

**VIVEKANANDHA COLLEGE OF ENGINEERING FOR  
WOMEN  
(Autonomous)**

**B.TECH. INFORMATION TECHNOLOGY**

**Regulations - 2019**

**CHOICE BASED CREDIT SYSTEM**

**COLLEGE VISION**

To impart value based education in Engineering and Technology to empower young women to meet the societal exigency with a global outlook

**COLLEGE MISSION**

- To provide holistic education through innovative teaching-learning practices
- To instill self confidence among rural students by supplementing with co-curricular and extra-curricular activities
- To inculcate the spirit of innovation through training, research and development
- To provide industrial exposure to meet the global challenges
- To create an environment for continual progress through lifelong learning

**DEPARTMENT VISION**

Providing quality education to transform students into technically competent skilled women to excel in IT profession, innovation and entrepreneurship

**DEPARTMENT MISSION**

- To empower knowledge on cutting-edge technologies in the field of Information Technology to develop innovative solutions for real-world problems
- To create a platform for innovation, research and new technology development

- To inculcate ethical practices, life-long learning and sense of societal responsibilities to support the career and personal development of the learner

### **PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):**

**PEO 1:** Graduates will have knowledge in various programming languages and continuous up-gradation in emerging IT technologies.

**PEO 2:** Graduates will be able to analyze and find solutions for current industrial needs.

**PEO 3:** Graduates will contribute to the society by their ethical behavior and effective teamwork

### **PROGRAMME SPECIFIC OUTCOMES (PSOs)**

<b>PSO1</b>	<b>Optimal Solution :</b> Graduates will be able to develop computer applications for the real life problem using suitable programming platform
<b>PSO2</b>	<b>Successful Career :</b> Graduates will be able to think innovatively and work on multi-disciplinary areas

### **PROGRAMME OUTCOMES (POs):**

Undergraduate engineering programmes are designed to prepare graduates to attain the following program outcomes:

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public

health and safety, and the cultural, societal, and environmental considerations

4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

### **Mapping of Program Educational Objectives with Program Outcomes**

A broad relation between the program objective and the outcomes is given in the following table

Programme Educational Objectives	Programme Outcomes											
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
<b>I</b>	√	√	√		√	√		√	√			
<b>II</b>		√		√			√	√	√	√		
<b>III</b>		√	√		√		√		√	√	√	√

### **Mapping of Courses with Program Outcomes**

### **PROFESSIONAL ELECTIVE COURSES : VERTICALS**

<b>Vertical I</b>  <b>NETWORKS</b>	<b>Vertical II</b>  <b>CYBER SECURITY</b>	<b>Vertical III</b>  <b>ARTIFICIAL INTELLIGENCE &amp; MACHINE LEARNING</b>	<b>Vertical IV</b>  <b>INTERNET OF THINGS &amp; CLOUD COMPUTING</b>	<b>Vertical V</b>  <b>EMERGING TECHNOLOGIES</b>
Mobile Adhoc Networks	Information Security	Advanced Database Systems	Embedded Systems	Design Thinking
Wireless Sensor Networks	Cyber Security	Data Science	Smart Sensor Technologies	Agile Methodologies
Distributed Systems	Cryptography and Network Security	Deep Learning	Security in Computing	Software Project Management
Green Computing	Cyber Law and Ethical Hacking	Natural Language Processing	Software Defined Networks	Blockchain Technology
Java Programming	Social Network Analysis	Soft Computing	Fundamentals of Virtualization	Total Quality Management
Network Programming	Semantic Web	Business Intelligence & Its Applications	Information Storage Management	Building Enterprise Applications
Service Oriented Architecture	Cyber Forensics	Digital Image Processing	Big Data Tools and Techniques	Internet Marketing and E-Commerce
Socket Programming	Biometrics Systems	Knowledge Management	Cloud Computing	Game Theory and its Applications

**Registration of Professional Elective Courses from Verticals:** Professional Elective Courses are listed in groups called verticals that represent a particular area of specialisation / diversified group. Students are permitted to choose all the Professional Electives from a particular vertical or from different verticals. Further, only one Professional Elective course shall be chosen in a semester horizontally (row-wise). However, two courses are permitted from the same row, provided one course is enrolled in Semester V to VIII. The registration of courses for B.E./B.Tech (Honours) or Minor degree shall be done from Semester V to VIII. The procedure for registration of courses explained above shall be followed for the courses of B.E/B.Tech (Honours) or Minor degree also.

Content of the syllabus			
Unit – I	DIFFERENTIAL CALCULUS	Periods	12
Limit, continuity, differentiability , rules of differentiation, differentiation of various functions, Rolle’s theorem(excluding proof), Mean value theorem(excluding proof), Taylor’s theorem(excluding proof), Maxima and Minima. Physical Applications (Newton’s law of cooling – Heat flow problems, Rate of decay of radioactive materials – Chemical reactions and solutions, Ohm’s law, Kirchoff’s law- Simple electric circuit problems)			
Unit - II	FUNCTIONS OF SEVERAL VARIABLES	Periods	12
Partial differentiation – Homogeneous functions and Euler’s theorem(excluding proof) – Total derivative – Change of variables – Jacobians – Partial differentiation of implicit functions – Taylor’s series for functions of two variables(excluding proof) – Maxima and minima of functions of two variables .			
Unit – III	INTEGRAL CALCULUS	Periods	12
Riemann integral- Fundamental theorem of calculus (excluding proof) - methods of integration (Integration by parts, Trigonometric integrals, Trigonometric substitutions, Integration of rational functions by partial fraction, Integration of irrational functions) -Reduction formula $\int_0^{\frac{\pi}{2}} \cos^n x dx, \int_0^{\frac{\pi}{2}} \sin^n x dx .$			
Unit - IV	MUTIPLE INTEGRALS	Periods	12
Double integrals – Change of order of integration – Double integrals in polar coordinates – Area enclosed by plane curves – Triple integrals – Volume of solids – Change of variables in double and triple integrals.			
Unit – V	ORDINARY DIFFERENTIAL EQUATIONS	Periods	12
Second order Linear ordinary differential equations with constant coefficients, Cauchy’s - Euler equations (excluding proof)- Legendre’s Linear differential equations(excluding proof) - Method of variation of parameters.			
Total Periods			60

<b>Objective</b>		The main objective of this course is to: <ul style="list-style-type: none"><li>• Make learners listen to audio files and replicate it in speaking contexts.</li><li>• Make learners read widely in order to practice writing</li><li>• Make learners develop vocabulary and strengthen grammatical understanding</li><li>• Assist students in the development of intellectual flexibility, creativity, and cultural literacy so that they may engage in life-long learning.</li><li>• Identify and begin to apply the language features of academic and professional writing and speaking</li></ul>												
<b>Outcomes</b>		The students who complete this course successfully are expected to:											KL	
		<b>CO1:</b> Speak adequately from the inputs they gained through listening.											K2	
		<b>CO2:</b> Write appropriately based on the knowledge gained through reading of a variety of materials											K3	
		<b>CO3:</b> Use language through their grammatical acquisition and their knowledge about using right word at the right context.											K3	
		<b>CO4:</b> Listen the accents and tones of the language properly.											K2	
<b>Pre-Requisites</b>		<b>CO5:</b> Comprehend and retain the contextual and syntax understanding from reading.											K4	
		Nil

Course Assessment Methods
1. Continuous Assessment Test I, II & III
2. Assignment
3. End-Semester examinations
1. Course - end survey

Content of the syllabus			
<b>Unit - I</b>		Periods	<b>9</b>
<b>Listening</b> -Introduction to Different Types of Listening, Listening to Casual Conversations, <b>Speaking</b> -Introduction to develop the Art of Speaking, Giving Self Introduction, <b>Reading</b> -Understanding the Basics of Reading Skills, Reading Instructions and Technical Manuals, <b>Writing</b> - Introduction to writing strategies, Writing Definitions, <b>Focus on Language</b> - -Technical terms (Jargon), Word Formation with Prefixes and Suffixes, Using Active Voice and Passive Voice, Basic sentence patterns, Tenses (past, present, perfect and continuous tenses).			
<b>Unit - II</b>		Periods	<b>9</b>
<b>Listening</b> - Listening to lectures, listening to description of equipment, <b>Speaking</b> - Strategies for Developing Conversational Skills, Short Conversations through Role Play Activities, <b>Reading</b> - Reading Comprehension, Reading e-mails, Reading Headlines, Predicting the Content, <b>Writing</b> - Note making, Writing Descriptions, <b>Focus on Language</b> -Collocations, Functional Use of Tenses, Subject - verb agreement			
<b>Unit - III</b>		Periods	<b>9</b>
<b>Listening</b> - Listening to different kinds of interviews (Face - to - face, radio, TV and telephone interviews), <b>Speaking</b> -Describing an Object, Asking Questions, Participating in Discussions <b>Reading</b> - Intensive reading, Reading passages for gist. <b>Writing</b> - Informal writing -short e-mails with emphasis on Brevity, Clarity, Coherence and Cohesion), <b>Focus on Language</b> -Sequential Connectives, Impersonal Passive			
<b>Unit - IV</b>		Periods	<b>9</b>
<b>Listening</b> -Note Taking, <b>Speaking</b> - Improving Fluency through Narration. <b>Reading</b> -Reading passages for specific information- Phone messages, Reading and Transferring Information. <b>Writing</b> - Effective writing strategies, Informal writing, Writing a Memo, <b>Focus on Language</b> - Pronunciation Practice (Phonetic sounds - Vowels, Consonants and Diphthongs), Cause and Effect, Conditional Statements (if - clauses and types), Usage of Modal Verbs.			
<b>Unit - V</b>		Periods	<b>9</b>
<b>Listening</b> - Listening to understand Modulation, Listening to Welcome Speeches, <b>Speaking</b> - Delivering Welcome Address, Understanding Segmental and Suprasegmental Features-Practicing Stress, Pause and Intonation, <b>Reading</b> - Reading for a purpose, Reading Business Documents, Interpreting Charts and Graphs,. <b>Writing</b> - Writing Business e-mails, Describing a Process. <b>Focus on Language</b> -Synonyms and Antonyms, Common Errors in English.			
			<b>Total Periods</b>
			<b>45</b>

Content of the syllabus			
<b>Unit – I</b>	<b>PROPERTIES OF MATTER</b>	Periods	<b>9</b>
<b>Elasticity:</b> Types of moduli of elasticity - Stress - Strain Diagram – uses. Young's modulus: Experimental determination by non-uniform bending - Twisting couple on a wire –Application: Torsional pendulum. <b>Viscosity:</b> Co-efficient of viscosity - Poiseuilles' formula - Experimental determination – uses.			
<b>Unit - II</b>	<b>ELECTRONS IN SOLID</b>	Periods	<b>9</b>
<b>Classical theory:</b> Classical free electron theory of metals- Expressions for electrical conductivity and Thermal Conductivity of metals – Wiedemann-Franz law (Qualitative) - Success and failures. <b>Quantum theory:</b> de Broglie's hypothesis - Schrodinger's time independent and time dependent wave equations (Qualitative) - Particle in a one-dimensional box- Fermi – Dirac Statistics - Density of energy states (Qualitative).			
<b>Unit – III</b>	<b>CRYSTAL PHYSICS AND ULTRASONICS</b>	Periods	<b>9</b>
Crystallography - Unit cell - Crystal systems - Bravais lattices- Lattice planes - Miller indices - Inter-planar spacing in cubic lattice- Calculation of number of atoms per unit cell- Atomic radius – Coordination number- Packing Factor for HCP structures. <b>Ultrasonics:</b> Introduction – Magnetostriction and Piezoelectric Oscillator methods – Applications: Sound Navigation and Ranging (SONAR), Non – Destructive Testing (NDT) and Sonogram.			
<b>Unit - IV</b>	<b>SEMICONDUCTING &amp; MODERN ENGINEERING MATERIALS</b>	Periods	<b>9</b>
<b>Intrinsic semiconductor:</b> (Qualitative only) – Carrier concentration – Fermi level – Electrical conductivity - Band gap determination. Extrinsic semiconductors: Carrier concentration in n – type and p – type semiconductor (Qualitative) – Variation of Fermi level with temperature. <b>Metallic glasses:</b> preparation, properties and applications - Shape memory alloys (SMA): Characteristics and applications of NiTi alloy.			
<b>Unit – V</b>	<b>LASER AND FIBER OPTICS</b>	Periods	<b>9</b>
<b>Laser:</b> Characteristics of laser –Derivation of Einstein's A and B coefficients. Types: Nd-YAG laser - Semiconductor laser: Homo junction - Applications. <b>Optical fiber:</b> Principle of propagation of light through optical fiber - Numerical aperture and acceptance angle (Qualitative)-Types of optical fibers -Fiber optical communication system (block diagram) -Application: Medical endoscope.			
<b>Total Periods</b>			<b>45</b>

**Course Assessment Methods**

1. Continuous Assessment Test I, II & III
2. Assignment
3. End-Semester examinations
1. Course - end survey

Content of the syllabus			
Unit – I	INTRODUCTION TO PROBLEM SOLVING	Periods	9
Basic Organization of Computer - Programming Languages- Flowchart – Pseudocode - Compilers- Interpreter-Algorithm - Building Blocks of Algorithm - Algorithmic Problem Solving-Simple Strategies for Developing Algorithms - Illustrative Problems: Find Minimum value from list of elements, Guess an Integer Number in a Range, Factorial of a given number.			
Unit - II	C PROGRAMMING	Periods	9
Introduction to C – Features - Data Types – Constants – Variables - I/O Statement - Operators – Expressions - Decision Making and Branching – Looping Statements - Break, Goto, Continue.			
Unit – III	ARRAYS AND POINTERS	Periods	9
Arrays: Concepts – Need – one dimensional array – array declaration – features – array initialization - Two- Dimensional Arrays- Multidimensional Arrays. Pointers: Introduction, pointer declaration-accessing variable through pointer-pointers and Arrays, Pointers and strings – Pointers structures-pointer Arithmetic - Array of Pointers – dynamic memory allocation.			
Unit - IV	FUNCTIONS AND STRINGS	Periods	9
Function: Introduction, function declaration, defining and accessing functions, User-defined Functions- storage classes-function prototypes-parameter passing methods-recursion. Strings: Concepts – Strings manipulation - String Input / Output Functions- Strings standard functions - Arrays of Strings.			
Unit – V	STRUCTURES AND UNIONS	Periods	9
Structures-Introduction- nested structures- Arrays of Structures - Structures and Functions - Pointers to Structures – Unions- Type Definition – Bitfields- Enumerated Types.			
Total Periods			45

Content of the Syllabus			
Concepts & Conventions( Not for Examination)	Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.	Periods	1
Unit – I	PROJECTION OF POINTS, LINES AND PLANE SURFACES	Periods	3+8
Introduction to Plane curves, Orthographic projection – principles – projection of points, straight lines (only first angle projections) and plane surfaces (polygonal and circular).			
Unit - II	PROJECTION OF SOLIDS	Periods	3+8
Projections of simple solids like prisms, pyramids, cylinder and cone when the axis is inclined to one reference plane.			
Unit - III	SECTION OF SOLIDS	Periods	3+8
Sectioning of solids - prisms, pyramids, cylinder and cone in simple vertical position by cutting planes inclined to one reference plane and perpendicular to the other - Obtaining true shape of section.			
Unit - IV	DEVELOPMENT OF SURFACES	Periods	3+8
Development of lateral surfaces of simple solids like prisms, pyramids, cylinders and cones – development of simple truncated solids involving prisms, pyramids, cylinders and cones.			
Unit - V	ISOMETRIC PROJECTIONS, ORTHOGRAPHIC VIEWS FROM PICTORIAL VIEWS	Periods	5+10
Isometric Projection and Introduction to AutoCAD / Solid Edge: Principles of isometric projection - Isometric scale -Isometric projections of simple solids like prisms, pyramids, cylinders and cones & orthographic views from pictorial views.			
Demonstration only: Computer Aided Drafting (Auto CAD / Solid Edge): Introduction to drafting packages and demonstration of their use.			
Total Periods			60

SUGGESTED LIST OF EXPERIMENTS	Course Outcome								
<p>1. Design an algorithm and flowchart using word processor that reads the customer number and power consumed and prints the amount to be paid by the customer. An electric power distribution company charges its domestic consumers as follows</p> <table> <thead> <tr> <th>Consumption Units</th><th>Rate of Charge</th></tr> </thead> <tbody> <tr> <td>0-200</td><td>Rs.0.50 per unit</td></tr> <tr> <td>201-400</td><td>Rs.100 plus Rs.0.65 per unit excess 200</td></tr> <tr> <td>401-600</td><td>Rs.230 plus Rs.0.80 per unit excess of 400</td></tr> </tbody> </table>	Consumption Units	Rate of Charge	0-200	Rs.0.50 per unit	201-400	Rs.100 plus Rs.0.65 per unit excess 200	401-600	Rs.230 plus Rs.0.80 per unit excess of 400	CO1
Consumption Units	Rate of Charge								
0-200	Rs.0.50 per unit								
201-400	Rs.100 plus Rs.0.65 per unit excess 200								
401-600	Rs.230 plus Rs.0.80 per unit excess of 400								
<p>2. Design an algorithm and flowchart for a simple calculator program using word processor for performing various arithmetic operations such as</p> <p>“+” - Addition  “-” - Subtraction  “*” - Multiplication  “/” - Division  “%” - Modulus</p>	CO2								
<p>3. Design and develop a C program to accept a number from the user and check whether it is a Palindrome or not.</p> <p>Palindrome number : (a number is a Palindrome which when read in reverse order is same as read in the right order)  Example: Palindrome  :11, 101, 151 Not a  Palindrome:123 , 100</p>	CO3								
<p>4. Develop a C program to find the sum of the digits of an integer and the number of digits in the integer that is given as input by the user.</p> <p>Test Case:  Sample  Input: 15390  Sample  Output:  Sum of the digits=18  No. of digits = 5  For an incorrect choice, an appropriate error message should be displayed.</p>	CO3								
<p>5. Develop a program to perform the following operations using two dimensional or multi-dimensional matrices:</p> <ol style="list-style-type: none"> <li>Addition of two matrices (3x3)</li> <li>Subtraction of two matrices (2x2)</li> <li>Multiplication of two matrices using dynamic memory allocation.</li> </ol>	CO3								
<p>6. Write a program to find the maximum and minimum element in a set of inputs using one dimensional array.</p>	CO3								

<p>7. Write a program to count the total number of vowels and consonants in a string. For example Input string: I am proud to be an Indian Output: Total vowels – 10 and Total consonants – 10</p> <p>8. Develop a program to perform the following string manipulations without using string functions:</p> <ul style="list-style-type: none"> <li>d. String copy</li> <li>e. String Concatenate</li> <li>f. String length</li> <li>g. String Compare</li> </ul> <p>9. The Fibonacci numbers are defined recursively as follows: <math>F_1=1</math> <math>F_2=1</math> <math>F_n = F_{n-1} + F_{n-2}, n &gt; 2</math> Write a function that will generate and print the first n Fibonacci numbers. Test the function for n=5,10,15</p> <p>10. Write a function using pointers to exchange the values stored in two locations in the memory. Test Case : Input : A=10 , B=-5 Output : A= -5 , B=10</p> <p>11. Develop a program to build a database of students with the following attribute: Roll no, Name, Course, Stream, Percentage, and Division. Take input for each student in all fields except division. Calculate division of each student such that those students having percentage <math>\geq 60\%</math> are belongs to first division. Similarly, for second and third division students having conditions <math>50 \% \leq \text{percentage} &lt; 60\%</math> and <math>35 \% \leq \text{percentage} &lt; 50\%</math> respectively. If any student has percentage less than 35% then write “fail” in division field. After building the database display the database of the students. Hint: create database using structure.</p>	<p><b>CO4</b></p> <p><b>CO4</b></p> <p><b>CO4</b></p> <p><b>CO4</b></p> <p><b>CO5</b></p>

<b>Indirect</b>			
1. Course - end survey			
<b>Content of the syllabus</b>			
Unit – I	<b>Introduction to Environmental Science and Engineering</b>	Periods	<b>9</b>
Nature and scope of environmental education- Natural Resources – (Forest, Water, Food, Energy & Land Resources) problems and remedial measures, Ecosystem and Biodiversity- Ecosystem-Structure, Characteristics and functions of ecosystem (in general)- Biodiversity – Definition – Conservation of Biodiversity (in-situ and Ex-situ)- Environmental awareness and sustainable development			
Unit – II	<b>Water pollution and Waste water treatment process.</b>	Periods	<b>9</b>
Water pollution-causes, effects and control measures of water pollution- case study- Waste water treatment process- Primary, Secondary, Tertiary and desalination-Water quality parameters- Hardness, Alkalinity, DO, COD, BOD-Water quality standard- WHO and BIS.			
Unit – III	<b>Air Pollution and its Control</b>	Periods	<b>9</b>
Air pollution-Types of Air Pollutants- CO <sub>2</sub> , SO <sub>2</sub> , NO <sub>2</sub> , PAN etc Sources- causes, effects (Acid rain, use eGreen hocket, Ozone layer depletion and global warming)- control measures (Electro static precipitator, Gravitational settling chamber, Baghouse filter, Wet Scrubber and cyclone separator).			
Unit – IV	<b>Radioactive Pollution and Solid waste management</b>	Periods	<b>9</b>
Radio active pollutants-sources, effects , Nuclear Energy – Nuclear Fusion –Nuclear Fission-Nuclear power plant- Light water nuclear power plant- Diagram- illustration-working – pollution- impacts-and control measures- case study- solid waste-definition- Types of solid waste- Disposal method and its problem in solid waste management- Significance for prevention of hazardous waste management.			
Unit – V	<b>Human population and the Environment</b>	Periods	<b>9</b>
Population growth, Human rights, Value education, environment and Human health, Family welfare Program, Women and Child welfare, Role of information technology in environment – Satellite, Data base, Geographical Information System (GIA), Environmental impact Analysis (EIA) and Human health.

