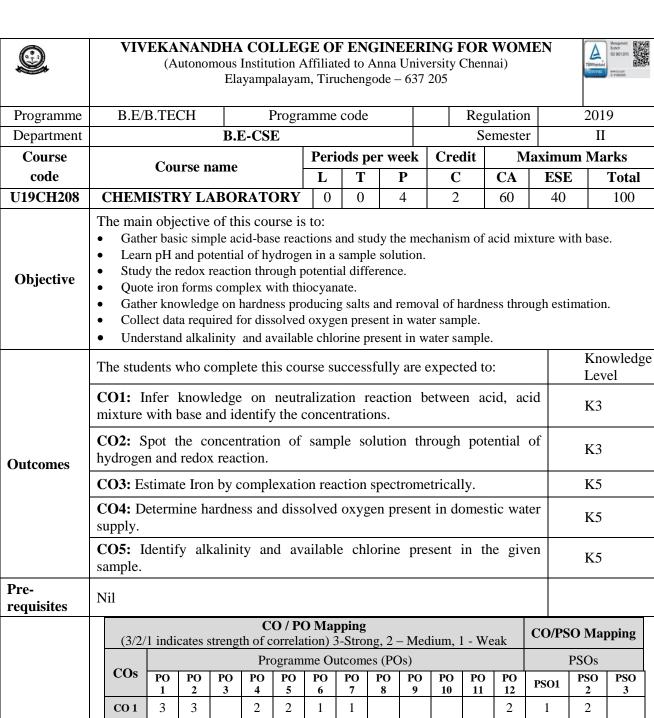

THINAI CONCEPT OF TAMILS UNIT IV Periods

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature -Aram Concept of Tamils - Education and Literacy during Sangam Age - Ancient Cities and Ports of Sangam Age -Export and Import during Sangam Age - Overseas Conquest of Cholas.

I I NI V	CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE	Periods	3
----------	---	---------	---

Contribution of Tamils to Indian Freedom Struggle - The Cultural Influence of Tamils over the other parts of India.- Self-Respect Movement -Role of Siddha Medicine in Indigenous Systems of Medicine-Inscriptions & Manuscripts — Print History of Tamil Books.

CIVIL ENCINEEDING DD ACTICE	
(CIVIL ENGINEERING PRACTICE)	
Plumbing:	~~-
1. Study of pipeline joints, its location and functions: valves, taps, couplings, unions,	CO2
reducers and elbows in household fittings.  2. Hands-on-exercise: Basic pipe connections – Mixed pipe material connection – Pipe	
connections with different joining components	CO <sub>2</sub>
Carpentry: 3. Study of the joints in roofs, doors, windows and furniture.	CO2
4. Hands-on-exercise: Wood work, joints by sawing, planning and	
cutting.	CO2
MECHANICAL ENGINEERING PRACTICE	
Welding:	CO1
5. Preparation of arc welding of butt joints, lap joints and tee joints.	CO1
6. Gas welding practice	CO1
Basic Machining:	CO1
7. Turning and Facing.	
8.Drilling Practice	CO1
Sheet Metal Work:	CO1
9. Forming & Bending	CO1
10. Model making – Tray and Basket.	CO1
4.Demonstration on:	
<ul> <li>(a) Foundry operations like mould preparation for gear and step cone pulley.</li> <li>(b) Fitting – Exercises – Preparation of square fitting and vee – fitting models.</li> </ul>	
5. Study of Air Conditioner & Centrifugal Pump.

### Content of the syllabus

Unit – I	PROPOSITIONAL CALCULUS	Periods	12

Propositions – Logical connectives – Compound propositions – Conditional and biconditional propositions – Truth tables – Tautologies and contradictions – Contra positive – Logical equivalences and implications – DeMorgan's Laws – Normal forms – Principal conjunctive normal form and Principal disjunctive normal form – Rules of inference – Arguments – Validity of arguments.

Unit	- II PREDIC	CATE CALCULUS	Periods	12
		unction – Variables – Free and bound variables – Quan		
		d implications for quantified statements - Theory of	inference –	Rules of universal
_		ization – Validity of arguments.	T	
Unit	DE 1 111		Periods	12
		product of sets - Relations on sets - Types of relation		
	ntation of a relat n – Lattices – Prop	ion - Graph of a relation – Equivalence relations – Poerties of lattices	Partial ordering	g – Poset – Hasse
	- IV FUNCT		Periods	12
Definit	ion – Classificatio	on of functions – Composition of functions – Inverse fun	nctions - Cha	racteristic function
of a	set – Rec	currence relations – Solution of recurrence relation by generating functions.		<ul><li>Generating</li></ul>
		THEORY	Periods	12
		initions – Examples – Properties – Semi groups – Mon		
		Subgroups – Homomorphism – Cosets – Lagrange's	theorem - No	ormal subgroups –
Norma	algebraic system	with two binary operations.		
			<b>Fotal Periods</b>	60