Content of the syllabus			
Unit – I	MATRICES	Periods	12
Characteristic equation – Eigen values and Eigenvectors of a real matrix– Properties of Eigen values and Eigenvectors – Cayley-Hamilton theorem(excluding proof) – Diagonalization of matrices – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms. Simple application in encoding message using 2×2 matrix. Simple application in encoding message using 2×2 matrix.			
Unit - II	VECTOR DIFFERENTIAL CALCULUS	Periods	12
Vector Differentiation: Vector and Scalar Functions- Derivatives- Curves, Gradient of a Scalar Field-Directional Derivative -Divergence of a Vector Field - Curl of a Vector Field – Tangents and Normals.			
Unit – III	VECTOR INTEGRAL CALCULUS	Periods	12
Line, Surface and Volume integrals, Green’s theorem in a plane(excluding proof), Gauss Divergence theorem(excluding proof), Stokes theorem (Excluding proof) - simple applications involving rectangular parallelepipeds and spheres.			
Unit - IV	ANALYTIC FUNCTIONS	Periods	12
Analytic functions – Necessary and sufficient conditions for analyticity in Cartesian and polar coordinates - Properties – Harmonic conjugates – Construction of analytic function - Conformal mapping – Mapping by functions $c+z$ , $cz$ , $1/z$ and Bilinear transformation.			
Unit – V	LAPLACE TRANSFORMS	Periods	12
Existence conditions – Transforms of elementary functions – Transform of unit step function and unit impulse function – Basic properties – Shifting theorems(excluding proof) -Transforms of derivatives and integrals – Initial and final value theorems(excluding proof) – Inverse transforms – Convolution theorem(excluding proof) – Transform of periodic functions – Application to solution of linear second order ordinary differential equations with constant coefficients.			
Total Periods			60

<b>U19EN202</b>	<b>English for Communication - II</b>	3	0	0	3	40	60	100																																																																																																																													
<b>Course Objective</b>	The main objective of this course is to:																																																																																																																																				
	<ul style="list-style-type: none"><li>• Provide suitable listening tasks to develop communicative ability for academic and professional progress</li><li>• Inculcate channelized reading to make learners proficient in the chosen professional writing contexts.</li><li>• Improve learners' vocabulary and grammar to supplement their language use at professional contexts</li><li>• Assist students in the development of intellectual flexibility, creativity, and cultural literacy so that they may engage in life-long learning.</li><li>• Identify and begin to apply the language features of academic and professional writing and speaking</li></ul>																																																																																																																																				
<b>Course Outcomes</b>	The students who complete this course successfully are expected to:											KL																																																																																																																									
	<b>CO1:</b> Acquire sufficient command over language to speak at an academic or professional context through continuous exposure to similar listening tasks.											K2																																																																																																																									
	<b>CO2:</b> Write technically well at a professional contexts through exposing them to similar readings.											K3																																																																																																																									
	<b>CO3:</b> Use language at length at technical and professional situations through the enrichment of vocabulary and strengthening of grammatical knowledge.											K3																																																																																																																									
	<b>CO4:</b> Students should be able to ethically gather, understand, evaluate and synthesize information from a variety of written and electronic sources.											K2																																																																																																																									
	<b>CO5:</b> Students should be proficient in oral communication and writing.											K4																																																																																																																									
<b>Pre-requisites</b>	Nil

Course Assessment Methods			
<b>Direct</b>			
1. Continuous Assessment Test I, II & III			
2. Assignment			
3. End-Semester examinations			
<b>Indirect</b>			
1. Course – end survey			
Content of the syllabus			
Unit - I		Periods	9
<b>Listening-</b> Listening for Cultural Awareness, Listening to Professional Conversations, Talks, Interviews and Lectures <b>Speaking-</b> Developing Confidence to get rid of Fear on the Dias, Discussion at a Corporate Context. <b>Reading-</b> Inferential Reading, Reading Short Messages and Technical Articles, <b>Writing-</b> Introduction to Letter Writing, Writing Formal and Informal Letters, Thanking Letters, Letters Calling for Quotations, Letters Placing an Order, Seeking clarification, Letters of Complaint. <b>Focus on Language-</b> Adjectives and Degrees of Comparisons			
Unit - II		Periods	9
<b>Listening-</b> Listening to specific information relating to technical content, Listening for statistical information <b>Speaking-</b> Expressing opinions, Formal Discussions, Describing Role Play at Business Context and Consolidating Ideas. <b>Reading-</b> Reading Technical Articles in Journals and Comparing Articles. <b>Writing-</b> Letter seeking permission to undergo practical training and to undertake project work. <b>Focus on Language-</b> Simple, compound and complex sentences and Transformation of Sentences.			
Unit - III		Periods	9
<b>Listening-</b> Listening to understand the overall meaning, Listening to Interviews and Presentations. <b>Speaking-</b> Giving Instructions and Showing Directions and Rephrasing Instructions. <b>Reading-</b> Skimming and Scanning, Reading Job Advertisements. <b>Writing-</b> Applying for a Job, Writing a CV. <b>Focus on Language-</b> Pronouns, Phrasal verbs, Restrictive and Non - restrictive clauses.			
Unit - IV		Periods	9
<b>Listening-</b> Listening and retrieving Information. <b>Speaking-</b> Developing fluency and Coherence, Accent Neutralization, Voice Modulation, and Intonation, Improving Voice Quality. <b>Reading-</b> Reading and understanding Advertisements. <b>Writing-</b> Letters to the Editor, Letter of Complaint, Various kinds of Reports, Permission to go for Industrial visits. <b>Focus on Language-</b> Countable, Uncountable nouns, Recommendations, Discourse Markers and Comparative and Contrastive Connectives, Imperatives.			
Unit - V		Periods	9
<b>Listening-</b> Listening to Fragmented Texts and Filling in the Blanks. <b>Speaking-</b> Mind Mapping, Developing Coherence and Self-Expression, Making presentations, Paralinguistic and Extra linguistic Features (body language), <b>Reading-</b> Predicting content, Interpreting Reports. <b>Writing-</b> Writing Proposals, Agenda, Minutes of the Meeting. <b>Focus on Language-</b> British and American Vocabulary, Editing, Error Detection, and Punctuation.			
		Total Periods	45

U19CH207	Engineering Chemistry	3	0	0	3	40	60	100									
Course Objective	The main objective of this course is to:																
	<ul style="list-style-type: none"><li>Recognize the basic technology requirements in water treatment</li><li>Gain knowledge in Polymeric materials towards engineering applications.</li><li>Enrich the Knowledge of the students with the basics of Nano materials, their properties and applications.</li><li>Familiarize about the renewable energy and different types of batteries in the engineering application.</li><li>Gain knowledge in destruction of metals and protection for engineering applications.</li></ul>																
	The students who complete this course successfully are expected to:																
	KL																
	CO1: Implement innovative solutions in wastewater treatment process.																
	K3																
Course Outcomes	CO2: Identify the applications of a specific polymer in the field of engineering.																
	K2																
	CO3: Forecast the information of Nano particles and their industrial applications																
	K2																
	CO4: Recognize the renewable energy devices for sustainable energy.																
K3																	
Pre-Requisites	CO5: Identify the rate of corrosion of a metal in a given environment and find out appropriate control techniques to avoid corrosion.																
	K3

<b>Content of the syllabus</b>			
<b>Unit - I</b>	<b>WATER TECHNOLOGY</b>	<b>Periods</b>	<b>9</b>
Introduction-Sources and impurities in Water, Soft and Hard water, Water quality parameters, Types of Hardness – Determination of Hardness by EDTA method, Domestic Water Treatment. Boiler Feed Water –Requisites, Problems due to hard water in boilers - Scale and Sludge formation in boilers-Caustic Embrittlement-Boiler corrosion, Treatment of boiler feed Water – Internal conditioning (Carbonate, Phosphate, and Calgon conditioning) External conditioning – Ion exchange process, Zeolite process, Brackish water –Water purification by Reverse osmosis.			
<b>Unit - II</b>	<b>POLYMER CHEMISTRY</b>	<b>Periods</b>	<b>9</b>
Introduction - Occurrence, definitions – Functionality - Degree of Polymerization, Classification of polymers – structure (Linear, Branched & network polymer structure) block, random & graft copolymers, properties of polymers, Tacticity, Tg, molecular weight - number and weight average method. Types of polymerizations: Addition, condensation and copolymerization. Mechanism of polymerization: Addition - Free radical, cationic and anionic polymerization). Preparation, properties and applications of PE, PMMA, PC, nylon6, nylon 66, PET, and Bakelite.			
<b>Unit - III</b>	<b>NANO CHEMISTRY</b>	<b>Periods</b>	<b>9</b>
Basics- distinction between molecules, nanoparticles and bulk materials; size dependent properties. Nanoparticles: nanocluster, nanorod, nanotube (CNT) and nanowires. Synthesis: Sol-gel, Precipitation, Thermolysis - hydrothermal, solvothermal, Electro deposition, Spray Pyrolysis, Chemical Vapour deposition, Laser ablation; Properties and applications of nano materials in medical and electronic devices.			
<b>Unit - IV</b>	<b>RENEWABLE ENERGY AND STORAGE DEVICES</b>	<b>Periods</b>	<b>9</b>
Renewable energy and its sources - Solar Energy - Photo voltaic cells, Importance of Solar cells - p-n junctions in Solar cells - Working of Photovoltaic cell, Recent advances in solar cell materials, Wind energy - Types of Wind Power Plants (WPPs), Components and working of WPPs, Tidal energy - Types of Tidal power plants (TPPs), Barrage and Non-Barrage Tidal power systems. Batteries and fuel cells: Types of batteries - Dry cells-Alkaline battery, lead storage battery, Ni-Cd battery, lithium battery, Fuel cell - H <sub>2</sub> -O <sub>2</sub> fuel cell-applications.			
<b>Unit - V</b>	<b>CORROSION AND ITS CONTROL</b>	<b>Periods</b>	<b>9</b>
Introduction, Types of corrosion - chemical and electrochemical corrosion, mechanism, Pilling - Bedworth rule, Types of electrochemical corrosion – Galvanic corrosion, Pitting corrosion, Crevice corrosion, Corrosion on wire fence and Pipeline corrosion, Factors influencing rate of corrosion, corrosion control methods – Sacrificial anode and impressed cathodic current. Protective coatings – Paints: constituents and functions, Metallic coatings - steps involved in cleaning the surface for Electroplating, Electroplating (Au), Electro less plating (Ni).			
<b>Total Periods</b>			<b>45</b>

Content of the syllabus			
Unit – I	INTRODUCTION OF ELECTRICAL CIRCUITS	Periods	9
Definition of Voltage, Current, Power, Energy, Power factor, Circuit parameters, Ohm’s law, Kirchoff’s law. Concepts of AC Circuits- RMS value, Average value, Form and Peak factors, Concept of real and reactive power. Introduction to three phase systems - types of connections, relationship between line and phase values. Concept ofDC circuits			
Unit - II	INTRODUCTION OF ELECTRICAL MACHINESAND MEASUREMENTS	Periods	9
Faraday’s laws of electromagnetic induction - Lens law - Fleming's left hand rule and Righthand rule. Working principle and construction of AC and DC machines -Working principle and construction of Transformer- Introductionto electrical measuring instruments – Analog and Digital Instruments (Qualitative)			
Unit– III	WIRING AND ILLUMINATION	Periods	9
Types of wiring-staircase and corridor wiring - wiring accessories. Different types of safety measures - Earthing. Electrical tariff - Energy conservation. Simple layout of power system-various energy resources,. The Laws ofIllumination - Different types of electrical lamps.			
Unit - IV	SEMICONDUCTOR DEVICES	Periods	9
PN junction diodes - Zener diodes - characteristics. Transistors: PNP and NPN transistors - Theory of operation - Transistor configurations -characteristics - comparison. Special semiconductor devices: FET - SCR - LED – V-I characteristics –UPS – SMPS.			
Unit – V	DIGITAL FUNDAMENTALS	Periods	9
Number systems - Boolean Theorems – De Morgan's Theorem - Logic gates -Implementation of Boolean Expressionusing Gates - Introduction to Operational Amplifier.			
Total Periods			45

<b>Content of the Syllabus</b>			
<b>Unit – I</b>	<b>CIVIL ENGINEERING MATERIALS AND SURVEYING</b>	<b>Periods</b>	<b>9</b>
<b>Civil Engineering Materials:</b> Bricks – Stones – Sand – Cement – Concrete – Steel sections. <b>Surveying:</b> Introduction to Surveying & Leveling.			
<b>Unit - II</b>	<b>BUILDING COMPONENTS AND STRUCTURES</b>	<b>Periods</b>	<b>9</b>
<b>Foundations:</b> Site selection, Foundation – Types – Requirement of good foundations. <b>Superstructure:</b> Brick masonry – Stone masonry – Beams – Columns – Lintels – Roofing – Flooring - Plastering.			
<b>Unit - III</b>	<b>POWER PLANT ENGINEERING</b>	<b>Periods</b>	<b>9</b>
Introduction, Classification of Power Plants – Boiler - Working principle of steam , Gas , Diesel , Hydro-electric, Solar, Wind and Nuclear Power plants – Merits and Demerits – Pumps and turbines – Working principle of reciprocating pumps (single acting and double acting) – Centrifugal Pump.			
<b>Unit - IV</b>	<b>IC ENGINES AND AUTOMOTIVE VEHICLES</b>	<b>Periods</b>	<b>9</b>
Internal combustion engines as automotive power plant – Four stroke and two stroke cycles – Working of SI and CI engines - Comparison of four stroke and two stroke engines - Introduction to Electric vehicles.			
<b>Unit - V</b>	<b>REFRIGERATION AND AIR CONDITIONING SYSTEM</b>	<b>Periods</b>	<b>9</b>
Terminology of refrigeration and air conditioning. Principle of vapour compression and vapour absorption refrigeration system – Layout of typical domestic refrigerator – Window and split type room air conditioner.			
<b>Total Periods</b>			<b>45</b>

<b>Course Objective</b>	The main objective of this course is to:														
	<ul style="list-style-type: none"><li>Understand the OOP concepts using Classes, Objects and Pointers to Objects in C++</li><li>Learn the concepts of Memory allocation using constructors and Operator overloading</li><li>Learn the different types of Member functions, Templates and handling Exceptions</li><li>Understand the levels of Inheritance, concepts of Streams and File handling methods</li><li>Learn the fundamentals of Java, Inheritance and Exception Handling in Java</li></ul>														
	At the end of the course, the student should be able to,												Knowledge Level		
	<b>CO1:</b> Analyze the OOP concepts using C++ programming language.												K3		
	<b>CO2:</b> Implement OOP concepts such as Encapsulation, Data abstraction and Polymorphism through C++ Classes and Objects												K4		
	<b>CO3:</b> Implement OOP concepts such as Message Passing using Member functions, Data hiding using Templates and to handle various exceptions												K4		
<b>Course Outcome</b>	<b>CO4:</b> Implement Inheritance and develop C++ programs using the streams and member functions to enable File Handling.												K4		
	<b>CO5:</b> Develop Java Programs to Implement Inheritance using Overriding and Exception Handling using try-catch blocks.												K3		
	<b>CO / PO Mapping</b> (3/2/1 indicates strength of correlation) 3-Strong, 2 – Medium, 1 - Weak												<b>CO/PSO Mapping</b>

1. Course - end survey	

Content of the syllabus			
Unit – I	INTRODUCTION	Periods	10
Object oriented approach - Characteristics of Object-oriented languages – C++ Programming basics – Loops and Decisions – Structures - Objects and Classes: A Simple class – C++ objects as physical objects – Classes, Objects and Memory – Static Class data – Const and classes- Pointers: Memory management – Pointers to objects- Pointers to Pointers.			
Unit - II	CONSTRUCTORS AND OPERATOR OVERLOADING	Periods	8
Constructors – Objects as Function Arguments - Default Copy Constructor –Assignment and Copy Initialization -Returning Objects – Operator Overloading: Unary Operators – Binary Operators – Data Conversion – Pitfalls.			
Unit – III	FUNCTIONS, TEMPLATES AND EXCEPTIONS	Periods	8
Simple Functions – Passing Arguments – Returning Values – Reference Arguments – Default Arguments – Overloaded Functions – Inline Functions – Friend functions - Variables and Storage Classes – Function Templates – Class Templates – Exceptions			
Unit - IV	INHERITANCE, STREAMS AND FILES	Periods	10
Inheritance: Derived and Base Classes – Derived class Constructors – Overriding member functions – Class hierarchy – Public and Private Inheritance – Levels of Inheritance – Multiple Inheritance – Ambiguity - Virtual Functions – Static functions- this pointer. Stream Classes – Stream Errors – Disk File I/O wit streams – File pointers –Error Handling in File I/O – File I/O with member functions			
Unit – V	INTRODUCTION TO JAVA PROGRAMMING	Periods	9
Overview of Java - Data Types, Variables, and Arrays - Operators - Control Statements - Introducing Classes - Methods and Classes. Inheritance: Basics - Using Super – Creating a Multilevel Hierarchy - Method overriding – Using Abstract Classes. Exception Handling: Types - Try and Catch - Throw - Finally – User defined exceptions			
Total Periods			45

U19TA201	தமிழ் மரபு / Heritage of Tamils	2	0	0	1	40	60	100	
Content of the syllabus									
UNIT I	LANGUAGE AND LITERATURE				Periods	3			
Language Families in India – Dravidian Languages – Tamil as a Classical Language – Classical Literature in Tamil –Secular Nature of Sangam Literature – Distributive Justice in Sangam Literature – Management Principles in Thirukural-Tamil Epics and Impact of Buddhism & Jainism in Tamil Land – Bakthi Literature Azhwars and Nayanmars –Forms of minor Poetry – Development of Modern literature in Tamil – Contribution of Bharathiyar and Bharathidhasan.									
UNIT II	HERITAGE – ROCK ART PAINTINGS TO MODERN ART – SCULPTURE				Periods	3			
Herostone to modern sculpture – Bronze icons – Tribes and their handicrafts – Art of temple carmaking –Massive Terracotta sculptures Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments -Mridhangam, Parai Veenai, Yazh and Nadhaswaram – Role of Temples in Social and Economic Life of Tamils.									
UNIT III	FOLK AND MARTIAL ARTS				Periods	3			
Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leather puppetry, Silambattam, Valari, Tiger dance – Sports and Games of Tamils.									
UNIT IV	THINAI CONCEPT OF TAMILS				Periods	3			
Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature – Aram Concept of Tamils – Education and Literacy during Sangam Age – Ancient Cities and Ports of Sangam Age –Export and Import during Sangam Age – Overseas Conquest of Cholas.									
UNIT V	CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE				Periods	3			
Contribution of Tamils to Indian Freedom Struggle – The Cultural Influence of Tamils over the other parts of India.- Self-Respect Movement –Role of Siddha Medicine in Indigenous Systems of Medicine-Inscriptions & Manuscripts – Print History of Tamil Books.