Content o	of the syllab	ous		
Unit -	- I	INTRODUCTION TO OOP AND JAVA FUNDAMENTALS	Periods	12
Object (	Oriented P	rogramming - objects and classes - Abstraction -	- Encapsulation-	Inheritance -
Polymorp	hism- OOI	P in Java - Characteristics of Java - The Java Environme	ent - Java Source	File - Structure
- Compi	lation. Fun	damental Programming Structures in Java - Defining	classes in Java	<ul><li>constructors,</li></ul>
methods -	-access spe	cifiers - static members - Data Types, Control Flow, Arra	sys-Strings.	
Unit -	- II	INHERITANCE AND PACKAGES	Periods	12
Inheritano	ce Basics -	Multilevel Hierarchy - Constructors - Method Overr	iding -Using sup	per – Dynamic
Method I	Dispatch –U	Jsing final – Abstract Classes – Packages – Ac	ccess Protection	<ul><li>Importing</li></ul>
Packages	<ul><li>Interfa</li></ul>	ces.		
Unit –	- III	EXCEPTION HANDLING AND I/O	Periods	12
Exception	ns - except	ion hierarchy - throwing and catching exceptions - bu	ilt-in exceptions.	Input / Output
Basics -	Streams -	Byte streams and Character streams - Reading and '	Writing Console	<ul> <li>Reading and</li> </ul>
Writing F	iles			
Unit -	IV	MULTITHREADING PROGRAMMING	Periods	12
Differenc	es between	n multi-threading and multitasking, thread life cycle,	creating threads,	synchronizing
threads, I	nter-thread	communication, daemon threads, thread groups		
Unit -	- <b>V</b>	EVENT DRIVEN PROGRAMMING	Periods	12
Graphics	programm	ng - Frame - Components - working with 2D shapes -	Using color, font	s, and images -
Basics of	event hand	lling - event handlers - adapter classes - actions - mous	e event. Introduct	tion to Swing -
layout ma	anagement	- Swing Components – Text Fields , Text Areas – Buttor	ns- Check Boxes -	- Radio Buttons
– Lists- c	hoices- Scr	ollbars – Windows – Menus – Dialog Boxes

	the syllabus		
Unit – I		Periods	12
	listributions - Estimation of parameters - Statistical hypothesis - Large	•	
	for single mean and difference of means -Tests based on t, Chi-square	re and F distr	butions for mean,
	d proportion - Contingency table (test for independent) - Goodness of fit.	T	
Unit - I		Periods	12
	nd two way classifications - Completely randomized design - Randomi	zed block des	ign – Latin square
$design - 2^2$	factorial design.		
Unit – II	SOLUTION OF EQUATIONS AND EIGENVALUE PROBLEMS	Periods	12
Solution o	algebraic and transcendental equations - Fixed point iteration metho	d – Newton l	Raphson method -
Solution of	linear system of equations - Gauss elimination method - Pivoting - G	Gauss Jordan	method – Iterative
methods of	Gauss Jacobi and Gauss Seidel - Eigen values of a matrix by Power	method and Ja	cobi's method for
symmetric	matrices.		
T I : 4 T V	, INTERPOLATION, NUMERICAL DIFFERENTIATION	Periods	10
Unit - IV	AND NUMERICAL INTEGRATION	Perious	12
Lagrange's	and Newton's divided difference interpolations - Newton's forward and b	oackward diffe	rence interpolation
- Approxi	nation of derivates using interpolation polynomials - Numerical singl	e and double	integrations using
Trapezoida	l and Simpson's 1/3 rules.		
<b>T</b> 7 • 4	NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL	D : 1	10
Unit – V	EQUATIONS	Periods	12
Single step	methods: Taylor's series method - Euler's method - Modified Euler's method	thod - Fourth	order Runge-Kutta
	solving first order equations - Multi step methods : Milne's and Adams	s - Bash forth	predictor corrector
methods fo	r solving first order equations.		T 60
		Total Periods	60

Sources -FOSS Licenses -FOSS Examples. Linux Overview: Linux system structure - Kernel and User mode Operations - Process-User Management in Linux. Case Study: Ubuntu - Cent OS - Redhat.    Hustrative Programs: Practicing basic Linux commands.	Unit – I INTRODUCTION TO OPEN SOURCES Periods 12	,
Operations - Processes-User Management in Linux. Case Study: Ubuntu - Cent OS - Redhat.    Illustrative Programs: Practicing basic Linux commands.   12		
Unit - II		de
Unit - II		
Introduction to PHP - The Building blocks of PHP: Variables, Data Types, Operators. Flow Control Functions in PHP: Conditional statements, Switching Flow, Loops-Strings and Arrays-random numbers-functions-Reading data from web pages - PHP Browser Handling Power.    Illustrative Programs:		=
Functions in PHP: Conditional statements, Switching Flow, Loops-Strings and Arrays-random numbers-functions-Reading data from web pages - PHP Browser Handling Power.    Illustrative Programs:   Write a PHP Script to display the prime members from count 1 to 1000		
functions-Reading data from web pages - PHP Browser Handling Power.    Illustrative Programs:   1. Write a PHP Script to display the prime members from count 1 to 1000   2. Write a factorial program with function and without function using for loop in PHP.   3. Write a program to calculate Electricity bill in PHP   4. Write a simple calculator program in PHP using switch case   2. Write a program to calculate Electricity bill in PHP   4. Write a simple calculator program in PHP using switch case   2. Write a program to calculator program in PHP using switch case   2. Session Handling in PHP - Cookies. Introduction to MYSQL - Working with Databases and Tables-PHP with MYSQL Connectivity: Insert Data from HTML Form to Tables, extracting data from database - Updating the table data.   3. Basic My SQL queries   4. File Uploading and Downloading with PHP   2. Session handling in PHP   3. Basic My SQL queries   4. File Uploading and Downloading with PHP   2. Session handling in PHP   3. Basic My SQL queries   4. Periods   1. Result Display System.   4. Periods   1. Periods   1. Write 10   1. Periods   1. Periods   1. Write 10   1. Periods   1. Write 10   1. Periods   1. Write 2   1. Write 2   1. Write 3   1. Write 3   1. Write 3   1. Write 4   1. Write 4   1. Write 5   1. Write 5   1. Write 5   1. Write 6   1. Write 6   1. Write 6   1. Write 6   1. Write 7   1. Write 7   1. Write 7   1. Write 7   1. Write 8   1. Write		
Illustrative Programs:   1. Write a PHP Script to display the prime members from count 1 to 1000     2. Write a factorial program with function and without function using for loop in PHP.     3. Write a program to calculate Electricity bill in PHP     4. Write a simple calculator program in PHP using switch case		S-
1. Write a PHP Script to display the prime members from count 1 to 1000		
2. Write a factorial program with function and without function using for loop in PHP.  3. Write a program to calculate Electricity bill in PHP  4. Write a simple calculator program in PHP using switch case  Unit — III	_	
3. Write a program to calculate Electricity bill in PHP 4. Write a simple calculator program in PHP using switch case  Unit — III		
Unit – III PHP WITH MYSQL Periods 12  Session Handling in PHP –Cookies. Introduction to MYSQL – Working with Databases and Tables—PHP with MYSQL Connectivity: Insert Data from HTML Form to Tables, extracting data from database – Updating the table data.  Illustrative Programs:  1. File Uploading and Downloading with PHP 2. Session handling in PHP 3. Basic My SQL queries  PHP with Database connectivity (Retrieving and uploading data, dynamic internet applications): 1. Result Display System.  Unit - IV INTRODUCTION TO PERL Periods 12  PERL overview-Variables and Data types-Arrays-Control Structures—Subroutines, Packages and Modules-Error Handling—Regular Expressions.  Illustrative Programs: 1. Write a Perl Program to swap two numbers without using the third variable.  Unit - V PERL AND CGI Periods 12  Working with Files—Sending Emails -Database Access—Perl CGI Programming—GET and POST Methods—Cookies in CGI.  Illustrative Programs:  Perl Database Connectivity: 1. Create a record into Student table with the attributes of Student Roll no, Name, DOB, Age, Blood Group, Contact Number and Year of Studying. 2. Write a perl program to read and write a file.  Total Periods 60  Text Books  1. Remy Card, Eric Dumas and Frank Mevel, "The Linux KernelBook", WileyPublications, 2003  References  1. Steven Holzner, "PHP: The Complete Reference", McGraw Hill Education, 2017  2. Steve Suchring, "MySQL Bible", John Wiley, 2002  3. Martin C. Brown, "Perl: The Complete Reference", 2nd Edition, McGraw - Hill Publishing Company Limited, Indian Reprint 2009.  E-Resources  1. https://www.w3schools.com/php/php.intro.asp	1 0

LI	ST OF EXPERIMENTS	Course Outcome
1.	The catalogue page should contain the details of all the books available in the web. The details should contain the following: 1. Snap shot of Cover Page. 2. Author Name. 3. Publisher. 4. Price. 5. Add to cart button.	( '( )
2.	Create a "registration form "with the following fields 1) Name (Text field) 2) Password	