U19CH208	CHEMISTRY LABORATORY				0	0	4	2	60	40	100					
Objective	The main objective of this course is to: <ul style="list-style-type: none"><li>• Gather basic simple acid-base reactions and study the mechanism of acid mixture with base.</li><li>• Learn pH and potential of hydrogen in a sample solution.</li><li>• Study the redox reaction through potential difference.</li><li>• Quote iron forms complex with thiocyanate.</li><li>• Gather knowledge on hardness producing salts and removal of hardness through estimation.</li><li>• Collect data required for dissolved oxygen present in water sample.</li><li>• Understand alkalinity and available chlorine present in water sample.</li></ul>															
Outcomes	The students who complete this course successfully are expected to:											Knowledge Level				
	CO1: Infer knowledge on neutralization reaction between acid, acid mixture with base and identify the concentrations.											K3				
	CO2: Spot the concentration of sample solution through potential of hydrogen and redox reaction.											K3				
	CO3: Estimate Iron by complexation reaction spectrometrically.											K5				
	CO4: Determine hardness and dissolved oxygen present in domestic water supply.											K5				
	CO5: Identify alkalinity and available chlorine present in the given sample.											K5				
Pre-requisites	Nil

**LIST OF EXPERIMENTS**

1.Estimation of HCL using NaOH by Conductometric titration	CO1
2. Estimation of Mixture of acid using NaOH by Conductometric titration.	CO1
3. Estimation of Barium chloride using sodium sulphate by Conductometric precipitation titration	CO1
4. Estimation of ferrous iron by Potentiometric titration.	CO2
5. Determination of HCL using NaOH by pH metry	CO1
6.Estimation of Ferric ion by Spectrophotometry	CO3
7. Determination of Total, temporary and permanent hardness of water by EDTA method.	CO4
8. Estimation of Dissolved Oxygen content in water by Winkler's method	CO4
9. Estimation of alkalinity in water sample.	CO5
10. Estimation of available chlorine in bleaching powder.	CO5
<b>Total Periods</b>	<b>45</b>

**Lab Manuals suggested:**

1.	Chemistry laboratory I & II by Dr.A.Ravikrishnan,Sri Krishna Pub,Revised Edition-2017
2.	Chemistry laboratory Manual by Dr.Veeraian, Revised Edition-2017

<b><u>GROUP A</u></b> <b>(CIVIL &amp; MECHANICAL ENGINEERING)</b> <b><u>(CIVIL ENGINEERING PRACTICE)</u></b>	
<b>Plumbing :</b> 1. Study of pipeline joints, its location and functions: valves, taps, couplings, unions, reducers and elbows in household fittings.	CO2
2. Hands-on-exercise: Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components	CO2
<b>Carpentry:</b> 3. Study of the joints in roofs, doors, windows and furniture.	CO2
4. Hands-on-exercise: Wood work, joints by sawing, planning and cutting.	CO2
<b><u>MECHANICAL ENGINEERING PRACTICE</u></b>	
<b>Welding:</b> 5. Preparation of arc welding of butt joints, lap joints and tee joints.	CO1
6. Gas welding practice	CO1
<b>Basic Machining:</b> 7. Turning and Facing.	CO1
8. Drilling Practice	CO1
<b>Sheet Metal Work:</b> 9. Forming & Bending	CO1
10. Model making – Tray and Basket.	CO1
<b>Demonstration on:</b> (a) Foundry operations like mould preparation for gear and step cone pulley. (b) Fitting – Exercises – Preparation of square fitting and vee – fitting models. <b>Study of Air Conditioner &amp; Centrifugal Pump.</b>	
<b><u>GROUP B (ELECTRICAL &amp; ELECTRONICS ENGINEERING)</u></b> <b><u>III. ELECTRICAL ENGINEERING PRACTICE</u></b>	
1. Residential house wiring and stair case wiring using switches, fuse, indicator & lamp.	CO3
2. Fluorescent lamp wiring.	CO3
3. Measurement of voltage, current, power & power factor using R-Load.	CO3
4. Measurement of energy using single phase meter.	CO3
5. Measurement of resistance to earth of electrical equipment.	CO3
6. Measurement of illumination to earth of electrical equipment.	CO3
7. Study of batteries.	CO3
<b><u>IV. ELECTRONICS ENGINEERING PRACTICE</u></b>	
1. Study of Electronic components and equipments – Resistor, colour coding.	CO4
2. Study of logic gates AND, OR, NOR, NAND and NOT.	CO4
3. Generation of Clock Signal.	CO4

4. Soldering practice – Components Devices and Circuits – Using general purpose PCB.		CO5
Total Periods		45

Content of the syllabus			
Unit – I	PROPOSITIONAL CALCULUS	Periods	12
Propositions – Logical connectives – Compound propositions – Conditional and biconditional propositions – Truth tables – Tautologies and contradictions – Contrapositive – Logical equivalences and implications – DeMorgan’s Laws – Normal forms – Principal conjunctive normal form and Principal disjunctive normal form – Rules of inference – Arguments – Validity of arguments.			
Unit - II	PREDICATE CALCULUS	Periods	12
Predicates – Statement function – Variables – Free and bound variables – Quantifiers – Universe of discourse – Logical equivalences and implications for quantified statements – Theory of inference – Rules of universal specification and generalization – Validity of arguments.			
Unit – III	SET THEORY	Periods	12
<b>Set Theory:</b> Cartesian product of sets – Relations on sets – Types of relations and their properties – Matrix representation of a relation - Graph of a relation – Equivalence relations – Partial ordering – Poset – Hasse diagram – Lattices – Properties of lattices			
Unit - IV	FUNCTIONS	Periods	12
Definition – Classification of functions – Composition of functions – Inverse functions – Characteristic function of a set – Recurrence relations – Solution of recurrence relations – Generating Functions – Solving recurrence relation by generating functions.			
Unit – V	GROUP THEORY	Periods	12
Algebraic systems – Definitions – Examples – Properties – Semi groups – Monoids – Sub semi groups and Sub monoids - Groups and Subgroups – Homomorphism – Cosets – Lagrange,,s theorem – Normal subgroups – Normal algebraic system with two binary operations.			
Total Periods			60

3. End-Semester examinations			
<b>Indirect</b>			
1. Course - end survey			
<b>Content of the syllabus</b>			
<b>Unit – I</b>	<b>SEMICONDUCTOR DIODE</b>	Periods	<b>9</b>
Theory of PN junction diode –VI characteristics - Switching characteristics – Temperature effects– Breakdown in PN Junction Diodes– Ideal Versus Practical diode-Resistance levels– Diode equivalent circuits – Transition and diffusion capacitances– Diode specifications–Zener diode and its characteristics.			
<b>Unit - II</b>	<b>BIPOLAR JUNCTION TRANSISTOR</b>	Periods	<b>9</b>
Introduction to three terminal devices- BJT-construction - Types and different regions of operations- Transistor (BJT) as an amplifier-- Input and Output characteristics of transistor in Common Base,Common Emitter and Common Collector configuration,Comparison of CE,CC and CB.			
<b>Unit – III</b>	<b>FIELD EFFECT TRANSISTOR</b>	Periods	<b>9</b>
Construction and characteristics of JFET– Transfer characteristics – FET Parameters and specifications– Depletion type MOSFET – Enhancement type MOSFET –FET in CS, CD and CG Configurations –FET applications,Comparison of MOSFET with JFET.			
<b>Unit - IV</b>	<b>SPECIAL SEMICONDUCTOR DEVICES</b>	Periods	<b>9</b>
Tunnel diodes – PIN diode – SCR characteristics and two transistor equivalent model – UJT – Diac and Triac – Laser- CCD- Photodiode-Phototransistor- Photoconductive and Photovoltaic cells – LED- LCD.			
<b>Unit – V</b>	<b>POWER SUPPLIES</b>	Periods	<b>9</b>
Half wave Rectification – Full wave Rectification – Filters(LPF) – Zener diode as voltage regulator –Discrete Transistor Voltage Regulation - IC Voltage Regulator - SMPS.			
<b>Total Periods</b>		<b>45</b>

3. End-Semester examinations			
Indirect			
1. Course - end survey			
Content of the syllabus			
Unit – I	DATA COMMUNICATIONS AND NETWORKING OVERVIEW	Periods	10
A Communications Model, Introduction to Data Communications, types of Networks, Protocol Architecture: Need, A Simple Protocol Architecture, OSI. Analog and Digital Data Transmission - Transmission Impairments, Channel Capacity. Transmission Media: Guided Transmission Media, Wireless Transmission media.			
Unit - II	DIGITAL SIGNAL TRANSMISSION	Periods	9
Digital Transmission: Introduction, Digital to digital conversion: Line Encoding - Types of Line Coding Unipolar scheme, Polar schemes, Biphasic: Manchester and differential Manchester Bipolar schemes, Scrambling. Analog to Digital Conversion: Pulse code modulation (PCM), Delta modulation (DM).			
Unit – III	ANALOG SIGNAL TRANSMISSION	Periods	9
Analog Transmission: Introduction, Digital to analog conversion: Amplitude shift keying, Frequency shift keying, Phase shift keying, Quadrature amplitude modulation. Analog to analog conversion: Amplitude modulation, Frequency modulation, Phase modulation			
Unit – IV	DATA LINK CONTROL & SWITCHING NETWORKS	Periods	10
Asynchronous and Synchronous Transmission, Types of Errors, Error Detection, Error Correction. Introduction, Circuit Switching Networks, Circuit Switching Concepts, Packet Switching Principles, X.25, Frame Relay			
Unit – V	INTRODUCTION TO NETWORKING DEVICES	Periods	7
Hub, Switches, Bridges , Routers, Gateways, Channel Service Unit/Data Service Unit, Network Interface Card, ISDN adapters, Wireless Access Point, Modems, Transceivers, Firewalls.			
Total periods			45

Content of the syllabus			
Unit – I   INTRODUCTION		Periods	9
Fundamental ADTs — Singly Linked List – Simple Array based Implementation - Circular Linked List – DoublyLinked List – Applications of Linked Lists			
Unit - II   STACKS, QUEUES AND DEQUES		Periods	9
Stack ADT – Array based Implementation - List based Implementation – Queue ADT – Array based Implementation- List based Implementation - Parsing Arithmetic Expressions. Deque ADT – Implementation.			
Unit – III   SORTING, SEARCHING AND HASHING		Periods	9
Types of Sorting - Bubble Sort – Selection Sort – Insertion Sort – Shell Sort – Quick Sort – Radix Sort – Merge Sort. Linear Search – Binary Search. Hashing – Open Addressing – Separate Chaining – Hash Functions.			
Unit - IV   TREES		Periods	9
Tree ADT – Binary Trees – Terminologies- Array based Implementation - List based Implementation – TraversalAlgorithms. Search Trees – Binary Search Tree – Balancing Trees – AVL Tree – Splay Tree.			
Unit – V   GRAPHS		Periods	9
Graph ADT – Data Structures for Graphs – Types of Graphs – Graph Traversals – Topological Ordering – Weighted Graphs – Dijkstra’s Algorithm – Minimum Spanning Tree – Prim-Jarnik Algorithm – Kruskal’s Algorithm.			
Total Periods			45

<b>U19IT304</b>	<b>Computer Organization &amp; Architecture</b>	3	0	0	3	40	60	100						
<b>Course Objective</b>	The main objective of this course is to:													
	• Understanding of the basic structure and operation of a digital computer.													
	• Recognize in the operation of the hardware control and micro programmed control.													
	• Illustrate in detail the different types of control and the concept of pipelining.													
	• Classify the hierarchical memory system including cache memories and virtual memory.													
	• Clarify the different ways of communicating with I/O devices and standard I/O interfaces.													
<b>Course Outcome</b>	At the end of the course, the student should be able to,										KL			
	<b>CO1:</b> Design the concepts in modern computer architecture.										K3			
	<b>CO2:</b> Interpret the operations and instruction sequences in a basic computer.										K3			
	<b>CO3:</b> Illustrate the data hazards and instruction hazards using pipelining										K3			
	<b>CO4:</b> Examine the hierarchical memory system including cache memory and virtual memory										K3			
	<b>CO5:</b> Inspect the different ways of communicating with I/O devices and standard I/O also demonstrate the memory functioning and DMA Controller.										K3

Content of the syllabus			
Unit – I	BASIC STRUCTURE OF COMPUTERS	Periods	9
Functional units –Basic operational concepts –Bus structures –Software Performance and metrics –Multiprocessors and Multicomputer –Memory Locations and Addresses–Instructions and instruction sequencing –Addressing modes –Fixed point and Floating point representations.			
Unit - II	BASIC PROCESSING UNIT	Periods	9
Fundamental concepts –Execution of a complete instruction –Multiple bus organization –Hardwired Control –Micro programmed control: Micro Instructions-Micro Instructions with next address field.			
Unit – III	PIPELINING	Periods	9
Basic concepts –Data hazards –Instruction hazards –Influence on instruction sets –Data path and control considerations –Super scalar operation–Performance considerations.			
Unit - IV	MEMORY SYSTEM	Periods	9
Basic concepts –Semiconductor RAM –ROM –Speed Size and cost –Cache memories – performance consideration –Virtual memory –Memory management requirements – Associative memories –Secondary storage devices.			
Unit – V	I/O ORGANIZATION	Periods	9
I/O devices -Accessing I/O devices –Programmed Input/output –Interrupts –Direct Memory Access – Buses –Interface circuits –Standard I/O Interfaces (PCI, SCSI, and USB)–processor Families.			
Total Periods			45
Case Studies: Case study - Instruction sets of some common CPUs, A Recent Intel Processor, A case study on ALU- Arithmetic and Logic Unit of the computer and IBM5 SYSTEM/360-370 Architecture.

Content of the syllabus			
Unit – I	HUMAN VALUES	Periods	9
Morals, values and Ethics – Integrity – Work ethic – Service learning – Civic virtue – Respect for others – Living peacefully – Caring – Sharing – Honesty – Courage – Valuing time –Cooperation – Commitment – Empathy – Self-confidence – Character – Spirituality – Introduction to Yoga and Meditation for professional excellence and stress management.			
Unit – II	ENGINEERING ETHICS	Periods	9
Introduction to engineering ethics-Senses of „Engineering Ethics“ – Variety of moral issues – Types of inquiry – Moral dilemmas – Moral Autonomy – Kohlberg’s theory – Gilligan’s theory – Consensus and Controversy – Professions and Professionalism – Professional Ideals and Virtues – Uses of Ethical Theories			
Unit – III	ENGINEERING AS SOCIAL EXPERIMENTATION	Periods	9
Engineering as Experimentation – Engineers as responsible Experimenters – Research Ethics - Codes of Ethics – Industrial Standards - A Balanced Outlook on Law – The Challenger of IT industry Case Study			
Unit – IV	SAFETY, RESPONSIBILITY AND RIGHTS	Periods	9
Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis – Reducing Risk - Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR)-Chernobyl Case Studies and Bhopal-Eight and nine Mile Island case study.			
Unit – V	GLOBAL ISSUES	Periods	9
Globalization and MNCs –Cross Culture Issues-Computer Ethics-computers as the instrument of Unethical behavior-computers as the object of Unethical Acts-autonomous computers-computer codes of Ethics-Weapons Development-Ethics and Research-Analyzing Ethical Problems in Research-Food and Drug Adulteration

Content of the syllabus								
UNIT I	WEAVING AND CERAMIC TECHNOLOGY				Periods		3	
Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries.								
UNIT II	DESIGN AND CONSTRUCTION TECHNOLOGY				Periods		3	
Designing and Structural construction House & Designs in household materials during Sangam Age - Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram - Sculptures and Temples of Mamallapuram - Great Temples of Cholas and other worship places - Temples of Nayakkar Period - Type study (Madurai Meenakshi Temple)- Thirumalai Nayakar Mahal - Chetti Nadu Houses, Indo - Saracenic architecture at Madras during British Period.								
UNIT III	MANUFACTURING TECHNOLOGY				Periods		3	
Art of Ship Building - Metallurgical studies - Iron industry - Iron smelting, steel -Copper and gold- Coins as source of history - Minting of Coins – Beads making-industries Stone beads - Glass beads - Terracotta beads -Shell beads/ bone beats - Archeological evidences - Gem stone types described in Silappathikaram								
UNIT IV	AGRICULTURE AND IRRIGATION TECHNOLOGY				Periods		3	
Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoompu of Chola Period, Animal Husbandry - Wells designed for cattle use - Agriculture and Agro Processing - Knowledge of Sea - Fisheries – Pearl - Conche diving - Ancient Knowledge of Ocean - Knowledge Specific Society.								
UNIT V	SCIENTIFIC TAMIL & TAMIL COMPUTING				Periods		3	
Development of Scientific Tamil - Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.

## LIST OF EXPERIMENTS

Sl. No	List of Experiments	Course Outcome
1.	Study the V-I characteristics of PN junction diode & Calculate Static & Dynamic Resistance	CO1
2.	Study the V-I characteristics of Zener diode & Calculate the Zener break down voltage.	CO1
3.	Study and plot the Input & Output characteristics of CB configuration in BJT.	CO2
4.	Study and plot the Input & Output characteristics of CE configuration in BJT.	CO2
5.	Study and plot the Intensity Vs photo current Characteristics of Photodiode and Phototransistor.	CO3
6.	Study and plot the Characteristics of UJT and calculate the intrinsic standoff ratio ( $\eta$ ).	CO3
7.	Study and plot the Characteristics of SCR and calculate the $V_{BO}$ , $I_L$ & $I_H$ .	CO3
8.	Study and plot the drain and transfer Characteristics of JFET and MOSFET.	CO2
9.	Verify the working of a Half wave rectifier, Full wave rectifier and full wave bridge rectifier and to measure the ripple factor.	CO4
10.	Introduction of P-spice Simulation software and characteristics of CB/CE configuration in BJT to be performed on P-spice.	CO5
11.	Analyze the drain characteristics and transfer characteristics of MOSFET using P-spice.	CO5

Content of the syllabus			
Unit – I	NUMBER SYSTEMS	Periods	6
Number Properties – HCF – LCM - Square root – Cube root – Simplification – Averages.			
Unit - II	DIRECT PROPORTIONAL PROBLEMS	Periods	8
Percentage - Profit & Loss –. Ratio & Proportions – Mixture & Allegations - Problem on Ages			
Unit – III	INDIRECT PROPORTIONAL PROBLEMS	Periods	8
Time & Work – Pipes & Cisterns - Time, Speed & Distance – Boats & Streams – Races & Games of Skills.			
Unit - IV	BANKER’S PROBLEMS	Periods	4
Simple Interest – Compound Interest – Logarithms – Partnership - Discounts.			
Unit – V	MISCELLANEOUS PROBLEMS	Periods	4
Mensuration: Area & perimeter – Volume & Surface Area – Geometry-Trigonometry.

Indirect			
1. Course - end survey			
Content of the syllabus			
Unit – I	TESTING OF HYPOTHESIS	Periods	12
Sampling distributions - Estimation of parameters - Statistical hypothesis - Large sample tests based on Normal distribution for single mean and difference of means -Tests based on t, Chi-square and F distributions for mean, variance and proportion - Contingency table (test for independent) - Goodness of fit.			
Unit - II	DESIGN OF EXPERIMENTS	Periods	12
One way and two way classifications - Completely randomized design – Randomized block design – Latin square design - 2 <sup>2</sup> factorial design.			
Unit– III	SOLUTION OF EQUATIONS AND EIGENVALUE PROBLEMS	Periods	12
Solution of algebraic and transcendental equations - Fixed point iteration method – Newton Raphson method - Solution of linear system of equations - Gauss elimination method – Pivoting - Gauss Jordan method – Iterative methods of Gauss Jacobi and Gauss Seidel – Eigen values of a matrix by Power method and Jacobi’s method for symmetric matrices.			
Unit - IV	INTERPOLATION, NUMERICAL DIFFERENTIATION AND NUMERICAL INTEGRATION	Periods	12
Lagrange’s and Newton’s divided difference interpolations – Newton’s forward and backward difference interpolation – Approximation of derivatives using interpolation polynomials – Numerical single and double integrations using Trapezoidal and Simpson’s 1/3 rules.			
Unit – V	NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS	Periods	12
Single step methods : Taylor’s series method - Euler’s method - Modified Euler’s method - Fourth order Runge-Kutta method for solving first order equations - Multi step methods : Milne’s and Adams - Bash forth predictor corrector methods for solving first order equations.