(password field) 3) E-mail id (text field) 4) Phone number (text field) 5) Sex (radio button) 6) Date of birth (3 select boxes) 7) Languages known (check boxes – English, Telugu, Hindi, Tamil) 8) Address (text area)	CO1
3. HTML5 and JavaScript:  a) position in the string of the left-most vowel b) number with its digits in the reverse order c) Write an HTML page including any required JavaScript that takes a number from one text field in the range of 0 to 999 and shows it in another text field in words. If the number is out of range, it should show "out of range" and if it is not a number, it should show "not a number" message in the result box.	CO2
HTML and CSS:	
4. Write an HTML page that contains a selection box with a list of 5 countries. When the user selects a country, its capital should be printed next to the list. Add CSS to customize the properties of the font of the capital (color, bold and font size).	CO2
5. Design a web page using CSS (Cascading Style Sheets) which includes the following: A. Use different font, styles: In the style definition you define how each selector should work (font, color etc.). Then, in the body of your pages, you refer to these selectors to activate the styles.	CO2
6. To convert the static web pages online library into dynamic web pages using servlets and cookies.	CO3
7. a) Assume four users user1, user2, user3 and user4 having the passwords pwd1,pwd2,pwd3 and pwd4 respectively. Write a PHP for doing the following. 1. Create a Cookie and add these four user ID"s and passwords to this Cookie. 2. Read the user id and passwords entered in the Login form (week1) and authenticate with the values (user id and passwords) available in the cookies. If he is a valid user (i.e., user-name and password match) you should welcome him by name (user-name) else you should display "You are not an authenticated user"	CO5
8. Write an XML file which will display the Book information which includes the following: 1) Title of the book 2) Author Name 3) ISBN number 4) Publisher name 5) Edition 6) Price Write a Document Type Definition (DTD) to validate the above XML file.	CO5
9. Write a java program/servlet/JSP to connect to that database and extract data from the tables and display them. Experiment with various SQL queries. Insert the details of the users who register with the web site, whenever a new user clicks the submit button in the registration page.	CO3
10. Write a JSP which does the following job Insert the details of the 3 or 4 users who register with the web site by using registration form. Authenticate the user when he submits the login form using the user name and password from the database. CO4	CO4
11. A user validation web application, where the user submits the login name and password to the server. The name and password are checked against the data already available in Database and if the data matches, a successful login page is returned. Otherwise a failure message is shown to the user. Modify the above program using AJAX to show the result on the same page below the submit button.	CO5
12. To write a program using AJAX for displaying cricket players profile	CO5
Total Periods	45

# Course Objective

The main objective of the course is to:

- To help the student understand the importance of having his language skills kept ready for effective use
- To provide a host of varied opportunities for the student to hone his acquired language skills basic components, namely, Grammar, Vocabulary, Spelling and Comprehension.

Course
Outcome

At the end of the course, the student will be able to,	KL
CO1:Identify the verb and tense in a sentence by circling and labeling	K1
CO2:State the definition of an article	K1
CO3:Develop their awareness of correct usage of English grammar in writing and speaking ·	К3
CO4:Tests a vocabulary power and skill to follow the logic of sentences	K4
CO5:Discuss how word root based extends vocabulary	K2

#### **Content of the syllabus**

Unit– I	TENSES	Periods	6

Purpose and rules of tenses and its keywords (focus should be given to present continuous, future continuous, present perfect, future perfect, present perfect continuous, past perfect continuous, future perfect continuous With more examples) -Direct and Indirect Speech –Voices.

<b>Unit-II</b>	ARTICLES	Periods	6

**Purpose of Articles: Indefinite Article:** If you want to say about ANY item, you should use the articles A / An. **A:** A European, A One Eye dbeggar, A University, A Useful Website. Name of professions, Expression of quantity, To make a Proper noun a Common noun, With certain numbers, used before the word 'Half' when it follows a whole number. **Exceptions: Choosing A or An** There are a few exceptions to the general rule of using a before words that start with consonants and an before words that begin with vowels. The first letter of the word honor, for example, is a consonant, but it's unpronounced. In spite of its spelling, the word honor begins with a vowel sound. Therefore, we use an **Example.** 

#### The Definite Article:

Where to use the Definite Article -A specific item, a particular person or thing, Before superlative forms, Before double comparatives, Before musical instruments, Before rank or title, Before name of the political parties, armed forces, physical positions, Before a Proper noun when used as a Common noun, Before some adjectives to make them nouns, Before Ordinal numbers, Before the names of Oceans, Seas, Rivers, Canals, Deserts, Groups of Mountains and Groups of Islands, Before the names of the Things, which are unique in nature, Before the names of Planets and Satellites, Before Holy Books, Before the names of News Papers, Before the names of some countries, measuring expressions beginning with by. **Omission of articles**:

Before Plural countable noun, Before proper noun, Before languages, a single item of uncountable noun, Before name of the meals except adjective usage, Double expressions – with wife and fork, with hat and folk, from top to bottom, With the names of meals such as Breakfast, Before predicative nouns denoting a unique position, After type of / kind of / sort of / post of / title of / rank of / articles are not used. Ex. He is not that sort of man, Articles are not used with material nouns, After di-transitive verb articles should not be used except when it is used as mono transitive verb, Before the names of meals no article should be used in a general way except in particular causes.

#### Repetition of the articles

1. When two or more adjectives qualify the same noun, the article is used before the first adjective only; but when they qualify different nouns, expressed or understood, the article is used before each adjective.

#### **PREPOSITIONS**

- a. Prepositions Of Time-On,In,At,Since,For,Ago,During,Before,After,Until,Till,To/Past,From/To,By
- b. Prepositions Of Place-In, At, On, Off, By, Beside, Under, Over, Below, Above, UpAndDown, Ago
- $c.\ Prepositions\ Of\ Directions/Movements Across, Through, To, Into, Out Of, Onto, Towards, From the Control of the Control$
- d. Other Prepositions-Of, By, About, For, With
- e. Prepositions Usage with Its Context

Unit – III	SENTENCECORRECTION	Periods	6	
			1	-

#### SENTENCECORRECTION

- a) In each of the following sentences, four options are given. You are required to identify the best way of writing the sentence in the context of the correct usage of standard written English. While doing so, you have to ensure the message being conveyed remains the same in all the cases.
- b) For each of the following questions, a part or the whole of the original sentence has been underlined. You have to find the best way of writing the underlined part of the sentence.
- c) In the following questions, you have to identify the correct sentence/s. For each of the following questions, find the sentence/s that are correct.
- d) In each of the following questions, one or more of the sentences is/are incorrect. You have to identify the incorrect sentence/s.

#### SENTENCEIMPROVEMENT

- a. Subject-Verb Agreement
- b. Parallelism
- c. Redundancy: The error of repeating the same thing.
- d. Modifier

1. 2.

e. Comparisons

RULE:(a) When comparative degree is used with than, make sure that we exclude the thing compared from the rest of class of things by using the

- f. Confusing words
  - i) Fewand Less
  - ii) FewandA few
  - iii) Little and A Little

A little tact would have saved the situation(sometact). Layand Lie Lay, laid **Unit-IV** Periods **SENTENCE COMPLETION** 6 **SENTENCE COMPLETION:** Purpose and usage of proper words. **SPOTTINGERRORS:** a. Errors on conjunctions b. Errors on if 'clauses c. Errors on adverbs d. Errors on adjectives e. Errors on prepositions f. Errors on determiners g. Errors on verbs h. Errors on nouns i. Errors on modifiers j. Errors on degrees of comparison k. Errors on subject-verb agreement Errors on infinitives m. Errors on pronouns n. Errors on tenses Redundancy errors p. Errors on articles Error on complex sentences Unit-V Periods 6 VOCABULARY Synonyms: Root Based Word, Suffix Based Word. U19CS520	Computer	Networks	3	0	0	3	40	60	100	
Course Objective	jective  • Understand the concepts of Routing and Addressing • Know flow control and congestion control algorithms. • Understand the role of application protocols in networking									
	At the end of the course, the student should be able to,									
	<b>CO1:</b> Identify the different components, categories of Computer Networks and Demonstrate the Layered Architecture.									
Course Outcome	CO2: Describe the design issues of data link layer, media access control protocols & internetworking protocols.									
	CO3: App	oly appropriate routing alg	gorithms	and m	ultica	st routing	techniques.		K3	
	CO4: Illustrate the functions and protocols of the transport layer, congestion control techniques and Quality of Service requirements for a network									
	<b>CO5:</b> Analyze the features and operations of various application layer protocols such as HTTP, DNS, and SMTP

LIST	Γ OF EXPERIMENTS	Course Outcome
1.	Implementation of Symbol Table	CO1
2.	Develop a lexical analyzer to recognize a few patterns in C. (Ex. identifiers, constants, comments, operators etc.)	CO2
3.	Implementation of Lexical Analyzer using Lex Tool	CO2
4.	Implementation of Calculator using LEX and YACC	CO2
5.	Implement control flow analysis and Data flow Analysis	CO3
6.	Implement any one storage allocation strategies(Heap ,Stack, Static)	CO3
7.	Construction of DAG	CO4
8.	Implement the back end of the compiler which takes the three address code and produces the 8086 assembly language instructions that can be assembled and run using a 8086 assembler. The target assembly instructions can be simple move, add, sub, jump. Also simple addressing modes are used.	CO4
9.	Implementation of Simple Code Optimization Techniques (Constant Folding. etc.)	CO5

LIST OF EXPERIMENTS	Course
	Outcome
1. Implement and demonstrate the FIND-S algorithm for finding the most specific hypothesis based on a given set of training data samples. Read the training data from a .CSV file.	CO1
2. Implement and demonstrate the Candidate-Elimination algorithm for a given set of training data stored in a .csv file.	CO1
3. Write a program to demonstrate the working of the decision tree based ID3 algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample.	CO2
4. Build an Artificial Neural Network by implementing the Backpropagation algorithm and test the same using appropriate data sets.	CO4
5. Write a program to implement the Naïve Bayes classifier for a sample training data set stored as a .CSV file. Compute the accuracy of the classifier, considering few test data sets.	CO5
6. Assuming a set of documents that need to be classified, use the naïve Bayesian Classifier model to perform this task. Built-in API can be used to write the program. Calculate the accuracy, precision, and recall for your data set.	CO3
7. Write a program to construct a Bayesian network considering medical data. Use this model to demonstrate the diagnosis of heart patients using standard Heart Disease Data Set. You can use Python ML library classes/API.	CO5
8. Cluster a set of data stored in a .CSV file using the same data set for clustering using k-Means algorithm and EM algorithm. Compare the results of these two algorithms and comment on the quality of clustering. You can add Python ML library classes/API in the program.	CO5
9. Write a program to implement k-Nearest Neighbour algorithm to classify the iris data set. Print both correct and wrong predictions. Python ML library classes can be used for this problem.	CO3
10. Implement the non-parametric Locally Weighted Regression algorithm in order to fit data points. Select appropriate data set for your experiment and draw graphs.	CO2