1. Course - end survey																																																																																																																																					

Content of the syllabus			
Unit – I	BASICS OF OPERATIONAL AMPLIFIERS	Periods	9
Current mirror and current sources, Current sources as active loads, Voltage sources, Voltage References, BJT Differential amplifier with active loads, Basic information about op-amps – Ideal Operational Amplifier – General operational amplifier stages -and internal circuit diagrams of IC 741, DC and AC performance characteristics, slew rate, Open and closed loop configurations.			
Unit – II	APPLICATIONS OF OPERATIONAL AMPLIFIERS	Periods	9
Sign Changer, Scale Changer, Phase Shift Circuits, Voltage Follower, V-to-I and I-to-V converters, adder, subtractor, Instrumentation amplifier, Integrator, Differentiator, Logarithmic amplifier, Antilogarithmic amplifier, Comparators, Schmitt trigger, Precision rectifier, peak detector, clipper and clamper, Low-pass, high-pass and band-pass Butterworth filters.			
Unit – III	ANALOG MULTIPLIER AND PLL	Periods	9
Analog Multiplier using Emitter Coupled Transistor Pair – Gilbert Multiplier cell – Variable transconductance technique, analog multiplier ICs and their applications, Operation of the basic PLL, Closed loop analysis, Voltage controlled oscillator, Monolithic PLL IC 565, application of PLL for AM detection, FM detection			
Unit – IV	ANALOG TO DIGITAL AND DIGITAL TO ANALOG CONVERTERS	Periods	9
Analog and Digital Data Conversions, D/A converter – specifications – weighted resistor type, R-2R Ladder type, Voltage Mode and Current-Mode R 2R Ladder types – switches for D/A converters, high speed sample-and-hold circuits, A/D Converters – specifications – Flash type – Successive Approximation type – Single Slope type – Dual Slope type – A/D Converter using Voltage-to-Time Conversion – Over-sampling A/D Converters.			
Unit – V	WAVEFORM GENERATORS AND SPECIAL FUNCTION	Periods	9
Sine-wave generators, Multi vibrators and Triangular wave generator, Saw-tooth wave generator, ICL8038 function generator, Timer IC 555, IC Voltage regulators – Three terminal fixed and adjustable voltage regulators – IC 723 general purpose regulator – Monolithic switching regulator			
Total Periods			45

Content of the syllabus			
Unit – I	INTRODUCTION	Periods	9
Introduction-History of Operating Systems-Operating System Structure – Operating System Operations –Process Management – Memory Management – Storage Management – Protection and Security –Distributed Systems – Computing Environments – System Structures: Operating System Services – User Operating System Interface – System Calls – Types of System Calls – System Programs.			
Unit - II	PROCESS MANAGEMENT AND COORDINATION	Periods	9
<b>Process Concept:</b> Process Scheduling – Operations on Processes – Inter-process Communication. <b>Multithreaded Programming:</b> Overview – Multithreading Models – Threading Issues – <b>CPU Scheduling:</b> Basic Concepts – Scheduling Criteria – Scheduling Algorithms – Multiple-Processor Scheduling – Synchronization – The Critical-Section Problem – Peterson,,s Solution – Synchronization Hardware – Semaphores – Classic problems of Synchronization – Monitors.			
Unit – III	DEADLOCKS AND MEMORY MANAGEMENT	Periods	9
<b>Deadlocks:</b> System Model – Deadlock Characterization – Methods for Handling Deadlocks – Deadlock Prevention – Deadlock Avoidance – Deadlock Detection – Recovery from Deadlock <b>Memory Management Strategies:</b> Swapping – Contiguous Memory Allocation – Paging – Structure of the Page Table – Segmentation			
Unit - IV	VIRTUAL MEMORY MANAGEMENT	Periods	9
<b>Virtual Memory Management:</b> Demand Paging – Copy on Write – Page Replacement – Allocation of Frames – Thrashing. <b>File System:</b> File Concept – Access Methods – Directory Structure – File Sharing –Protection			
Unit – V	STORAGE MANAGEMENT	Periods	9
<b>Implementing File Systems:</b> File System Structure – File System Implementation – Directory Implementation – Allocation Methods – Free-space Management <b>Secondary Storage Structure:</b> Disk Structure – Disk Scheduling – Disk Management – Swap-Space Management. Devices – Device controllers- Device drivers. Case Study: (Only for Assignment Studies not for End-Semester-Examinations) 1. Kernel data structures for various open source operating systems 2. Linux Scheduling 3. Linux File system , Windows 7 4. RTOS , Mobile OS

<b>Indirect</b>			
1. Course - end survey			
<b>Content of the syllabus</b>			
<b>Unit – I</b>	<b>INTRODUCTION TO ALGORITHM ANALYSIS</b>	<b>Periods</b>	<b>12</b>
Algorithm and its properties-Asymptotic notations and its properties-Mathematical Analysis for recursive Algorithms (Binary search, Tower of Hanoi) and Non-Recursive Algorithms (Matrix multiplication, Bubble sort)Recurrence relations: Methods for solving recurrence relations.			
<b>Unit - II</b>	<b>DIVIDE AND CONQUER AND GREEDY TECHNIQUE</b>	<b>Periods</b>	<b>12</b>
Divide and Conquer-Quick sort-Finding Maximum and Minimum-Strassen's Matrix Multiplication-Greedy Technique-Fractional Knapsack Problem-Huffman Trees.			
<b>Unit – III</b>	<b>DYNAMIC PROGRAMMING AND ITERATIVE IMPROVEMENT</b>	<b>Periods</b>	<b>12</b>
Dynamic Programming-All pair shortest Path: Floyd's Algorithm-Optimal Binary search Tree -0/1 Knapsack Problem- Iterative Improvement-Maximum Matching in BiPartite Graphs-Stable Marriage Problem.			
<b>Unit - IV</b>	<b>BRANCH AND BOUND AND BACKTRACKING</b>	<b>Periods</b>	<b>12</b>
Branch and Bound-Assignment Problem-8 Puzzle Problem-Back Tracking-8 Queens problem-Subset-sum problems-Hamiltonian Circuit Problem.			
<b>Unit – V</b>	<b>OTHER TECHNIQUES AND COMPUTATIONAL COMPLEXITY</b>	<b>Periods</b>	<b>12</b>
Decrease and conquer-Insertion sort-Topological sorting-Transform and conquer-Horner's Rule for Polynomial-Introduction to P, NP-Hard and NP-Complete problems- Deterministic and Non Deterministic Algorithms-Approximation for NP-Hard problems.

<b>U19IT410</b>	<b>Database Management System</b>	3	0	0	3	40	60	100																																																																																																																																													
<b>Course Objective</b>	The student shall be accustomed with																																																																																																																																																				
	• To infer the essentials of data models to intellectualize and illustrate a database system using ER diagram.																																																																																																																																																				
	• To conceptualize the relational database implementation using SQL with effective relational database design concepts.																																																																																																																																																				
	• To elaborate the fundamental concepts of transaction processing- concurrency control techniques and recovery procedure																																																																																																																																																				
	• To demonstrate Query evaluation and optimization techniques.																																																																																																																																																				
	• To signify the concepts of Database Security, Object Oriented, Data Warehousing and Data Mining																																																																																																																																																				
<b>Course Outcome</b>	At the end of the course, the student should be able to,												KL																																																																																																																																								
	<b>CO1:</b> Distinguish database systems from file systems and describe data models and DBMS architecture.												K2																																																																																																																																								
	<b>CO2:</b> Identify the basic issues of transaction processing and concurrency control.												K2																																																																																																																																								
	<b>CO3:</b> Demonstrate with understanding of SQL Programming language and normalization theory.												K2																																																																																																																																								
	<b>CO4:</b> Practice the basic query evaluation techniques, query optimization and familiar with basic database storage structures and access techniques.												K3																																																																																																																																								
	<b>CO5:</b> Analyze and derive an information model expressed in the form of an entity relation diagram and transform into a relational database schema.												K3																																																																																																																																								
<b>Pre-requisites</b>	--

Course Assessment Methods			
Direct			
1. Continuous Assessment Test I, II & III 2. Assignment 3. End-Semester examinations			
Indirect			
1. Course - end survey			
Content of the syllabus			
Unit – I	Introduction	Periods	10
<b>Introduction:</b> Introduction to Database. Hierarchical, Network and Relational Models. Three-Schema Architecture and Data Independence– The Database System Environment– <b>Data models:</b> Entity-relationship model, network model, relational and object oriented data models- Embedded SQL.			
Unit – II	Relational query languages and Database design	Periods	9
Relational algebra, Relational Calculus, SQL Fundamentals -DDL and DML constructs.			
<b>Relational Database Design:</b> Domain and data dependency, Armstrong's axioms, Functional Dependencies, Normal forms-1NF, 2NF , 3NF, BCNF.			
Unit – III	Query processing & optimization	Periods	8
Query Processing Overview - Evaluation of relational algebra expressions- Algorithms for SELECT and JOIN operations-Nested-Loop join-Block Nested loop join-Indexed Nested loop join- Query equivalence types, Query optimization- Transformation of Relational expression, Heuristic optimization-Statistics of Cost Estimation.			
Unit – IV	Transaction Processing and Database Recovery	Periods	8
Concurrency control, ACID property, Serializability of scheduling, Locking and timestamp based schedulers, optimistic Concurrency Control schemes, Database recovery-Failure classification-Recovery Algorithm-Remote backup systems- Aries Algorithm.			
Unit – V	Database Storage strategies & Security	Periods	10
RAID – File Organization – Organization of Records in Files – Indexing and Hashing –Ordered Indices – B+ tree Index Files – Static Hashing – Dynamic Hashing <b>Database Security:</b> Authentication, Authorization and access control.			
Total Periods			45

<b>Unit – I</b>	<b>TENSES</b>										Periods	<b>6</b>																																																																																																																																						
Purpose and rules of tenses and its keywords (focus should be given to present continuous, future continuous,present perfect, future perfect, present perfect continuous, past perfect continuous, future perfect continuous with more examples) - Direct and Indirect Speech – Voices.																																																																																																																																																		

Unit - II	ARTICLES	Periods	6
<p><b>Purpose of Articles: Indefinite Article:</b> If you want to say about ANY item, you should use the articles A / An. <b>A :</b> A European, A One Eyed beggar, A University, A Useful Website. Name of professions, Expression of quantity, To make a Proper noun a Common noun, With certain numbers, used before the word 'Half' when it follows a whole number. <b>Exceptions: Choosing A or An</b> There are a few exceptions to the general rule of using a before words that start with consonants and an before words that begin with vowels. The first letter of the word honor, for example, is a consonant, but it's unpronounced. In spite of its spelling, the word honor begins with a vowel sound. Therefore, we use an. <b>Example.</b></p> <p><b>The Definite Article:</b></p> <p>Where to use the Definite Article -A specific item, a particular person or thing, Before superlative forms, Before double comparatives, Before musical instruments, Before rank or title, Before name of the political parties, armed forces, physical positions, Before a Proper noun when used as a Common noun, Before some adjectives to make them nouns, Before Ordinal numbers, Before the names of Oceans, Seas, Rivers, Canals, Deserts, Groups of Mountains and Groups of Islands, Before the names of the Things, which are unique in nature, Before the names of Planets and Satellites, Before Holy Books, Before the names of News Papers, Before the names of some countries, measuring expressions beginning with by. <b>Omission of articles:</b></p> <p>Before Plural countable noun, Before proper noun, Before languages, a single item of uncountable noun, Before name of the meals except adjective usage, Double expressions – with wife and fork, with hat and folk, from top to bottom, With the names of meals such as Breakfast, Before predicative nouns denoting a unique position, After type of / kind of / sort of / post of / title of / rank of / articles are not used. Ex. He is not that sort of man, Articles are not used with material nouns, After di-transitive verb articles should not be used except when it is used as mono transitive verb, Before the names of meals no article should be used in a general way except in particular causes.</p> <p><b>Repetition of the articles</b></p> <ol style="list-style-type: none"> <li>1. When two or more adjectives qualify the same noun, the article is used before the first adjective only; but when they qualify different nouns, expressed or understood, the article is used before each adjective.</li> </ol> <p><b>PREPOSITIONS</b></p> <ol style="list-style-type: none"> <li>a. Prepositions Of Time-On, In, At, Since, For, Ago, During, Before, After, Until, Till, To/Past, From/To, By</li> <li>b. Prepositions Of Place- In, At, On, Off, By, Beside, Under, Over, Below, Above, Up And Down, Ago</li> <li>c. Prepositions Of Directions/ Movements Across, Through, To, Into, Out Of, Onto, Towards, From</li> <li>d. Other Prepositions- Of, By, About, For, With</li> <li>e. Prepositions Usage with Its Context</li> </ol>			
Unit – III	SENTENCE CORRECTION	Periods	6
<p><b>SENTENCE CORRECTION</b></p> <ol style="list-style-type: none"> <li>a) In each of the following sentences, four options are given. You are required to identify the best way of writing the sentence in the context of the correct usage of standard written English. While doing so, you have to ensure the message being conveyed remains the same in all the cases.</li> <li>b) For each of the following questions, a part or the whole of the original sentence has been underlined. You have to find the best way of writing the underlined part of the sentence.</li> <li>c) In the following questions, you have to identify the correct sentence/s. For each of the following questions, find the sentence/s that are correct.</li> <li>d) In each of the following questions, one or more of the sentences is/are incorrect. You have to</li> </ol>			

identify the incorrect sentence/s.			
<b>SENTENCE IMPROVEMENT</b> a. Subject-Verb Agreement b. Parallelism c. Redundancy: The error of repeating the same thing. d. Modifier e. Comparisons			
RULE: (a) When comparative degree is used with than, make sure that we exclude the thing compared from the rest of class of things by using the f. Confusing words i) Few and Less ii) Few and A few iii) Little and A Little A little tact would have saved the situation (some tact). Lay and Lie Lay, laid			
<b>Unit - IV</b>	<b>SENTENCE COMPLETION</b>	Periods	<b>6</b>
<b>SENTENCE COMPLETION:</b> Purpose and usage of proper words. <b>SPOTTING ERRORS:</b> a. Errors on conjunctions b. Errors on „if“ clauses c. Errors on adverbs d. Errors on adjectives e. Errors on prepositions f. Errors on determiners g. Errors on verbs h. Errors on nouns i. Errors on modifiers j. Errors on degrees of comparison k. Errors on subject-verb agreement l. Errors on infinitives m. Errors on pronouns n. Errors on tenses o. Redundancy errors p. Errors on articles q. Error on complex sentences			
<b>Unit – V</b>	<b>VOCABULARY</b>	Periods	<b>6</b>
Synonyms: Root Based Word, Suffix Based Word. Antonyms - Contextual Vocabulary - Verbal Analogy			
<b>Total Periods</b>			<b>30</b>

Content of the syllabus			
Unit – I	Data Warehousing	Periods	9
Introduction- Data Warehouse - Multidimensional data model - Data warehouse architecture - Steps for the design and construction of data warehouses, Three-tier data warehouse architecture, Data warehouse back-endtools and utilities, Metadata Repository - Types of OLAP Servers - Data warehouse implementation			
Unit - II	Introduction to Data Mining	Periods	9
Introduction - The evolution of database system technology – Steps in knowledge discovery from database process - Architecture of a data mining systems - Data mining on different kinds of data – Different kinds of pattern – Technologies used – Applications – Major issues in data mining - Classification of data mining systems– Data mining task primitives - Integration of a data mining system with a database or data warehousesystem			
Unit – III	Data Preprocessing	Periods	9
Data Objects and attribute types – Basic statistical description of data –Measuring datasimilarity and dissimilarity - Data cleaning – Integration - Data reduction – Data transformation and data discretization.			
Unit - IV	Association Rule Mining	Periods	9
Basic concepts – Frequent item set mining methods – Apriori algorithm, A pattern growth approach , Verticaldata format, Closed and max patterns - Pattern mining in multilevel and multidimensional space – Constraint based frequent pattern mining			
Unit – V	Classification and Clustering	Periods	9
General approach to classification - Decision tree induction - Bayes classification methods-Rule Based Classification- Metrics for evaluating classifier performance – Prediction - Cluster Analysis – Partitioningmethods – Hierarchical methods- Applications of data mining-Social impacts of data mining-Tools

Content of the syllabus			
Unit – I	8086 Microprocessor	Periods	9
Intel 8086 microprocessor - Architecture -Basic 8086/8088 Configurations: Minimum Mode and MaximumMode. Instruction set - Addressing modes – Assembly language programming			
Unit – II	General Purpose Interfacing Devices	Periods	9
8255A Programmable Peripheral Interface - IC 8251A Serial Communication Interface – 8253 Programmable Interval Timer IC - IC 8279 Programmable Keyboard /Display Interface – 8259A Programmable Interrupt Controller.			
Unit – III	8051 Microcontroller	Periods	9
Introduction to 8051 - Microprocessor architecture and its operations – Example of a 8051 based Microcomputer - Instruction set- Addressing modes- Timing diagram of 8051 (Opcode fetch, Memory Read/Write, I/O Read/Write).			
Unit – IV	Programming the 8051	Periods	9
Counters – Time Delays – Stack and Subroutines – Code conversion – Interrupts- Memory mapped I/O andI/O mapped I/O for 8051.			
Unit – V	Principles of Embedded Systems	Periods	9
Introduction -Embedded systems description, definition, design considerations and requirements - Overviewof Embedded system Architecture (CISC and RISC) -Categories of Embedded Systems - Embedded processor selection and tradeoffs.			
Total Periods			45

Content of the syllabus			
Unit – I	INTRODUCTION TO WEB AND XHTML	Periods	8
Internet - Basic Protocols - Webpages. Introduction to XHTML and Editing XHTML – Headings – Linking - Images - Special characters and Horizon rules - Lists – Tables - Forms – Internal Linking- Meta Elements –Cascading Style Sheets.			
Unit - II	CLIENT SIDE SCRIPTING - JAVA SCRIPT	Periods	9
Introduction to scripting – Control statements I, II – Functions: Definition – Random Number Generation – Global function – Recursion – Arrays: Declaring and allocating arrays – Multidimensional arrays – Objects : Math object – String object – Date object – Boolean, Number object – Document object –Window object - Events			
Unit – III	SERVER SIDE SCRIPTING - ASP . NET	Periods	9
Database : My SQL - Create Table - Insert, Update and Delete operation. Server side scripting - ASP.NET - Introduction - Basics - Installing Visual Studio - Creating forms - HTTP Request/ Response - Connecting Database. Web services			
Unit - IV	FULL STACK DEVELOPMENT	Periods	10
Introduction - Architecture of Modern Web Applications - Front End Vs Back End - Angular JS as Front End Framework - Spring Boot as Back End Framework - Installing Spring Boot - Sample Maven Project. Creating Restful Layer : REST - HTTP Methods - CRUD Operations - Building Restful Service for User Registration Form			
Unit – V	ANGULARJS	Periods	9
Basic Components - Life Cycle - MVC Architecture - Setting up AngularJs - Adding Bootstrap - A Single Page Application in AngularJS			
Total Periods			45

Content of the syllabus			
Unit – I	INTRODUCTION TO PYTHON	Periods	9
Introduction to Python, features, installing Python, writing and executing Python program — native data types, comments, constants, variables, operators, expression, conditional statements, control statements, continue, pass,break.			
Unit - II	LISTS, TUPLES, SETS AND DICTIONARIES	Periods	9
Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Sets: methods and operators, Dictionaries: operations and methods.			
Unit – III	FUNCTIONS AND STRINGS	Periods	9
Function definition, declaration, arguments, parameters – formal and local, parameter passing methods - functionprototypes, recursion; Strings: string slices, immutability, string functions and methods, string module, regular expressions.			
Unit - IV	FILES AND MODULES	Periods	9
Files and exception: Text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, accessing CSV file.			
Unit – V	PACKAGES AND DATA VISUALIZATION	Periods	9
Text processing, Numerical processing: NumPy package – mean, medium and mode, Pandas package – vector,data frame, data visualization: matplotlib, Time operations.

<b>EX.NO</b>	<b>EXPERIMENT DESCRIPTION</b>	<b>COs</b>
1.	Develop the html program for Creation of web site with forms, frames, links, tables etc	CO1
2.	Create an XHTML document that has a form with text box, Radio Button, Selection box,Checkbox, Submit and reset buttons along with CSS.	CO2
3.	Creating simple application to access data base using JDBC Formatting HTML with CSS.	CO2
4.	Generate JavaScript for arrays and functions.	CO3
5.	Create a web page with real time clock using Java script event handling mechanism.	CO3
6.	Program with ASP .net by connecting with SQL	CO3
7.	Create login form to enter into website	CO4
8.	Building web form that displays data from a database	CO4
9.	Process XHTML Forms using PHP program by GET and POST methods.	CO4
10.	Write a program to implement web service for calculator application	CO4
11.	Create a form in AngularJS & validate the form and also print the user data given in the formonce the form is submitted.	CO5
12.	Create a Student Profile in AngularJS using event handling mechanism.	CO5

## List of Experiments

EX.NO	EXPERIMENT DESCRIPTION	COs
1.	a. Odd or Even b. Simple Calculator c. Leap year d. Finding the exponentiation of the given number	CO1
2.	a. Finding Factorial of given number b. Armstrong Number c. Finding Fibonacci Series d. Finding the maximum of the list e. Finding n Prime numbers	CO2
3.	a. Circulating N values of an array b. Summation of n numbers c. Swapping of two values d. Distance between two points	CO2,CO3
4.	a. Linear Search b. Binary Search	CO3,CO4
5.	a. Selection Sort b. Insertion Sort	CO3,CO4
6.	Merge Sort	CO3,CO4
7.	Multiply Matrices	CO3,CO4
8.	Program to take command line arguments (word count)	CO5
9.	Find the most frequent words in a text read from a file	CO5
10.	a. Simulate Elliptical Orbits using PyGame b. Simulate Bouncing Ball using PyGame	CO5
<b>TOTAL PERIODS</b>		<b>45</b>

	<b>VIVEKANANDHA COLLEGE OF ENGINEERING FOR WOMEN</b> (Autonomous Institution, Affiliated to Anna University ,Chennai) Elayampalayam, Tiruchengode – 637 205						 		
Programme	<b>B. TECH</b>	Programme Code			<b>104</b>	Regulation		<b>2019</b>	
Department	<b>INFORMATION TECHNOLOGY</b>					Semester			
Course Code	Course Name	Periods Per Week			Credit	Maximum Marks			
		L	T	P	C	CA	ESE	Total	
<b>U19MCTY5</b>	<b>Logical Reasoning</b>	2	0	0	-	100	-	100	
<b>Content of the syllabus</b>									
<b>Unit – I</b>		<b>VERBAL REASONING</b>					Periods	<b>6</b>	
<b>Coding – Decoding</b> (Letter Coding, Direct Letter Coding, Number/Symbol Coding, Deciphering Message – Word coding and Numeral coding, Substitution Coding, Crypt coding – crypt addition, subtraction, Information Arrangement Coding) , <b>Analogy</b> ( Direct and Simple Analogy, Completing the Analogues pair, Choosing the Analogues pair, Choosing the similar word, Number Analogy, Alphabet Analogy), <b>Classification</b> (Choosing the odd words, Choosing the odd pair of words, Choosing the odd letter group, Choosing the odd number and odd pair of numbers), <b>Alphabet Test</b> (Arrangement according to dictionary, Alpha-Numeric sequence, Letter word problems, Rule detection ), Word Formation (Using letters from a given word, By unscrambling words)									
<b>Unit - II</b>		<b>SITTING ARRANGEMENT &amp; SENSE TEST</b>					Periods	<b>6</b>	
<b>Sitting Arrangement</b> (Arrangement in a line, Arrangement around of a circle, square and rectangle, Arrangement around pentagonal and hexagonal, <b>Direction Sense Test</b> [(Main, Cardinal and Shortest Direction)Final Detection, Displacement, Direction and Displacement], <b>Number, Ranking, Time sequence Test</b> (Number Test, Ranking Test, Time Sequence Test), Puzzles (Based on classification, Based on placing and comparison, Family Based problems)									
<b>Unit – III</b>		<b>NUMBER AND LETTER SERIES</b>					Periods	<b>6</b>	
<b>Number and Letter Series</b> [( <b>Number Series</b> : To find a missing term, Find the number that does not follow the pattern, Miscellaneous pattern of the series ( Based on addition / subtraction of consecutive odd / even no"s, Based on addition / subtraction of prime numbers, Multiplication and Division, Based on addition / subtraction of squares of natural numbers, Based on addition / subtraction of cubes of natural numbers) , <b>Letter Series</b> (Alphabet Series, Continuous pattern of series)], <b>Inserting the missing character</b> , <b>Age, Blood</b> (Jumbled up descriptions, Relation puzzles, Coded Relations), <b>Clock and calendar</b> (Mathematical operations and Notations- Problem of solving by substitution, Interchanging signs and numbers, Deriving the appropriate conclusions), <b>Logical order of words, Clerical aptitude</b> (Question based on address, Question based on issues)									
<b>Unit – IV</b>		<b>LOGICAL AND ANALYTICAL REASONING</b>					Periods	<b>6</b>	
<b>Logical venn diagrams</b> (Universal positive, Universal Negative, Universal Affirmative or Negative, Miscellaneous, Geometrical Figures on Venn Diagrams), <b>Eligibility test, Syllogisms, Statement and Assumptions, Statement and Conclusions, Statement and Arguments, Statement and Course of Action, Verification of Truth of the Statement, Data Sufficiency.</b>									

Unit – V	DATA INTERPRETATION & FLOW CHART	Periods	6
Input – Output (Shifting, Arranging),Data Interpretation (Table chart, Bar chart, Pie chart, Miscellaneous chart, Mixed chart), Cube(no of sided painted, Full cube, cutting cube), Flow chart (Description flow chart, Value updating flow chart), Quantitative reasoning, Logical deduction, Deductive reasoning, Binary logic			
Total Periods			30
Text Books			
1.	How to crack Test of Reasoning - Jai kishan and Prem kishan -arihant publication

Content of the syllabus			
Unit – I	INTRODUCTION TO COMPILERS	Periods	10
Translators-Compilation and Interpretation-Language processors -The Phases of Compiler-Errors Encountered in Different Phases-The Grouping of Phases-Compiler Construction Tools - Programming Language basics			
Unit - II	LEXICAL ANALYSIS	Periods	9
Need and Role of Lexical Analyzer-Lexical Errors-Expressing Tokens by Regular Expressions- Converting Regular Expression to DFA- Minimization of DFA-Language for Specifying Lexical Analyzers-LEX.			
Unit – III	SYNTAX ANALYSIS	Periods	8
Need and Role of the Parser-Context Free Grammars -Top Down Parsing -General Strategies- Recursive Descent Parser Predictive Parser-LL(1) Parser-Shift Reduce Parser-LR Parser-LR (0)Item- Construction of SLR Parsing Table -Introduction to LALR Parser - Error Handling and Recovery in Syntax Analyzer-YACC.			
Unit - IV	SYNTAX DIRECTED TRANSLATION & RUN TIME ENVIRONMENT	Periods	9
Intermediate Languages -Syntax directed Definitions-Construction of Syntax Tree-Bottom-up Evaluation of S-Attribute Definitions. RUN-TIME ENVIRONMENT: Source Language Issues- Storage Organization-Storage Allocation-Parameter Passing-Symbol Tables-Dynamic Storage Allocation.			
Unit – V	CODE OPTIMIZATION AND CODE GENERATION	Periods	9
Principle Sources of Optimization-DAG- Optimization of Basic Blocks-Global Data Flow Analysis- Efficient Data Flow Algorithms-Issues in Design of a Code Generator - A Simple Code Generator Algorithm.			
Total Periods			45

Content of the syllabus			
Unit – I	Introduction to AI & ML	Periods	9
Introduction– Definition, Symbolic and Non-Symbolic Representation, Research Focus of Artificial Intelligence. <b>Artificial Intelligence:</b> History, Applications, Objectives, Artificial Intelligence Programming and future of AI. <b>Machine Learning-</b> Introduction- Types of Machine Learning- Applications			
Unit – II	Modelling & Concepts of Probability	Periods	9
Selecting a Model- Training a Model- Model Representation and Interpretability- Evaluating Performance of a Model-Concepts of Probability-Random variables-Discrete Distributions-Continuous Distribution-Multiple Random Variables			
Unit – III	Classification	Periods	9
Baye’s Theorem-Brute Force Bayesian algorithm-Naïve Bayes classifier- Applications of Naïve Bayes - Examples of Supervised Learning -Classification Model-Classification Learning Steps, k-Nearest Neighbour (kNN), Random forest model, Support vector machines			
Unit – IV	Regression	Periods	9
Example of Regression-Common Regression Algorithms-Simple linear regression, Multiple linear regression, Assumptions in Regression Analysis, Main Problems in Regression Analysis, Improving Accuracy of the Linear Regression Model, Polynomial Regression Model, Logistic Regression			
Unit – V	Unsupervised Learning	Periods	9
Application of Unsupervised Learning-Clustering- Clustering as a machine learning task, Different types of clustering techniques, Partitioning methods, k-Medoids: a representative object-based technique- Finding Pattern using Association Rule-Definitions of common terms, Association rule, The apriori algorithm for association rule learning

Content of the Syllabus			
Unit – I	PROCESS MODELS	Periods	9
Software process structure – Process models - Waterfall model, Incremental process models, Evolutionary process models, Specialized process models – Unified Process - Agile development: Agile process - Extreme programming – Other Agile process model: Scrum.			
Unit – II	REQUIREMENT GATHERING AND ANALYSIS	Periods	9
Requirements engineering – Eliciting requirements, Developing use cases – Building the analysis model – Negotiating requirements – Requirements monitoring – Validating requirements – Requirements analysis.			
Unit – III	UML MODELING	Periods	9
Introduction – Unified Modeling Language – Static model – Dynamic model – UML diagrams– UML class diagram– Use case diagram – UML dynamic modeling – UML interaction diagrams –UML state chart diagram – UML activity diagram – Implementation Diagrams –Component diagram –Deployment diagram.			
Unit – IV	SOFTWARE DESIGN	Periods	9
Design concepts and model – Architectural design: Software architecture, Architectural styles – Architectural design – Component level design: Designing class-based components, Conducting component level design – User interface design: User interface analysis and design – Interface analysis –Interface design steps – Design patterns.			
Unit – V	SOFTWARE TESTING FUNDAMENTALS	Periods	9
Software testing strategies: Strategic approach – Issues – Test strategies for conventional and Object Oriented software –Validation and System testing – Debugging – Testing conventional applications: White box testing – Basis path testing – Control structure testing – Black box testing – Software configuration management – SCM repository – SCM process.

Course Objective	The student should be able to , <ul style="list-style-type: none"><li>Understand the concept of computer networking basics.</li><li>Understand the different components of computer networks, various protocols, and working Principles of Layers</li></ul>																																																																																																																																																	
Course Outcome	At the end of the course ,the student should be able to,									KL																																																																																																																																								
	<b>CO1:</b> Summarize the basic fundamentals of networks for data communication and apply the different line coding schemes for digital-to-digital conversion									K3																																																																																																																																								
	<b>CO2:</b> Demonstrate the knowledge of error detection and correction methods and protocols at data link layer									K3																																																																																																																																								
	<b>CO3:</b> Interpret the different addressing schemes and apply various routing protocols at network layer									K3																																																																																																																																								
	<b>CO4:</b> Illustrate the different transport layer protocols and the beneficial effects of adopting suitable flow control and QoS techniques									K2																																																																																																																																								
	<b>CO5 :</b> Explore the various protocols and its working principles at application layer with basic cloud networking .									K2																																																																																																																																								
Pre-requisites	Data Communications

Content of the syllabus			
Unit– I	Network Models and Physical Layer	Periods	9
Layers in OSI Model- TCP/IP Protocol suite- Addressing -Transmission Modes –Multiplexing: FDM-WDM-STDm-Spread Spectrum :FHSS-DSSS-Virtual Circuit Networks.			
Unit- II	Data Link Layer	Periods	9
Introduction –Framing– Flow Control and Error Control -HDLC - Point-to-point protocol. Media Access Control Protocols: Random Access Protocols – Channelization: FDMA-TDMA-CDMA - Wired LAN: Standard Ethernet –Fast Ethernet –Giga Ethernet.			
Unit–III	Network Layer	Periods	9
Network Layer Services- Network layer performance - IPV4 addresses – Internet Protocol (IP) - ICMPv4. Unicast Routing Algorithms: Distance Vector and Link-state routing – Routing Protocols: RIP and OSPF - IPV6 addressing- IPV6 protocol.			
Unit- IV	Transport Layer	Periods	9
Introduction – Transport layer protocols – TCP :Simple – Stop-and-wait - Go-back-N – Selective Repeat - Piggybacking – Quality of Service: Data Flow Characteristics -Techniques to improve QoS.- – UDP.			
Unit– V	Application Layer and Cloud Networking	Periods	9
WWW - HTTP- FTP - Electronic mail -Telnet-SSH-DNS-Network Management: Introduction – SNMP- Software Defined Networking (SDN).			
Total Periods			45

EX.NO	EXPERIMENT DESCRIPTION	COs
1.	Exploration of UCI repository datasets and tools like WEKA, Rapid Miner, etc.,	CO1
2.	Perform data manipulation using NumPy and pandas and data visualization using matplotlib.	CO1
<b>Supervised Learning</b>		
3.	Implement Naïve Bayesian classification and predict the class label for the given data	CO2
4.	Implement k-NN algorithm for the specified data.	CO2
5.	Implement SVM algorithm for the specified data.	CO2
6.	Implement linear regression models to approximate the given data	CO2
<b>Unsupervised Learning</b>		
7.	Implement k-means clustering algorithm for the given data and visualize and interpret the result.	CO5
8.	Implement apriori algorithm for association rule to predict the result of given dataset.	CO5
<b>Case Study:</b>		
9.	With your own dataset, apply any three algorithms for the same dataset. Calculate and compare the accuracy using Confusion matrix and graph.	CO3
10.	Predict the Grocery Store sales using Machine learning with the help of kaggle.	CO3

**LIST OF EXPERIMENTS**

<b>EX.NO</b>	<b>EXPERIMENT DESCRIPTION</b>	<b>COs</b>
1.	Define problem statement, develop business and domain models with UML diagrams, implement the interfaces and do testing for the Passport Automation system	CO1 – CO5
2.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Library Management system	CO1 – CO5
3.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Exam Registration System	CO1 – CO5
4.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Stock Maintenance system	CO1 – CO5
5.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Online Course Registration system	CO1 – CO5
6.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the E-ticketing system	CO1 – CO5
7.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Insurance management system	CO1 – CO5
8.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Credit card processing system	CO1 – CO5
9.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Employee Recruitment system	CO1 – CO5
10.	Define problem statement, develop business and domain models with UML diagrams, implement the interface and do testing for the Bank Management system	CO1 – CO5

1. Continuous Assessment Test I- II & III
2. Assignment
3. End-Semester examinations

**Indirect**

1. Course - end survey

**Content of the Syllabus**

<b>Unit – I</b>	<b>INTRODUCTION TO BIG DATA AND ANALYTICS</b>	Periods	9
BIG DATA: Introduction - Types of Digital Data – Characteristics – Evolution – Definition – Challenges –Need for Big Data -Traditional BI versus Big data – Typical Data warehouse environment. ANALYTICS: Greatest Challenges that prevent Business from Capitalizing on Big data –Top Challenges Facing Big data –Importance of Big data analytics – Data science – Terminologies used in Big Data environments– Analytics Tools.			
<b>Unit - II</b>	<b>BIG DATA AND HADOOP FRAMEWORK</b>	Periods	9
BIG DATA LANDSCAPE TECHNOLOGY: NoSQL –Types of NOSQL Databases – Need for NOSQL –Use of NoSQL in Industry-SQL VS NoSQL-New SQL .HADOOP: Hadoop Introduction - RDBMS Vs Hadoop – History of Hadoop-Use case of Hadoop –Hadoop Overview – Managing resources and application with Hadoop YARN -Interacting with Hadoop Ecosystem.			
<b>Unit – III</b>	<b>MONGO DB AND CASSANDRA</b>	Periods	9
MONGO DB: Introduction to MongoDB – Terms used in MongoDB– Data types in MongoDB – MongoDB Query Language. CASSANDRA: Introduction to Cassandra – Features of Cassandra – CQL Data types – CQLSH– CRUD operations – Collections – Alter commands – Import and Export – Querying System tables.			
<b>Unit - IV</b>	<b>MAP REDUCE and HIVE, APACHE</b>	Periods	9
INTRODUCTION TO MAP REDUCE PROGRAMMING : Introduction –Map task – Searching –Sorting – Compression .HIVE: Introduction to Hive – Hive Architecture – Data types – File format – Hive Query Language – RCFile implementation. Apache spark and Apache kafka, Messaging Queues on Asynchronous Event driven development.			
<b>Unit – V</b>	<b>RECENT TRENDS IN PIG AND CASE STUDY</b>	Periods	9
PIG: Introduction to Pig – Pig on Hadoop – Pig Philosophy -Use case of Pig - Data types – Running Pig – Execution modes of Pig – HDFS commands–Eval function . CASE STUDY: Word count in File-Retail log processing.			
<b>Total Periods</b>			<b>45</b>

Content of the syllabus			
Unit – I	INTRODUCTION TO IoT	Periods	9
Defining IoT, Characteristics of IoT, Physical design of IoT, Logical design of IoT, Functional blocks of IoT, Communication models & APIs, Challenges in designing an Embedded System.			
Unit - II	IoT CONFIGURATION	Periods	9
Introduction, M2M, Difference between IoT and M2M, difference between SDN and NFV for IoT, Software defined networks, network function virtualization, Basics of IoT System Management with NETCOZF, YANG- NETCONF, YANG, SNMP NETOPEER			
Unit – III	IoT PHYSICAL DEVICES AND ENDPOINTS	Periods	9
Introduction to Arduino and Raspberry Pi- Installation, Interfaces (serial, SPI, I2C), Programming – C program with Arduino with focus on interfacing external gadgets, controlling output, reading input from pins			
Unit - IV	IoT PROTOCOLS	Periods	9
IoT Access Technologies- Physical and MAC layers, topology and Security of IEEE 802.15.4, 802.11ah and Lora WAN, Network Layer: IP versions, Constrained Nodes and Constrained Networks,6LoWPAN, Application Transport Methods: SCADA, Application Layer Protocols: CoAP and MQTT.			
Unit – V	CASE STUDIES AND APPLICATION DEVELOPMENT FOR IoT USING EMBEDDED SYSTEMS	Periods	9
Home Automation- Smart Lighting-Smart Appliance-Theft Detection, Smart cities - Smart parking-Smart Road, Smart Environment-Air pollution monitoring-weather monitoring, Health fitness monitoring, Techniques for writing Embedded code - Examples for Application development cloud services for IoT.			
Total Periods			45

## LIST OF EXPERIMENTS

EX NO	EXPERIMENT DESCRIPTION	COs
1.	Create a simple LED bargraph using Arduino	CO1
2.	Design a system to find the obstacle distance using Arduino	CO1
3.	Design a project to count the number of visitors using Arduino	CO2
4.	Interface a gas sensor and find the Gas level using NODEMCU	CO2
5.	Control an LED via a webpage with the help of NODEMCU	CO2
<b>Hadoop</b>		
6.	Install, configure and run Hadoop	CO3
7.	To implement the following file management tasks in Hadoop System (HDFS): Adding files and directories, Retrieving files, Deleting files.	CO3
8.	To run a basic Word Count Map Reduce program to understand Map Reduce Paradigm: To count words in a given file, To view the output file, and To calculate execution time.	CO4
9.	To study and implement basic functions and commands in R Programming.	CO5

1. Continuous Assessment Test I, II & III 2. Assignments / Quiz / Seminar 3. End-Semester examinations															
<b>Indirect</b>															
1. Course - end survey															

Content of the syllabus			
Unit – I	INTRODUCTION	Periods	9
Introduction to ad-hoc networks – definition, characteristics features, applications. Characteristics of wireless channel, ad-hoc mobility models: indoor and outdoor models.			
Unit - II	MEDIUM ACCESS PROTOCOLS	Periods	9
MAC Protocols: Design issues, goals and classification. Contention based protocols – with reservation, scheduling algorithms, protocols using directional antennas. IEEE standards: 802.11a, 802.11b, 802.11g, 802.15. HIPERLAN			
Unit – III	NETWORK PROTOCOLS	Periods	9
Routing Protocols: Design issues, goals and classification. Proactive Vs reactive routing, unicast routing algorithms, Multicast routing algorithms, hybrid routing algorithm, energy aware routing algorithm, hierarchical routing, QoS aware routing.			
Unit – IV	END – END DELIVERY AND SECURITY	Periods	9
Transport Layer: Issues in designing – Transport layer classification, adhoc transport protocols. Security issues in adhoc networks: issues and challenges, network security attacks, secure routing protocols.			
Unit – V	CROSS LAYER DESIGN	Periods	9
Cross layer Design: Need for cross layer design, cross layer optimization, parameter optimization techniques, cross layer cautionary perspective. Integration of adhoc with Mobile IP networks.			
Total Periods			45