2. Course - end survey

Unit – I	CORE JAVA EE	Periods	9
Java EE 5 F	atform Overview - Java EE Platform – Distributed Multi-tiered Applic	ations - Web a	and Business
	- Java EE Containers - services & types - Application Assembly and		
	-Getting Started with Web Applications - Application Deploy	•	
	and deployment Steps - Configuring Web application – Web application		
	e) - Building & Deploying Applications- Web &Business Components	1	
Unit – I		Periods	9
	ework: Basics & Architecture – Request Handling Life Cycle - l	•	•
•	n, Actions, Interceptors, Results, Value Stack/OGNL Struts2 Tag Lib	orariesStruts2	XML Based
	Database Access.	·	
Unit - II	HIBERNATE	Periods	9
	to Hibernate, ORM Overview, Hibernate Environment - Hiber		•
	Configuration, Hibernate Sessions, Persistent Class & Mapping Fi		•
	Hibernate Query Language (HQL) - Hibernate O/R Mappings -	Collection &	Association
Mappings-F	ibernate Annotations Eclipse - overview.  INTRODUCTION TO SERVER-SIDE JS FRAMEWORK	<u> </u>	<u> </u>
Unit – Γ	- NODE.JS	Periods	9
T . 1 .:		1	1
	- What is Node JS - Architecture - Feature of Node JS - Installation	_	_
	HTTP (Request & Response) – Event Handling - GET & POST im	plementation -	- Connect to
NoSQL Dat	abase using Node JS – Implementation of CRUD operations.	T	T
Unit - V	INTRODUCTION TO CLIENT-SIDE JS FRAMEWORK	Periods	9
	- BASICS OF ANGULAR 4.0		
	to Angular 4.0 - Needs & Evolution – Features – Setup and Configu		
	Femplates – Change Detection – Directives – Data Binding - Pipes	– Nested Co	mponents -
Template D	iven Forms - Model Driven Forms or Reactive Forms.	al Periods	45

#### **Indirect**

Conten	t of the syllabus		
Unit –		Periods	9
Introdu	ction to socket programming – Overview of TCP / IP protocols – Int	roduction	to sockets –
Socket	address structures – Byte ordering functions – Address conversion fu	ınctions –	Elementary
TCP so	ckets - Socket - Connect - Bind - Listen - Accept - Read - Writ	e – Close	functions -
Iterative	e server – Concurrent server.		
Unit – I	I APPLICATION DEVELOPMENT	Periods	9
TCP ec	ho server - TCP echo client - POSIX signal handling - Server w	ith multip	le clients –
Bounda	ry conditions- Server process crashes- Server host crashes - Server	crashes ar	nd reboots –
Server	shutdown - I/O multiplexing - I/O models - Select function - Shut	down fund	ction – TCP
echo se	ever (with multiplexing) - Poll function - TCP echo client (with mul-	tiplexing)	
Unit -	SOCKET OPTIONS, ELEMENTARY UDP SOC	Periods	9
Omt-	SOCKETS	rerious	9
Socket	options - Getsocket and set socket functions - Generic socket option	ns – IP soo	cket options
– ICMI	socket options – TCP socket options – Elementary UDP sockets	<ul><li>UDP ec</li></ul>	ho server –
UDP ed	ho client - Multiplexing TCP and UDP sockets - Domain Name	System –	Get host by
name f	unction - IPV6 support in DNS - Gethostbyadr function - Ge	tservbynaı	ne and get
servbyp	ort functions.		
Unit -	- IV ADVANCED SOCKETS	Periods	9
IPV4 ar	d IPV6 interoperability – Threaded servers – Thread creation and te	ermination	<ul> <li>TCP echo</li> </ul>
server u	sing threads – Mutexes – Condition variables – Raw sockets – Raw	socket crea	ation – Raw
socket o	utput – Rawsocket input – Ping program – Trace route program.		
Unit		Periods	9
	network management concepts - SNMP management information		
SNMP	V1protocol and practical issues – Introduction to RMON, SNMP V2	and SNM	P V3.
	Total Period	S	45

Unit – I INTRODUCTION Periods 9	Unit – I	INTRODUCTION	Periods	9
---------------------------------	----------	--------------	---------	---

Introduction to Semantic Web: Limitations of current Web - Development of Semantic Web - Emergence of the Social Web - Social Network analysis: Development of Social Network Analysis - Key concepts and measures in network analysis - Electronic sources for network analysis: Electronic discussion networks- Web-based networks -

Annlicat	tions of Soc	rial Network Analysis.		1			
		MODELLING, AGGREGATING AND KNOWLEDGE					
Unit - I	I	REPRESENTATION	Periods	9			
		role in the Semantic Web: Ontology-based knowledge Representation -					
		Resource Description Framework - Web Ontology Language - Modeling					
		e-of-the-art in network data representation - Ontological representation assoning with social network.	i of social indiv	iduais -			
		EXTRACTION AND MINING COMMUNITIES IN WEB					
Unit – l		SOCIAL NETWORKS	Periods	9			
	_	on of Web Community from a Series of Web Archive - Detecting					
		ition of community - Evaluating communities - Methods for con	•				
		ions of community mining algorithms - Tools for detecting comm d communities - Decentralized online social networks - Multi-Rela					
		network communities	ulollal Character	ization			
or dyna	inic sociai	PREDICTING HUMAN BEHAVIOUR AND PRIVACY					
Unit – l	- IV ISSUES Periods						
Understa	anding and	predicting human behaviour for social communities - User data mana	agement - Infere	nce and			
Distribut	tion - Enab	ling new human experiences - Context - Awareness - Privacy in online so	ocial networks -	Trust in			
		- Trust models based on subjective logic - Trust derivation based on tru	ist comparisons -	- Attack			
spectrum	n and count	ermeasures.					
Unit – V	V	VISUALIZATION AND APPLICATIONS OF SOCIAL NETWORKS	Periods	9			
		ntrality - Clustering - Node-Edge Diagrams - Matrix representation - V					
		ng social networks with matrix-based representations - Matrix and Node-	Link Diagrams -	Hybrid			
represen	tations - A	oplications - Cover networks - Community welfare.