## VIVEKANANDHA COLLEGE OF ENGINEERING FOR WOMEN

(Autonomous Institution, Affiliated to Anna University ,Chennai)  
Elayampalayam, Tiruchengode – 637 205

Programme	<b>B.TECH</b>	Programme Code			<b>104</b>	Regulation	<b>2019</b>		
Department	<b>INFORMATION TECHNOLOGY</b>				Semester			<b>-</b>	
Course Code	Course Name	Periods Per Week			Credit	Maximum Marks			
		L	T	P		C	CA	ESE	Total
<b>U19ITV11</b>	<b>WIRELESS SENSOR NETWORKS</b>	3	0	0	3	40	60	100	
<b>Course Objective</b>	To the course aims to understand the fundamental concepts of wireless sensor networks and functionalities of different layers. It also helps to devise appropriate node and network management strategies and provides knowledge on sensor networks security.								
<b>Course Outcome</b>	At the end of the course, the student should be able to,							KL	
	CO1: Apply the basic concepts of wireless sensor networks							K3	
	CO2:Identify the basic architectural framework using physical and MAC layer protocols							K3	
	CO3:Develop various network layer protocols for inter and intra communication pattern							K3	
	CO4:Sketch the different synchronization algorithms for managing node and network level functions							K3	
	CO5:Discover the challenges in Security and Sensor Network Programming							K3	
<b>Pre-requisites</b>	Computer Networks								

CO / PO Mapping													CO/PSO Mapping	
(3/2/1 indicates strength of correlation) 3-Strong, 2 – Medium, 1 - Weak														
COs	Programme Outcomes (POs)												PSOs	
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO 1	3	2	1	1									3	3
CO 2	3	2	1	1									3	3
CO 3	3	2	1	1									3	3
CO 4	3	2	1	1									3	3
CO 5	3	2	1	1									3	3

### Course Assessment Methods

1. Continuous Assessment Test I, II & III
2. Assignment
3. End-Semester examinations

1. Course - end survey

Content of the syllabus			
Unit – I	Introduction	Periods	9
Introduction-Motivation and Wireless Sensor Nodes: Definitions and Background, Challenges and Constraints - Applications: Structural Health Monitoring, Traffic Control, Health Care, Pipeline Monitoring, Precision Agriculture, Active Volcano, Underground Mining - Node Architecture: The Sensing Subsystem, The Processor Subsystem, Communication Interfaces, Prototypes.			
Unit - II	Basic Architectural Framework and Medium Access Control	Periods	9
Physical Layer: Basic Components, Source Encoding, Channel Encoding, Modulation, Signal Propagation. Medium Access Control: Overview, Wireless MAC Protocols, Characteristics of MACProtocols in Sensor Networks, Contention-Free MAC Protocols, Contention-Based MAC Protocols, Hybrid MAC Protocols.			
Unit – III	Routing Protocols	Periods	9
Network Layer: Overview, Routing Metrics, Flooding and Gossiping, Proactive Routing, On-Demand Routing, Hierarchical Routing, Location-Based Routing, QoS-Based Routing Protocols.			
Unit - IV	Power Management and Time Synchronization	Periods	9
Power Management: Local Power Management Aspects-Dynamic Power Management-Conceptual Architecture-Time Synchronization: Clocks and the Synchronization Problem, Time Synchronization in Wireless Sensor Networks, Basics of Time Synchronization, Time Synchronization Protocols.			
Unit – V	Security and Sensor Network Programming	Periods	9
Security: Fundamentals of Network Security, Challenges of Security in Wireless Sensor Networks, Security Attacks in Sensor Networks, Protocols and Mechanisms for Security, IEEE 802.15.4 and ZigBee Security. Sensor Network Programming: Challenges in Sensor Network Programming.			
Total Periods			45
Text Books

Content of the syllabus			
Unit– I	INTRODUCTION	Periods	9
Introduction to Distributed systems, Characterization of DS- Examples of distributed systems- resource sharing and the web- challenges, System model-Physicalmodel-Architectural models- Fundamental models,client server communication-group communication, Operating system supports-Processes and threads-communication and invocation.			
Unit–II	COMMUNICATION IN DISTRIBUTED SYSTEM	Periods	9
Inter process Communication – The API for internet protocols – External data representation and Multicast communication- Network visualization: Overlay networks-Case study: MPI - Remote Invocation: Request-reply protocols – Remote procedure call – Remote method invocation. Case study: Java RMI – Group communication – Message queues – Shared memory approaches.			
Unit– III	PEER TO PEER SYSTEM AND FILE SYSTEM	Periods	9
Introduction - Napster and its legacy - Peer-to-peer – Middleware - Routing overlays- Overlay case studies: Pastry, Tapestry-Distributed File Systems: Introduction - File service architecture –Case study: Andrew File system, Name service and domain name system-Directory services.			
Unit-IV	SYNCHRONIZATION AND REPLICATION	Periods	10
Introduction - Clocks, events and process states - Synchronizing physical clocks- Logical time and logical clocks - Global states – Distributed debugging-Transactions and Concurrency Control: Transactions - Nested transactions – Locks – Optimistic concurrency control - Timestamp ordering – Atomic Commit protocols -Distributed deadlocks – Replication –fault tolerant services- Case study :Coda.			
Unit– V	DISTRIBUTED MULTIMEDIA SYSTEMS	Periods	8
Distributed multimedia system-Characteristic of multimedia data-Quality of service management-Resource management-stream adaption-Sensing and context awareness-Security and privacy-Case study: Tiger, Big torrent.			
Total Periods			45

<b>Content of the syllabus</b>																																																																																																																																					
<b>Unit – I</b>	<b>FUNDAMENTALS</b>										Periods	<b>9</b>																																																																																																																									
Green IT Fundamentals: Business, IT, and the Environment – Benefits of a Green Data Centre - Green Computing: Carbon Foot Print, Scoop on Power – Green IT Strategies: Drivers, Dimensions, and Goals – Environmentally Responsible Business: Policies, Practices, and Metrics.																																																																																																																																					
<b>Unit - II</b>	<b>GREEN ASSETS AND MODELING</b>										Periods	<b>9</b>																																																																																																																									
Green Assets: Buildings, Data Centers, Networks, Devices, Computer and Earth Friendly peripherals, Greening Mobile devices – Green Business Process Management: Modeling, Optimization, and Collaboration																																																																																																																																					

– Green Enterprise Architecture – Environmental Intelligence – Green Supply Chains .			
<b>Unit – III</b>	<b>GRID FRAMEWORK</b>	Periods	<b>9</b>
Virtualizing of IT Systems – Role of Electric Utilities, Telecommuting, Teleconferencing and Teleporting – Materials Recycling – Best Ways for Green PC – Green Data Center – Green Grid Framework. Optimizing Computer Power Management, Seamless Sharing Across Systems. Collaborating and Cloud Computing, Virtual Presence.			
<b>Unit - IV</b>	<b>GREEN COMPLIANCE</b>	Periods	<b>9</b>
Socio-Cultural Aspects of Green IT – Green Enterprise Transformation Roadmap – Green Compliance: Protocols, Standards, And Audits – Emergent Carbon Issues: Technologies and Future. Best Ways to Make Computer Greener.			
<b>Unit – V</b>	<b>GREEN INITIATIVES</b>	Periods	<b>9</b>
Green Initiative Drivers and Benefits with IT - Resources and Offerings to Assist Green Initiatives. - Green Initiative Strategy with IT - Green Initiative Planning with IT - Green Initiative Implementation with IT - Green Initiative Assessment with IT. The Environmentally Responsible Business Strategies (ERBS)			
<b>Total Periods</b>			<b>45</b>

Content of the syllabus			
Unit – I	Basics of Java	Periods	9
The Genesis of Java - Overview of Java - Data Types, Variables, and Arrays - Operators - Control Statements - Introducing Classes - Methods and Classes. Inheritance: Basics - Using Super – Creating a MultilevelHierarchy - Method overriding – Using Abstract Classes.			
Unit - II	Errors and Exception Handling	Periods	9
Packages and Interfaces: Packages - Access Protection - Importing Packages- Interfaces Definitions and Implementations - Compile time errors –Run time errors – Exception Handling: Types - Try and Catch -Throw - Finally – User defined exceptions.			
Unit – III	Streams and Threads	Periods	9
File - The Byte Streams - The Character Streams - Using Stream I/ O - Serialization. Java threads – Priorities – Synchronization – Thread class and Runnable interfaces – Creating threads – Multiple threads – Inter thread communication.			
Unit - IV	String Handling	Periods	9
String Handling: Special String operations and Methods - String Buffer - Exploring java.lang: Simple type Wrappers - System - Math - Collections Framework: Collections Interfaces and Classes - Utility Classes:String Tokenizer - Date and Time.			
Unit – V	Applets, Event Handling and AWT	Periods	9
Applet Basics - Applet Architecture - Applet Display Methods - Parameter Passing - Event Handling Mechanisms - Event Classes and Listener – Graphics , Colors and Fonts - AWT Controls - Layout Managers and Menus.			
Total Periods			45

Course Objective	The student should be made to,																																																																																																																																																			
	<ul style="list-style-type: none"><li>• Study the basics of TCP/IP protocols and sockets.</li><li>• Develop the applications of TCP echo client and server, I/O model. Enhance the socket methods options and elementary UDP socket options.</li><li>• To know about the difference between IPV4 and IPV6 protocols, functions of raw socket.Study the basic simple network management system.</li></ul>																																																																																																																																																			
Course Outcome	At the end of the course, the student should be able to,											Knowledge Level																																																																																																																																								
	CO1: Demonstrate advanced knowledge of networking, understand the keyprotocols which support the Internet											K3																																																																																																																																								
	CO2: Be familiar with several common programming interfaces for network communication.											K2																																																																																																																																								
	CO3: Demonstrate advanced knowledge of programming for network communications.											K3																																																																																																																																								
	CO4: Make use of different types of I/O such as non-blocking I/O and event driven I/O, have a detailed knowledge of the TCP/UDP Sockets.											K2																																																																																																																																								
	CO5: Be familiar with the simple network management information system.											K2																																																																																																																																								
Pre-requisites	Computer Networks

<b>Content of the syllabus</b>			
<b>Unit – I</b>	<b>ELEMENTARY TCP SOCKETS</b>	<b>Periods</b>	<b>9</b>
Introduction to socket programming – Overview of TCP / IP protocols – Introduction to sockets – Socket address structures – Byte ordering functions – Address conversion functions – Elementary TCP sockets – Socket – Connect – Bind – Listen – Accept – Read – Write – Close functions – Iterative server – Concurrent server.			
<b>Unit – II</b>	<b>APPLICATION DEVELOPMENT</b>	<b>Periods</b>	<b>9</b>
TCP echo server – TCP echo client – POSIX signal handling – Server with multiple clients – Boundary conditions – Server process crashes – Server host crashes – Server crashes and reboots – Server shutdown – I/O multiplexing – I/O models – Select function – Shutdown function – TCP echo server (with multiplexing) – Poll function – TCP echo client (with multiplexing)			
<b>Unit – III</b>	<b>SOCKET OPTIONS, ELEMENTARY UDP SOCKETS</b>	<b>Periods</b>	<b>9</b>
Socket options – Getsocket and set socket functions – Generic socket options – IP socket options – ICMP socket options – TCP socket options – Elementary UDP sockets – UDP echo server – UDP echo client – Multiplexing TCP and UDP sockets – Domain Name System – Gethostbyname function – IPV6 support in DNS – Gethostbyadr function – Getservbyname and getservbyport functions.			
<b>Unit – IV</b>	<b>ADVANCED SOCKETS</b>	<b>Periods</b>	<b>9</b>
IPV4 and IPV6 interoperability – Threaded servers – Thread creation and termination – TCP echo server using threads – Mutexes – Condition variables – Raw sockets – Raw socket creation – Raw socket output – Rawsocket input – Ping program – Trace route program.			
<b>Unit – V</b>	<b>SIMPLE NETWORK MANAGEMENT</b>	<b>Periods</b>	<b>9</b>
SNMP network management concepts – SNMP management information – Standard MIB,,s – SNMP V1 protocol and practical issues – Introduction to RMON, SNMP V2 and SNMP V3.			
<b>Total Periods</b>			<b>45</b>

Content of the syllabus			
Unit – I	INTRODUCTION TO SOA WITH WEB SERVICES	Periods	9
Service Oriented Enterprise – Service Oriented Architecture (SOA) – SOA and Web Services – Multi-Channel Access – Business Process management – Extended Web Services Specifications.			
Unit - II	SOA AND WEB SERVICES	Periods	9
Web Services Platform – Service Contracts – Service-Level Data Model – Service Discovery – Service-Level Security – Service-Level Interaction patterns – Atomic Services and Composite Services – Proxies and Skeletons-Introduction to REST –Designing a REST Service –Introduction to Micro services.			
Unit – III	SOA AND MULTICHANNEL ACCESS	Periods	9
Multi-Channel Access – Business Benefits – SOA for Multi Channel Access – Tiers – Business Process Management – Concepts – BPM - SOA and Web Services – WS- BPEL – Web Services Composition			
Unit - IV	EXTENDED WEB SERVICES SPECIFICATION	Periods	9
Metadata Management - Metadata Specification – XML-WSDL 2.0-UDDI-Addressing-Policy-WS policy-WSPL-WSDL 2.0 features and properties-comparing the policy specifications-WS Metadata Exchange.			
Unit – V	WEB SERVICES SECURITY	Periods	9
Overarching concern, Core Concepts, Summary of Challenges, Threats and Remedies, Securing the Communications Layer, Message Level Security-Data Level Security.

<b>U19CTV12</b>	<b>Socket Programming</b>		3	0	0	0	40	60	100						
<b>Course Objective</b>	The main objective of this course is to:														
	• To learn different socket function and implement client server applications using sockets														
	• To conduct experiments to know how different internet protocols like TCP/IP works														
	• To analyze various application program like TELNET, DNS, DHCP														
	• Build different application like Routing, Load balancing & Security														
<b>Course Outcome</b>	• To apply protocols get adapted to emerging technologies														
	The students who complete this course successfully are expected to:												Knowledge level		
	<b>CO1:</b> Become familiar with elementary socket functions.												K1		
	<b>CO2:</b> Design and implement client –server applications using Sockets												K2		
	<b>CO3:</b> Learn about functions that convert between names and numeric values and protocols												K2		
<b>CO4:</b> Analyze network protocol functions												K3			
<b>CO5:</b> Learn about the advanced socket functions												K3			
<b>Pre-requisites</b>	-

Content of the syllabus			
Unit – I	Introduction to Network Security	Periods	9
Introduction, simple daytime client, protocol independence, Error handling, simple daytime server, Roadmap to client/server, Overview of TCP/IP protocol- TCP connection establishment and termination, TCP state transition diagram – Time-wait state, SCTP association establishment and termination, TCP port numbers and concurrent servers, Buffer size and limitations, standard internet services, protocol usage by common, Internet applications.			
Unit – II	Socket Functions	Periods	9
Socket function, connect function, bind function, listen function, accept function, Fork function, exec function, concurrent servers, close function-get sock name and get peer name, TCPEcho server, TCPEcho client, normal startup and termination, POSIX signal handling, Wait and Waitpid functions, Termination of server process, Crashing and rebooting of server host.			
Unit - III	Protocol Functions	Periods	9
Get sock opt function, set sock opt function, IPV4, ICMP, TCP socket options, UDP Echo server and client, recvfrom function, send to function, Connect function with UDP, dg_cli function, lack of flowcontrol with UDP			
Unit – IV	DNS Socket Functions	Periods	9
DNS, resolvers and name servers, gethostbyname function, gethostbyaddr function, getservbyname, getservbyport function, tcp_connect function- tcp_listen function, udp_client, udp_connect, udp_server function, BOOTP, DHCP.			
Unit – V	Advanced Socket Functions	Periods	9
Internet Protocol, IPV4, IPV6 interoperability, Daemon processes, Daemon processes and the inetdsuperserver, Advanced I/O functions			
Total Periods			45

Content of the syllabus			
Unit– I	INTRODUCTION	Periods	9
Introduction: Definition and Origins of the Word - Classifications of Cybercrimes- Installing and Configuring Kali Linux-Pre-penetration Testing Checklist, Information Gathering-External Pen-testing,Website Penetration Testing-Internal Network Penetration Testing and Wi-Fi Penetration Testing-Network Sniffing, Exploitation- Social Engineering.			
Unit-II	CYBERCRIME: MOBILE AND WIRELESS DEVICES	Periods	9
<b>Trends in Mobility:</b> Credit Card Frauds in Mobile and Wireless Computing Era- Authentication Service Security-Attackson Mobile/CellPhone. <b>Mobile Devices:</b> Security Implications for Organizations-Organizational Measures for Handling Mobile Devices -Laptops: Physical Security Counter measures.			
Unit – III	TOOLS AND METHODS USED IN CYBERCRIME	Periods	9
<b>Introduction:</b> Password Cracking: Online Attacks, Offline Attacks - Strong, Weak and Random Passwords. <b>Keyloggers and Spywares:</b> Software Keyloggers - Hardware Keyloggers – Antikeylogger - Spywares. <b>Virus andWorms:</b> Trojan Horses and Backdoors-Buffer Overflow- Attacks on Wireless Networks.			
Unit-IV	PHISHING AND ORGANIZATIONAL IMPLICATIONS	Periods	9
<b>Phishing and Identity Theft:</b> Phishing - Spear Phishing - Types of Phishing Scams - Phishing Toolkits and Spy Phishing- Phishing Counter measures. <b>Social Media Marketing:</b> Security Risks and Perils for Organizations, Social Computing and the Protecting People's Privacy in the Organization.			
Unit– V	CYBER TERRORISM	Periods	9
Introduction: Intellectual Property in the Cyberspace - Copyright, Patent, Trademarks - Trade Secret – Trade Name Domain Name. Ethical Hackers: The Psychology Mindset and Skills of Hackers and Other Cyber criminals –Sociology of Cyber criminals- Information Warfare.			
Total Periods			45

2. Assignment														
3. End-Semester examinations														
1. Course - end survey														
<b>Content of the syllabus</b>														
<b>Unit – I</b>	<b>COMPUTER SECURITY BASICS</b>										Periods		<b>9</b>	
Computer Security Concepts, OSI Security Architecture, Security Attacks, Security Services, Security Mechanisms, Model for Network Security, Classical Encryption techniques- Substitution and Transposition														

methods, Block Cipher Principles			
Unit - II	ENCRYPTION STANDARDS	Periods	9
Data Encryption Standard- DES Encryption- Key Generation- DES Decryption, Advanced Encryption Standard (AES)- AES Transformation Functions, Multiple Encryption and Triple DES- Triple DES with Two Keys- Triple DES with Three Keys.			
Unit – III	AUTHENTICATION AND HASH FUNCTION	Periods	9
Authentication requirement – Authentication function – MAC – Hash function – Security of hash function and MAC – SHA –Digital signature and authentication protocols - Entity Authentication: Biometrics, Passwords, Challenge Response protocols- Authentication applications – Kerberos, X.509			
Unit - IV	NETWORK SECURITY	Periods	9
Symmetric Key Distribution Using Symmetric Encryption, Symmetric Key Distribution using Asymmetric Encryption, Public Key Distribution , Public Announcement of Public Keys ,Publicly available Directory , Public-Key Authority, Public-Key Certificates, Remote User Authentication principles- Remote user Authentication Using Symmetric Encryption, Kerberos, Remote user Authentication using Asymmetric Encryption.			
Unit – V	SYSTEM SECURITY	Periods	9
Secure Socket Layer and Transport Layer Security, Secure Electronic Transaction, Intruders, Intrusion Detection, Password Management, Malicious Software, Firewalls, Trusted Systems.			
Total Periods			45

<b>Content of the syllabus</b>																
<b>Unit – I</b>		<b>CYBER CRIME</b>										Periods		<b>9</b>		
Introduction to Cyber Crimes –Nature and Scope of Cyber Crime- Types of Cyber Crime: Internet, Hacking, Cracking, Viruses, Virus Attacks, Pornography, Software Piracy, Intellectual property, Legal System of Information Technology, Social Engineering, Mail Bombs, Bug Exploits, and Cyber Security etc.																
<b>Unit - II</b>		<b>LAWS AND ACTS</b>										Periods		<b>9</b>		
Laws and Ethics - Digital Evidence Controls - Evidence Handling Procedures - Basics of Indian Evidence ACT IPC and CrPC - Electronic Communication Privacy ACT - Legal Policies.																

<b>Unit – III</b>	<b>ETHICAL HACKING BASICS</b>	Periods	<b>9</b>
Introduction to Ethical Hacking – Types of hacking – Phases of Ethical hacking. <b>Reconnaissance And Scanning:</b> Footprinting with DNS – Determining Network Range – Google Hacking. Scanning for targets: Identify Active machines – Port Scanning. Enumeration: Windows Security basics – Enumeration Techniques.			
<b>Unit – IV</b>	<b>SYSTEM ATTACK &amp; WEB ATTACKS</b>	Periods	<b>9</b>
Sniffing: Communications basics –Sniffing techniques and tools –Network Roadblocks: Intrusion Detection – Session hijacking, System Attack: Windows system hacking – Password Cracking – Exploiting privileges. Social Engineering: Human Based attack – Computer based attack. Web Server Hacking: Web service architecture			
<b>Unit – V</b>	<b>MALWARES AND PENETRATION TESTING</b>	Periods	<b>9</b>
Web attacks. Web Applications: Web applications attack – Web resources protection. Wireless Attacks – Bluetooth attacks. Malware Attacks: Trojans, viruses and worms. Penetration Testing: Types of Penetration testing – Penetration testing methodologies – Penetration test tools.			
<b>Total Periods</b>			<b>45</b>

Course Assessment Methods																		
Direct																		
1. Continuous Assessment Test I, II & III 2. Assignments / Quiz / Seminar 3. End-Semester examinations																		
Indirect																		
1. Course - end survey																		
Content of the syllabus																		
Unit – I			INTRODUCTION												Periods		9	
Introduction to Semantic Web: Limitations of current Web - Development of Semantic Web - Emergence of the Social Web - Social Network analysis: Development of Social Network Analysis - Key concepts and measures in network analysis - Electronic sources for network analysis: Electronic discussion networks- Web-based networks - Applications of Social Network Analysis.																		

Unit - II	MODELLING, AGGREGATING AND KNOWLEDGE REPRESENTATION	Periods	9
Ontology and their role in the Semantic Web: Ontology-based knowledge Representation - Ontology languages for the Semantic Web: Resource Description Framework - Web Ontology Language - Modeling and aggregating social network data: State-of-the-art in network data representation - Ontological representation of social individuals - Aggregating and reasoning with social network.			
Unit – III	EXTRACTION AND MINING COMMUNITIES IN WEB SOCIAL NETWORKS	Periods	9
Extracting evolution of Web Community from a Series of Web Archive - Detecting communities in social networks - Definition of community - Evaluating communities - Methods for community detection and mining - Applications of community mining algorithms - Tools for detecting communities social network infrastructures and communities - Decentralized online social networks - Multi-Relational characterization of dynamic social network communities			
Unit – IV	PREDICTING HUMAN BEHAVIOUR AND PRIVACY ISSUES	Periods	9
Understanding and predicting human behaviour for social communities - User data management - Inference and Distribution - Enabling new human experiences - Context - Awareness - Privacy in online social networks - Trust in online environment - Trust models based on subjective logic - Trust derivation based on trust comparisons - Attack spectrum and countermeasures.			
Unit – V	VISUALIZATION AND APPLICATIONS OF SOCIAL NETWORKS	Periods	9
Graph theory - Centrality - Clustering - Node-Edge Diagrams - Matrix representation - Visualizing online social networks, Visualizing social networks with matrix-based representations - Matrix and Node-Link Diagrams - Hybrid representations - Applications - Cover networks - Community welfare.			
Total Periods			45

<b>Unit – I</b>		<b>INTRODUCTION</b>												Periods		<b>9</b>			
History–Semantic Web Layers– Semantic Web technologies–Semantics in Semantic Web–XML: Structuring–Namespaces – Addressing–Querying–Processing																			

Unit - II	RESOURCE DESCRIPTION FRAMEWORK	Periods	9
RDF and Semantic Web – Basic Ideas – RDF Specification – RDF Syntax: XML and Non-XML – RDF elements – RDF relation – RDF and Semantic Web – Basic Ideas – RDF Specification – RDF Syntax: XML and Non-XML – RDF elements – RDF relationship: Reification, Container, Collaboration – RDF Schema – Editing, Parsing, Browsing, RDF/XML – RQL – RDQL			
Unit – III	ONTOLOGY	Periods	9
Why Ontology – Ontology movement – OWL – OWL Specification – OWL Elements – OWL constructs: Simple and Complex – Ontology Engineering : Introduction – Constructing Ontologies – Reusing Ontologies – On-To Knowledge Semantic Web architecture			
Unit – IV	LOGIC AND INFERENCE	Periods	9
Logic – Description Logics - Rules – Monotonic Rules: Syntax, Semantics and Examples – Non monotonic Rules – Motivation, Syntax and Examples – Rule Markup in XML: Monotonic Rules and Non-Monotonic Rules			
Unit – V	APPLICATIONS OF SEMANTIC WEB TECHNOLOGIES	Periods	9
RDF Uses: Commercial and Non-Commercial use – Sample Ontology – E-Learning – Web Services – Web mining – Horizontal information – Data Integration – Future of Semantic Web

Content of the syllabus			
Unit – I	Computer Investigations	Periods	9
Computer Investigations: Preparing a Computer investigation – Taking asystematic approach – Assessing the case – Planning Investigation – Securing evidence. Procedures for Corporate High: Tech investigations – Conducting an Investigation – Completing the case.			
Unit – II	Data Acquisition	Periods	9
Understanding storage formats for digital evidence – Determining the best acquisition method - Contingency planning for image acquisitions – Using Acquisition tools: Windows XP Write- protection with USB Devices – Validating Data Acquisitions: Windows Validation Methods – Performing RAID Data Acquisitions – Using Remote Network Acquisition tools – Using other Forensics Acquisition tools.			
Unit – III	Processing Crime and Incident Scenes	Periods	9
Identifying Digital Evidence – Collecting Evidence in Private Sector Incident Scenes – Processing Law Enforcement Crime Scenes – Preparing for a Search –Securing a Computer Incident or Crime Scene – Seizing Digital Evidence at the Scene –Storing Digital Evidence –Obtaining a Digital Hash – Reviewing a Case.			
Unit – IV	Computer Forensic Tools, Analysis and Validation	Periods	9
Evaluating Computer Forensics Tool Needs -Computer Forensics Software Tools – Computer Forensics Hardware Tools –Validating and Testing Forensic Software - Computer Forensics Analysis and Validation: Determining Data Collection and Analysis –Validating Forensic Data –Addressing Data-Hiding Techniques –Performing Remote Acquisitions.			
Unit – V	Recovering Graph Files, Email Investigations	Periods	9
Recognizing Graph File- Understanding Data Compression- Locating And Recovering Graphic Files- Identifying Un known File Formats- Understanding Copyright Issues- Investigating Email Crimes And Violations- Understanding Email Servers- Using Specialized Email Forensic Tools.			
Total Periods			45
CASE STUDY:			
Only for Assignment not for end sem examination.			
1. Illegal money transfer 2. Network data reveals theft of trade secrets 3. Data from vehicle infotainment, telematics and black box systems 4. Intellectual property theft

<b>Course Assessment Methods</b>														
<b>Direct</b> 1. Continuous Assessment Test I, II & III 2. Assignment. 3. End-Semester examinations														
<b>Indirect</b> 1.Course - end survey														

Content of the syllabus			
Unit – I	INTRODUCTION TO BIOMETRICS	Periods	9
History of Biometrics ,Types of Biometric Traits, General Architecture of Biometric System, BiometricCharacteristics- Basic working of Biometric Matching , Biometric System Errorand Performance Measures- Design of Biometric Systems , Identification and Verification Concepts- Applications ofBiometrics, Benefits of Biometrics versus Traditional Authentication Methods.			
Unit - II	FACE, FINGERPRINT, RETINA AND IRIS BIOMETRICS	Periods	9
Introduction to Face, Finger Print Retina and Iris biometrics-Design of Face Recognition System, Neural Network for Face Recognition-Face Detection in video sequences, Challenges in Face Biometrics, Face Recognition Methods, Advantages and Disadvantages8.-Fingerprint Biometrics, Fingerprint Recognition System, Minutiae Extraction.-Design of Retina and Iris Recognition System, Iris Segmentation Method.- Determination of Iris Region, Experimental Results of Iris Location, Applications of Iris Biometrics, Advantages and Disadvantages.			
Unit - III	PRIVACY ENHANCEMENT AND CRYPTOGRAPHY FOR BIOMETRICS	Periods	9
Introduction to privacy enhancement and biometric cryptography.-Privacy concerns associated with deployment, identity and privacy, privacy concerns, biometrics with privacy enhancement.- Comparison of biometrics in terms of privacy, soft biometrics.-General purpose crypto system, Model cryptography and attacks.- Symmetrickey ciphers, cryptographic algorithms-Introduction to Multimodal biometrics, Basic architecture of multimodal biometrics-Multimodal biometrics using face and ear, Characteristic and advantages of multimodal biometrics.			
Unit - IV	IMAGE ENHANCEMENT TECHNIQUES	Periods	9
Introduction to Image Enhancement Techniques, Current Research in Image Enhancement Techniques- Image Enhancement, Frequency Domain Filters, Databases and Implementation.- Experimental results ofImage Enhancement Techniques.			
Unit - V	BIOMETRICS: SCOPE AND FUTURE, REPOSITORIES FOR DATABASE AND BIOMETRICSTANDARDS	Periods	9
Scope and future market of biometrics-Applications of biometrics, Biometrics and information technology infrastructure, Role of biometrics in enterprise security, Role of biometrics in border security-Smart card technology and biometrics, Radio frequency identification biometrics, DNA biometrics, Comparative study of various biometric techniques. Biometric Databases and Biometric Standards.

<b>Course Assessment Methods</b>														
1. Continuous Assessment Test I, II & III														
2. Assignment/Quiz/Seminar														
3. End-Semester examinations														
1. Course - end survey														

Content of the syllabus			
Unit – I	QUERY PROCESSING	Periods	9
Basic concepts of query processing - converting SQL queries into Relational Algebra - Basic Algorithms for executing query operations - Query tree and query graph - Heuristic optimization of query tree.			
Unit – II	INDEXING, HASHING AND CURRENT ISSUES	Periods	9
Ordered indices – B tree index files – B+ Tree index files – Multiple key access – Static and Dynamic Hashing – Bitmap indices- Active Database Concepts – Introduction to Deductive Databases – Clausal Form and Horn Clauses – Interpretation of Rules – Use of Relational Operations – Multimedia Databases			
Unit - III	OBJECT ORIENTED AND EXTENDED RELATIONAL DATABASE TECHNOLOGIES	Periods	9
Overview of Object oriented database - OO Concepts - Encapsulation of Operations and methods – Inheritance - Object Model - Object definition language - Object Query Language - Object Relational Concepts.			
Unit – IV	DATABASE SECURITY	Periods	9
Introduction to Database Security Issues- Discretionary Access Control Based on Granting and Revoking Privileges- Mandatory Access Control and Role-Based Access Control for Multilevel Security- Introduction to Statistical Database Security- Encryption and Public Key Infrastructures- Challenges to Maintaining Database Security- Oracle Label-Based Security			
Unit - V	ADVANCED DATABASE TECHNIQUES	Periods	9
NoSQL (Not Only SQL)) - Introduction to MongoDB – Term Used in RDBMS and MongoDB – Data Types in MongoDB – MongoDB Query Language- MongoDB Atlas – Introduction to Apache Cassandra – CQL Data Types – CQLSH – CRUD operations –Collections – Using a counter – Time to Live – Alter Commands – Import and Export – Querying System Tables.

Content of the syllabus			
Unit – I	Introduction to data science	Periods	9
Benefits of Data Science – Facets of Data – Data Science Process –Big Data Ecosystem and Data Science–Example using Hadoop. The Data Science Process: Overview – Defining Research Goals – Retrieving Data – Data Preparation – Exploratory Data Analysis – Building Models – Building Applications.			
Unit – II	Machine learning and handling big data	Periods	9
Applications for Machine Learning in Data Science – Machine Learning in Data Science Process – The Modeling Process. Handling Large Data: Problems in Handling Large Data – General Techniques – Programming Tips – Case Studies.			
Unit – III	Distributed data storage and processing	Periods	9
Distributing Data Storage and Processing with Frameworks: Hadoop – Spark – Case Study: Assessing Risk with Loaning Money – OWASP Introduction.			
Unit – IV	Data and Storage API Service	Periods	9
NoSQL and graph database: Introduction: ACID– CAP Theorem – The BASE Principles of NoSQL Databases – NoSQL Database Types – Case Study: What disease is that?– Graph Database: Introducing Connected Data and Graph Databases – Connected Data Example.			
Unit – V	Text Mining and Text Analytics	Periods	9
Test Mining in Real World – Text Mining Techniques: Bag of Words – Stemming and Lemmatization – Decision Tree Classifier –Case Study: Classifying Reddit Posts.

Content of the syllabus			
Unit – I	INTRODUCTION	Periods	9
Introduction- Historical Trends in Deep Learning, Applied Math and Machine Learning Basics, Learning Algorithms, Capacity, Overfitting and Underfitting, Hyper parameters and Validation Sets, Estimators, Bias and Variance, Maximum Likelihood Estimation, Bayesian Statistics.			
Unit – II	LEARNING ALGORITHMS	Periods	9
Supervised Learning Algorithms, Unsupervised Learning Algorithms, Stochastic Gradient Descent Building a Machine Learning Algorithm, Challenges Motivating Deep Learning			
Unit – III	DEEP NETWORKS	Periods	9
Deep Feed forward Networks, Gradient-Based Learning, Hidden Units, Architecture Design, Back-Propagation and Other Differentiation Algorithms.			
Unit - IV	REGULARIZATION AND OPTIMIZATION	Periods	9
Parameter Norm Penalties - Norm Penalties as Constrained Optimization - Regularization and Under-Constrained Problems - Dataset Augmentation -Noise Robustness - Semi-Supervised Learning - Multitask Learning, Pure Optimization - Challenges in Neural Network Optimization.			
Unit – V	CONVOLUTIONAL NETWORKS AND APPLICATIONS	Periods	9
Convolutional Networks: Convolution Operation –Pooling – Functions - Random or Unsupervised Feature, Application: Large-Scale Deep Learning - Computer Vision - Speech Recognition - Natural Language Processing.			
Total Periods			45

<b>Course Objective</b>		The Main Objective of the course is to <ul style="list-style-type: none"><li>• Provide the student with knowledge of various levels of analysis involved inNLP.</li><li>• Understand the applications of NLP.</li><li>• Gain knowledge in automated Natural Language Generation and Machine Translation.</li></ul>															
<b>Course Outcome</b>		At the end of the course, the student should be able to,											Knowledge Level				
		<b>CO1:</b> Extract information from text automatically using concepts and methods from natural language processing (NLP) including stemming, n-grams, POS tagging, and parsing.											K2				
		<b>CO2 :</b> Develop speech-based applications that use speech analysis (phonetics, speech recognition, and synthesis).											K3				
		<b>CO3 :</b> Analyze the syntax, semantics, and pragmatics of a statement written in a natural language.											K2				
		<b>CO4 :</b> Apply machine learning algorithms to natural language processing.											K3				
		<b>CO5 :</b> Evaluate the performance of NLP tools and systems.											K4				
<b>Pre-requisites</b>		<b>-</b>															
<b>CO / PO Mapping</b> (3/2/1 indicates strength of correlation) 3-Strong, 2 – Medium, 1 - Weak																<b>CO/PSO Mapping</b>	
Programme Outcomes (POs)														PSOs

<b>Course Assessment Methods Direct</b>																	
<b>Direct</b> 1. Continuous Assessment Test I, II & III 2. Assignment. 3. End-Semester examinations																	
<b>Indirect</b> 1.Course - end survey																	

Content of the syllabus			
Unit – I	OVERVIEW AND MORPHOLOGY	Periods	9
Introduction – Models -and Algorithms - -Regular Expressions Basic Regular Expression Patterns –Finite State Automata-Morphology -Inflectional Morphology - Derivational Morphology --Finite-StateMorphological Parsing --Porter Stemmer.			
Unit - II	WORD LEVEL AND SYNTACTIC ANALYSIS	Periods	9
-N-grams Models of Syntax - Counting Words - Unsmoothed N-grams-Smoothing- Back off Deleted Interpolation – Entropy - English Word Classes - Tagsets for English-Part of Speech Tagging- Rule Based Part of Speech Tagging - Stochastic Part of Speech Tagging - Transformation-Based Tagging.			
Unit - III	CONTEXT FREE GRAMMARS	Periods	9
Context Free Grammars for English Syntax- Context- Free Rules and Trees --Sentence- Level Constructions–Agreement – Sub Categorization-Parsing – Top-down – Earley Parsing -feature Structures – Probabilistic Context-Free Grammars.			
Unit - IV	SEMANTIC ANALYSIS	Periods	9
Representing Meaning - Meaning Structure of Language - First Order Predicate Calculus-Representing Linguistically Relevant Concepts -Syntax- Driven Semantic Analysis - Semantic Attachments -Syntax- Driven Analyzer-- Robust Analysis - Lexemes and Their Senses - Internal Structure - Word Sense Disambiguation -Information Retrieval.			
Unit - V	LANGUAGE GENERATION AND DISCOURSE ANALYSIS	Periods	9
Discourse -Reference Resolution - Text Coherence - Discourse Structure – Coherence-Dialog andConversational Agents - Dialog Acts – Interpretation - Conversational Agents-Language Generation – Architecture -Surface Realization- Discourse Planning .-Machine Translation -Transfer Metaphor-Interlingua – Statistical Approaches.			
Total Periods			45

<b>Content of the syllabus</b>			
<b>Unit – I</b>	<b>Artificial Neural Networks</b>	Periods	<b>9</b>
Fundamental Concept – Basic Model of ANN – Terminologies of ANN - Supervised Learning Neural Networks: Perception Networks - Adaptive Linear Neuron – Multiple Adaptive Linear Neurons – Back Propagation Network-Unsupervised Learning Neural Networks:Kohenenself-organizing Feature Maps-Learning vector Quantization.			