B.E./B.Tech. 2019 Programme Code Regulation **Programme Computer Science & Technology** Semester **Department** Credit Maximum Marks Periods Per Week **Course Code** Course Name ESE Total L T P C CA **Biometrics Systems** 3 0 0 3 40 60 **U19CTV23** 100

# Course Objective

The student should be made to,

- Understand the basic concept of biometrics systems.
- Describe the principles of the core biometric modalities.
- identify the privacy and security concerns surrounding biometric systems.
- discuss about Deal with poor image qualities and its effect in biometrics.
- Organize and conduct biometric data collections, and apply biometric databases in system evaluation.

	At the end of the course, the student should be able to,	Knowledge Level							
	<b>CO1:</b> Understand biometrics systems operation from sensor to decision.	K2							
Course	<b>CO2:</b> Describe the principles of the core biometric modalities (face,								
Outcome	fingerprint, retina and iris), and to deploy them in authenticationscenarios.								
Outcome	CO3: Identify the privacy and security concerns surrounding biometric systems.	K2							
	<b>CO4:</b> Deal with poor image qualities and its effect in biometrics.								
	<b>CO5:</b> Enumerate the most up-to-date examples of real biometric applications in human authentication.	K4							

#### **Pre-requisites**

	CO / PO Mapping													
	(3/2/1 indicates strength of correlation) 3-Strong, 2 – Medium, 1 - Weak													ng
	Programme Outcomes (POs)													
COs	PO	PO	PO	PO	PO	PO	PO	PO	PO	PO	PO	PO	PSO	PSO
	1	2	3	4	5	6	7	8	9	10	11	12	1	2
CO1	1	2	2	2	2								1	2
CO2	2	1	1	2	2								2	2
CO3	1	2	1	2	1								1	1
CO4	1	2	1	1	1								1	1
CO5	1	2.	1	1	1								2.	1

## **Course Assessment Methods Direct**

#### Direct

- 1. Continuous Assessment Test I, II & III
- 2. Assignment.
- 3. End-Semester examinations

#### Indirect

#### Content of the syllabus INTRODUCTION TO BIOMETRICS Periods History of Biometrics ,Types of Biometric Traits, General Architecture of Biometric System, Biometric Characteristics- Basic working of Biometric Matching, Biometric System Error and Performance Measures- Design of Biometric Systems, Identification and Verification Concepts- Applications of Biometrics, Benefits of Biometrics versus Traditional Authentication Methods. FACE, FINGERPRINT, RETINA AND IRIS BIOMETRICS Unit - II Periods 9 Introduction to Face, Finger Print Retina and Iris biometrics-Design of Face Recognition System, Neural Network for Face Recognition-Face Detection in video sequences, Challenges in Face Biometrics, Face Recognition Methods, Advantages and Disadvantages8.-Fingerprint Biometrics, Fingerprint Recognition System, Minutiae Extraction.-Design of Retina and Iris Recognition System, Iris Segmentation Method.- Determination of Iris Region, Experimental Results of Iris Location, Applications of Iris Biometrics, Advantages and Disadvantages. PRIVACY ENHANCEMENT AND CRYPTOGRAPHY FOR Unit - III **Periods BIOMETRICS** Introduction to privacy enhancement and biometric cryptography.-Privacy concerns associated with deployment, identity and privacy, privacy concerns, biometrics with privacy enhancement.-Comparison of biometrics in terms of privacy, soft biometrics.-General purpose crypto system, Model cryptography and attacks.- Symmetric key ciphers, cryptographic algorithms-Introduction to Multimodal biometrics, Basic architecture of multimodal biometrics-Multimodal biometrics using face and ear, Characteristic and advantages of multimodal biometrics. IMAGE ENHANCEMENT TECHNIQUES Periods **Unit - IV** Introduction to Image Enhancement Techniques, Current Research in Image Enhancement Techniques- Image Enhancement, Frequency Domain Filters, Databases and Implementation.-Experimental results of Image Enhancement Techniques. BIOMETRICS: SCOPE AND FUTURE, REPOSITORIES FOR DATABASE ANDBIOMETRIC STANDARDS Unit - V Periods 9 Scope and future market of biometrics-Applications of biometrics, Biometrics and information technology infrastructure, Role of biometrics in enterprise security, Role of biometrics in border security-Smart card technology and biometrics, Radio frequency identification biometrics, DNA biometrics, Comparative study of various biometric techniques. Biometric Databases and Biometric Standards. **Total Periods** 45 **Text Books** G.R.Sinha, Sandeep B Patil, "Biometrics: Concepts and Applications", Wiley publications, 1. New Delhi, 2013. Robert Newman" Security and Access control using Biometric Technologies", CengageLearning, 2010. **References:** Jain, A.K., Flynn, P. and Ross, A. Handbook of Biometrics. 2008. 1. Content of the	syllabus		
Unit – I	QUERY PROCESSING	Periods	9
Basic concer	ts of query processing - converting SQL queries into Rel	ational Algel	ora - Basic
	or executing query operations - Query tree and query graph - 1		
query tree.		1	
Unit – II	INDEXING, HASHING AND CURRENT ISSUES	Periods	9
Ordered indic	ces – B tree index files – B+ Tree index files – Multiple	key access -	Static and
	shing - Bitmap indices- Active Database Concepts - Int		
	Clausal Form and Horn Clauses - Interpretation of Rule	es – Use of	Relational
Operations –	Multimedia Databases	T	T
Unit - III	OBJECT ORIENTED AND EXTENDED RELATIONAL DATABASE TECHNOLOGIES	Periods	9
Overview of	Object oriented database - OO Concepts - Encapsulation of O	perations and	methods -
Inheritance -	Object Model - Object definition language - Object Qu	ery Languag	e - Object
Relational Co	ncepts.		
Unit – IV	DATABASE SECURITY	Periods	9
	to Database Security Issues- Discretionary Access Control		_
	vileges- Mandatory Access Control and Role-Based Access		
	oduction to Statistical Database Security- Encryption and Pu	blic Key Infra	astructures-
	Maintaining Database Security- Oracle Label-Based Security		
Unit - V	ADVANCED DATABASE TECHNIQUES	Periods	9
	Only SQL)) - Introduction to MongoDB - Term Used in RI		
	MongoDB – MongoDB Query Language- MongoDB Atlas -		
	CQL Data Types – CQLSH – CRUD operations –Collections – r Commands – Import and Export – Querying System Tables.	- Using a cou	nter – 11me
to Live – Aite		al Periods	45

		Period	s Per V	Veek	Credit	M	Iaximu	ım Marks
<b>Course Code</b>	Course Name	L	T	P	C	CA	ESE Total	
U19CTV41	Fundamentals of Virtualization	3	0	0	3	40	60	100
Course Objective	The main objective of the Understand about and techniques  Understand CP  How to configure	out Computi U virtualizat	ng Vii	nemory	virtualiz		ns	

- How to configure VM CPU and memory options
- Understand storage and network virtualization
- Acquire knowledge about virtualization security
- Learn about many case studies

	The students who complete this course successfully are expected to:	Knowledge Level
Course	CO1:Able to define, distinguish Computing Virtualization tools, applications and techniques	K1
Outcome	CO2: Able to configure virtual machine CPU and memory options	K2
	CO3: Able to configure VM storage	K3
	CO4: Able to understand network options in Virtualization	K3
	CO5:Identify threats and able to secure virtualized environment	K3

### Content of the syllabus

### Unit – I INTRODUCTION

Periods

9

Introduction to enterprise applications - Software engineering methodologies - Life cycle of raising an enterprise application - Key determinants of successful enterprise applications - Measuring the success of enterprise applications. Inception of enterprise applications: Enterprise analysis - business modeling-requirements elicitation and analysis - requirements validation - planning and estimation.

#### Unit - II ARCHITECTURE AND DESIGNING

Periods

9

Architecture, view and viewpoints-Enterprise application architecture perspective - Logical architecture - Technical architecture and Design - Data architecture - Infrastructure architecture and design-infrastructure architecture and building blocks –Networking, internetworking and Communication Protocol – IT hardware and software – Middleware – Policies for infrastructure management – Deployment Strategy - Documentation: system architecture documentation - design documentation

## Unit – III CONSTRUCTING ENTERPRISE APPLICATION

Periods

9

Construction readiness - code review — objective — Process - static code analysis — Coding style — Logical bugs — Security vulnerabilities — Code quality -build and testing-build process — unit testing - Dynamic code analysis — Code profiling — Code coverage

# Unit - IV TESTING AND ROLLING OUT ENTERPRISE APPLICATION

Periods

9

Testing enterprise applications – enterprise application environments - integration testing - system testing – Performance, Penetration, Usability, Globalization, Interface Testing - user acceptance testing - rolling out enterprise application

#### Unit – V APPLICATION IMPLEMENTATION

Periods

9

Infrastructure services Layer Framework components – Presentation Layer Framework components – Business Layer Framework components – Data Access Layer Framework components

#### **Total Periods**

45

#### **Text Books**

AnubhavPradhan, Satheesha B. Nanjappa, Senthil K. Nallasamy, Veerakumar Esakimuthu, "Raising Enterprise Applications", 1<sup>st</sup> Edition, Wiley India Pvt. Ltd, 2010.