<b>Unit - II</b>	<b>Fuzzy Systems</b>	Periods	<b>9</b>
Classical sets – Fuzzy sets - Classical relation – Fuzzy relations - Defuzzification – Fuzzy rule base and approximate reasoning: Fuzzy reasoning – Fuzzy Inference Systems - Fuzzy decision making – Fuzzy logic control systems.			
<b>Unit – III</b>	<b>Special Networks</b>	Periods	<b>9</b>
Counter propagation Networks – Adaptive Resonance Theory Network – Simulated Annealing Network – Boltzmann Machine – Gaussian Machine – Cauchy Machine – Probabilistic Neural Net – Cascade Correlation Network.			
<b>Unit - IV</b>	<b>Genetic Algorithms</b>	Periods	<b>9</b>
Introduction - Basic operators and terminologies in GA - Traditional Vs Genetic Algorithm - Simple GA – General Genetic Algorithm - Classification of Genetic Algorithm - Holland classifier systems – Genetic Programming.			
<b>Unit – V</b>	<b>Applications of Soft Computing</b>	Periods	<b>9</b>
Image Fusion - Neural network classification - Traveling salesman problem using Genetic algorithm - Genetic algorithm based Internet searching technique – Soft Computing Based Hybrid Fuzzy Controllers – Soft Computing Based Rocket Engine Control.			
<b>Total Periods</b>			<b>45</b>

Content of the syllabus			
Unit –I	Business View of IT Applications	Periods	9
Introduction to Business View of Information -Core Business Processes – Baldrige Business Excellence Framework – Purpose of using IT in Business – Characteristics of Internet-ready IT Applications – Enterprise Applications – Information users and their requirements.- Types of Digital Data: Introduction – Structured Data – Unstructured Data – Semi-Structured Data – Difference between semi-structured and structured data.			
Unit - II	Business Intelligence and Data Interaction	Periods	9
Business Intelligence: Definition – Evolution – Need for BI – BI Value Chain – Business Analytics – BI Framework – BI Users – BI Applications – BI Roles and Responsibilities – Data Integration : Need for Data Warehouse – Definition of Data Warehouse – Data mart – Ralph Kimball,,s Approach vs. W.H.Inmon,,s Approach – Goals of Data Warehouse – ETL Process – Data Integration Technologies – Data Quality – Data Profiling.			
Unit –III	OLTP, OLAP and Multidimensional Data Modeling	Periods	9
OLTP – OLAP – OLAP Architectures – Data Models – Role of OLAP Tools in BI – OLAP Operations – Basics of Data Modeling – Types of Data Model – Data Modeling Techniques – Fact Table – Dimension Table – Dimensional Models – Dimensional Modeling Life Cycle – Designing the Dimensional Model.			
Unit - IV	Performance Management and Enterprise Reporting	Periods	9
Measures, Metrics, KPIs and Performance Management: Understanding Measures and Performance – Measurement System – Role of metrics – KPIs – Enterprise Reporting: Reporting Perspectives – Report Standardization and Presentation Practices – Enterprise Reporting Characteristics – Balanced Scorecard – Dashboards – Creating Dashboards – Scorecards vs. Dashboards – Analysis.			
Unit –V	BI Applications	Periods	9
Understanding Business Intelligence and Mobility– the need for business intelligence on the move – BI Mobility time line – Data Security Concerns for Mobile BI – Business Intelligence and Cloud Computing – Business Intelligence for ERP systems – Social CRM and Business Intelligence

Content of the syllabus			
Unit – I	DIGITAL IMAGE FUNDAMENTALS	Periods	8
Introduction – Origin – Steps in Digital Image Processing – Components – Elements of Visual Perception – Image Sensing and Acquisition – Image Sampling and Quantization – Relationships between pixels - color models.			
Unit – II	IMAGE ENHANCEMENT	Periods	10
Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering – Frequency Domain: Introduction to Fourier Transform– Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters.			
Unit – III	IMAGE RESTORATION AND SEGMENTATION	Periods	9
Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Notch Filters – Optimum Notch Filtering – Inverse Filtering – Wiener filtering Segmentation:Detection of Discontinuities– Edge Linking and Boundary detection – Region based segmentationMorphological processing-erosion and dilation.			
Unit – IV	WAVELETS AND IMAGE COMPRESSION	Periods	9
Wavelets – Subband coding - Multiresolution expansions - Compression: Fundamentals – Image Compression models – Error Free Compression – Variable Length Coding – Bit-Plane Coding – Lossless Predictive Coding – Lossy Compression – Lossy Predictive Coding – Compression Standards.			
Unit – V	IMAGE REPRESENTATION AND RECOGNITION	Periods	9
Boundary representation – Chain Code – Polygonal approximation, signature, boundary segments – Boundary description – Shape number – Fourier Descriptor, moments- Regional Descriptors – Topological feature, Texture - Patterns and Pattern classes - Recognition based on matching.			
Total Periods			45

<b>Course Objective</b>		The student should be made to,													
		• Study the basic concepts of knowledge management.													
		• Learn the life cycle evolution of knowledge management.													
		• Study the basic concepts of Expert Knowledge.													
		• Be familiar with tools.													
<b>Course Outcome</b>		• Learn the Knowledge Transfer and Sharing of Knowledge Management.													
		At the end of the course, the student should be able to,													
		<b>KL</b>													
		<b>CO1:</b> Implement knowledge management concepts, in all aspect.													
		<b>K2</b>													
<b>Pre-requisites</b>		<b>CO2:</b> Demonstrate the knowledge management life cycle.													
		<b>K2</b>													
		<b>CO3:</b> Compute the fuzzy logic in designing expert system.													
		<b>K3</b>													
		<b>CO4:</b> Analyze the knowledge management system using tools & testing techniques.													
<b>CO5:</b> Infer the knowledge transfer & shearing in knowledge management application.		<b>K2</b>													
		<b>K3</b>

2. Assignments / Quiz / Seminar															
3. End-Semester examinations															
<b>Indirect</b>															
1. Course - end survey															

<b>Content of the syllabus</b>															
<b>Unit – I</b>		<b>KNOWLEDGE MANAGEMENT</b>										Periods		<b>9</b>	
KM Myths – KM Life Cycle – Understanding Knowledge – Knowledge, intelligence –Experience – Common Sense – Cognition and KM – Types of Knowledge – Expert Knowledge – Human Thinking and Learning.															
<b>Unit - II</b>		<b>KNOWLEDGE MANAGEMENT SYSTEM LIFE CYCLE</b>										Periods		<b>9</b>	
Challenges in Building KM Systems – Conventional vs KM System Life Cycle (KMSLS) – Knowledge Creation and Knowledge Architecture – Nonaka’s Model of Knowledge Creation and Transformation. Knowledge Architecture.															

<b>Unit – III</b>	<b>KNOWLEDGE CAPTURING</b>	Periods	<b>9</b>
Evaluating the Expert – Developing a Relationship with Experts – Fuzzy Reasoning and the Quality of Knowledge – Knowledge Capturing Techniques, Brain Storming – Protocol Analysis – Consensus Decision Making – Repertory Grid- Concept Mapping – Blackboarding.			
<b>Unit – IV</b>	<b>KNOWLEDGE CONVERSION AND TESTING</b>	Periods	<b>9</b>
Modes of Knowledge Conversion – Codification Tools and Procedures – Knowledge Developer’s Skill Sets – System Testing and Deployment – Knowledge Testing – Approaches to Logical Testing, User Acceptance Testing – KM System Deployment Issues – User Training – Post implementation.			
<b>Unit – V</b>	<b>KNOWLEDGE TRANSFER AND SHARING</b>	Periods	<b>9</b>
Transfer Methods – Role of the Internet – Knowledge Transfer in e-world – KM System Tools – Neural Network – Association Rules – Classification Trees – Data Mining and Business Intelligence – Decision Making Architecture – Data Management – Knowledge Management Protocols – Managing Knowledge Workers.			
<b>Total Periods</b>			<b>45</b>

## VERTICAL IV : INTERNET OF THINGS & CLOUD COMPUTING

	<b>VIVEKANANDHA COLLEGE OF ENGINEERING FOR WOMEN</b> (Autonomous Institution, Affiliated to Anna University ,Chennai) Elayampalayam, Tiruchengode – 637 205																
Programme	<b>B.E. / B.Tech.</b>	Programme Code						Regulation			<b>2019</b>						
Department	<b>CSE, IT &amp; CST</b>					Semester			<b>-</b>								
Course Code	Course Name	Periods Per Week			Credit	Maximum Marks											
		L	T	P	C	CA		ESE	Total								
<b>U19CSV41</b>	<b>Embedded Systems</b>	3	0	0	3	40		60	100								
<b>Course Objective</b>	The Main Objective of the course is to																
	<ul style="list-style-type: none"><li>• Learn the architecture and programming of ARM processor.</li><li>• Be familiar with the embedded computing platform design and analysis.</li><li>• Learn the system design techniques and networks for embedded systems</li><li>• Discuss the major components that constitute an embedded system.</li><li>• Implement small programs to solve well-defined problems on an embedded platform.</li></ul>																
	At the end of the course, the student should be able to,																
	Knowledge level																
<b>Course Outcome</b>	<b>CO1:</b> Describe the architecture & programming of ARM processor.												K1				
	<b>CO2:</b> Discuss different memory management schemes.												K2				
	<b>CO3:</b> Analyze embedded core based design & real time OS												K3				
	<b>CO4:</b> Use the system design techniques to develop software for embedded system												K4				
	<b>CO5:</b> Formulate real time examples using embedded system												K2				
<b>Pre-requisites</b>	-																
<b>CO / PO Mapping</b> (3/2/1 indicates strength of correlation) 3-Strong, 2 – Medium, 1 – Weak																<b>CO/PSO Mapping</b>	
<b>COs</b>	<b>Programme Outcomes (POs)</b>												<b>PSOs</b>				
	<b>PO 1</b>	<b>PO 2</b>	<b>PO 3</b>	<b>PO 4</b>	<b>PO 5</b>	<b>PO 6</b>	<b>PO 7</b>	<b>PO 8</b>	<b>PO 9</b>	<b>PO 10</b>	<b>PO 11</b>	<b>PO 12</b>	<b>PSO1</b>	<b>PSO 2</b>			
<b>CO 1</b>	3	3	2		2								2	2			
<b>CO 2</b>	2	1	2		1								3	2			
<b>CO 3</b>	3	2	2		1								2	1			
<b>CO 4</b>	2	3	3		2								2	2			
<b>CO 5</b>	2	2	2		1								3	2			
<b>Course Assessment Methods</b>																	
1. Continuous Assessment Test I, II & III																	
2. Assignment / Quiz / Seminar																	
3. End-Semester examinations																	
1. Course - end survey																	
<b>Content of the syllabus</b>																	
<b>Unit – I</b>		<b>EMBEDDED COMPUTING</b>										Periods		<b>9</b>			
Introduction to Embedded Systems –Structural units in embedded processor, selection of processor & memory management methods devices- Embedded system design process. Embedded processors – 8051																	

Microcontroller, ARM processor – Architecture, Instruction sets and programming.			
<b>Unit - II</b>	<b>MEMORY AND INPUT / OUTPUT MANAGEMENT</b>	Periods	<b>9</b>
Programming Input and Output – Memory system mechanisms – Memory and I/O devices and interfacing – Interrupts handling.			
<b>Unit – III</b>	<b>PROCESSES AND OPERATING SYSTEMS</b>	Periods	<b>9</b>
Multiple tasks and processes – Context switching – Scheduling policies – Inter process communication mechanisms – Performance issues.			
<b>Unit - IV</b>	<b>EMBEDDED SOFTWARE</b>	Periods	<b>9</b>
Embedded Product Development Life Cycle- objectives, different phases of EDLC, Modeling of EDLC; issues in Hardware-software Co-design, Data Flow Graph, state machine model, Sequential Program Model, concurrent Model, object oriented Model.			
<b>Unit – V</b>	<b>EMBEDDED SYSTEM APPLICATION AND DEVELOPMENT</b>	Periods	<b>9</b>
Case Study of Washing Machine- Automotive Application- Smart card System Application-ATM machine – surveillance camera			
<b>Total Periods</b>			<b>45</b>
<b>Text Books:</b>

<b>Unit – I</b>	<b>BASICS OF SENSORS</b>										Periods	<b>9</b>																																																																																																																								
Introduction- Sensor Vs Transducer, Nature of Sensors, Sensor Output Characteristics, Sensing Technologies, Digital Output Sensors.																																																																																																																																				

<b>Unit – II</b>		<b>APPLICATION SPECIFIC SENSORS</b>		Periods	<b>9</b>
Occupancy and motion detectors: ultrasonic – microwave – capacitive detectors- optical presence sensor, Light Detectors: Photo diodes – photo transistor – photo resistor- CCD and CMOS image sensors, Temperature Sensors: thermos-resistive sensors – thermoelectric contact sensor					
<b>Unit - III</b>		<b>SENSOR WITH MICROCONTROLLER</b>		Periods	<b>9</b>
Introductions, Amplification and Signal Conditioning, Integrated Signal Conditioning, Digital Conversion, MCU Control, MCUs for Sensor Interface, Techniques and Systems Considerations, Sensor Integration					
<b>Unit – IV</b>		<b>WIRELESS SENSING</b>		Periods	<b>9</b>
Wireless Data and Communications, Wireless Sensing Networks, Industrial Wireless Sensing Networks, RF Sensing, Telemetry, RF MEMS, Complete System Consideration.					
<b>Unit – V</b>		<b>SMART APPLICATIONS AND SYSTEM REQUIREMENTS</b>		Periods	<b>9</b>
Automotive Applications, Industrial (Robotic) Applications, Consumer Applications, Future Sensor Plus Semiconductor Capabilities, Future System Requirements.					
<b>Total Periods</b>					<b>45</b>

<b>Course Assessment Methods</b>															
1. Continuous Assessment Test I, II & III															
2. Assignment															
3. End-Semester examinations															
1. Course - end survey															
<b>Content of the syllabus</b>															
<b>Unit – I</b>		<b>SECURITY DESIGN PRINCIPLES</b>										Periods		<b>9</b>	
Security Goals – Secure System Design – Understanding Threats – Designing-In Security – Convenience and Security – Security in Software Requirements – Security by Obscurity – Secure Design Principles – Defense in Depth – Diversity in Defense – Securing the Weakest Link – Fail-Safe Stance.															

<b>Unit – II</b>	<b>SECURE PROGRAMMING TECHNIQUES</b>	Periods	<b>9</b>
Worms and Other Malware – Buffer Overflows – Client State Manipulation – SQL Injection – Password Security – Cross Domain Security in Web Applications – Attack Patterns – Preventing XSRF – Preventing XSS - Preventing XSS.			
<b>Unit - III</b>	<b>SYMMETRIC CIPHERS &amp; INTRODUCTION TO NUMBER THEORY</b>	Periods	<b>9</b>
Overview - Classical Encryption Techniques – Block Ciphers and the Data Encryption Standard – Basic Concepts in Number Theory and Finite Fields – Advanced Encryption Standard – Block Cipher Operation - Fermat,,s and Euler,,s Theory – CRT – Discrete Logarithms.			
<b>Unit – IV</b>	<b>PUBLIC-KEY ENCRYPTION AND HASH FUNCTIONS</b>	Periods	<b>9</b>
Public Key Cryptography and RSA – Diffie-Hellman Key Exchange – Elgamal Cryptographic System – Elliptic Curve Cryptography – Cryptographic Hash Functions – Message Authentication Code - Digital Signature - Certificates.			
<b>Unit - V</b>	<b>SECURITY APPLICATIONS</b>	Periods	<b>9</b>
Security in Operating Systems - Security in the Design of OS – Rootkit- Open Web Application Security – Wireless Network Security – Introduction to Mobile Security.			
<b>Total Periods</b>			<b>45</b>

U19ITV41	SOFTWARE DEFINED NETWORKS	3	0	0	3	40	60	100																																																																																																																																											
Course Objective	The student should be made to, <ul style="list-style-type: none"><li>• Understand the concepts of software defined networks</li><li>• Explore modern approaches like openflow, openstack</li><li>• Learn the interface between networking devices and the software controlling them</li><li>• Know about SDN in data centers.</li><li>• Study about the various applications of SDN.</li></ul>																																																																																																																																																		
Course Outcome	At the end of the course, the student should be able to,										Knowledge Level																																																																																																																																								
	CO1: Differentiate between traditional networks and software defined networks.										K2																																																																																																																																								
	CO2: Understand advanced and emerging networking technologies.										K2																																																																																																																																								
	CO3: Learn how to use SDN controllers to perform complex networking tasks.										K2																																																																																																																																								
	CO4: Demonstrate the skills to do advanced networking research and programming.										K3																																																																																																																																								
	CO5: Apply the knowledge on SDN and measures to solve real world problems										K3																																																																																																																																								
Pre-requisites	Computer Networks

Content of the syllabus			
Unit – I	Introduction to SDN	Periods	9
Introduction to SDN: Basic packet switching terminology – The modern data center – Traditional switch architecture – Autonomous and dynamic forwarding table. Why SDN?: Evolution of switches and control planes – Cost-Data center innovation – Data center needs. The Genesis of SDN: The evolution of networking technology – Forerunners of SDN			
Unit – II	SDN and OpenFlow	Periods	9
How SDN works: Fundamental characteristics of SDN – SDN operation – SDN devices – SDN controllers – Alternate SDN methods. The OpenFlow specification: OpenFlow overview – OpenFlow 1.0 and OpenFlow basics – OpenFlow 1.1 Additions – OpenFlow 1.2 Additions – OpenFlow 1.3 Additions – OpenFlow Limitations.			
Unit – III	SDN Interfaces	Periods	9
SDN Interfaces: Alternative definitions of SDN: Potential drawbacks of open SDN – SDN via APIs – SDN via hypervisor based overlays – SDN via opening up the device – Network Functions virtualization – Alternatives overlap and ranking. SDN open source: Open source licensing issues – OpenFlow source code – Switch implementation – Controller implementations – Orchestration and Network virtualization – Simulation, Testing and Tools – OpenStack – Applying SDN open source			
Unit – IV	SDN in Data Center	Periods	9
Data center definition – Data center demands – Tunneling technologies for the data center- Path technologies in the data center – SDN and shortest path complexity – Ethernet fabrics in the data center – SDN use cases in the data center – Open SDN versus Overlays in the data center – Real-world data center implementation.			
Unit – V	SDN Environments and Applications	Periods	9
SDN in other environment: Wide area networks – Service provider and carrier networks – Campus networks – Hospitality networks – Mobile networks – In-Line network functions – Optical networks. SDN Applications: Reactive versus Proactive applications – A simple reactive Java application – Creating network virtualization tunnels – offloading flows in the data center – Access control for the campus – Traffic engineering for the service providers.

Content of the syllabus			
Unit – I	Introduction	Periods	9
Overview Of Virtualization -Basics of Virtualization - Virtualization Types – Desktop Virtualization,Storage Virtualization – System-level Operating Virtualization – Application Virtualization- Virtualization Advantages, Understanding Hypervisors, Understanding Virtual Machines, Assignment- Installing, windows, Linux on virtual machine.			
Unit – II	Concepts in Creating Virtual Machines	Periods	9
Creating a Virtual machine- Performing P2V Conversions, Loading your Environment, Building a new Virtualmachine, Managing CPUs for a virtual machine-Understanding CPU Virtualization, Configuring VM CPU options, Tuning practices for VM CPUs, Managing Memory for a virtual Machine-Understanding memory virtualization, Configuring VM memory options, Tuning practicesfor VM memory			
Unit - III	Storage Management in Virtual Machine	Periods	9
Managing Storage for a virtual machine-Understanding storage virtualization, Configuring VMStorage , options, Tuning practices for VM storage, SCSI- Speaking SCSI- Using SCSI buses – FiberChannel – Fiber Channel Cables – Fiber Channel Hardware Devices – iSCSI Architecture – Securing iSCSI, Server virtualization concepts, Introduction to server virtualization, Types of servervirtualization technologies, Limitations of server virtualization, Managing Networking for a virtual machine- understanding network virtualization, Configuring VM network options, Tuning practices for Virtual networks.			
Unit – IV	Network Device Virtualization s	Periods	9
Theory Network Device Virtualization - VLANs , VRF Instances- VFIs -Virtual Firewall Contexts Network Device Virtualization, Fundamentals of Virtualization security-Virtualization architecture, Threats to a virtualized environment.			
Unit – V	Security Virtualization	Periods	9
How security must adapt to virtualization, Securing hypervisors-Hypervisor configuration and security, Designing virtual networks for security-comparing virtual and physical networks, Virtual networksecurityconsiderations, Configuring virtual switches for security

Content of the syllabus			
Unit – I	INTRODUCTION TO STORAGE SYSTEM	Periods	9
Introduction to evolution of storage architecture - key data center elements - virtualization, and cloud computing – Host (or compute), connectivity, storage. RAID implementations, techniques and levels along with the impact of RAID on application performance- Components of intelligent storage systems- Front end - Cache - Back end - Physical disk.			
Unit - II	STORAGE NETWORKING TECHNOLOGIES	Periods	9
Fibre channel SAN components, connectivity options - FC protocol stack - FC addressing operations - Zoning - SAN-based virtualization - iSCSI and FCIP protocols for storage access over IP network, Converged protocol FCoE and its components			
Unit – III	BACKUP, ARCHIEVE AND REPLICATION	Periods	9
Business continuity terminologies - BC planning life cycle - Failure analysis - Business impact analysis - BC Technology solutions- Backup and recovery – methods, targets and topologies, Data Deduplication for backup - backup in virtualized environment - Data archive - Local replication in classic virtual environments, Remote replication and migration in a virtualized environments.			
Unit - IV	SECURING STORAGE INFRASTRUCTURE	Periods	9
Information security Framework – Risk Triad – Security Implementations in Storage Networking: FC SAN – NAS – IP SAN – Securing storage infrastructure in Virtualized and Cloud environments.			
Unit – V	MANAGING STORAGE INFRASTRUCTURE	Periods	9
Monitoring storage infrastructure – Storage Infrastructure Management Activities –Storage infrastructure management challenges – Developing Idea solutions - Information lifecycle management - Storage tiering

Content of the syllabus			
Unit – I	OVERVIEW OF BIG DATA ANALYTICS	Periods	9
Introduction to data analytics and big data, Big data mining, Technical elements of the Big Data platform, Analytics Toolkit, Components of the analytics toolkit, , Introduction to Hadoop ,Fundamentals of Hadoop, Hadoop Ecosystem, The core modules of Hadoop, MapReduce..			
Unit – II	INTRODUCTION TO HADOOP YARN	Periods	9
Analyzing data with Unix tools and Hadoop, Scaling Out – Data Flow, Combiner Functions, Hadoop Streaming, HDFS, Hadoop file systems, Java Interface to Hadoop, YARN, Job Scheduling, Hadoop I/O, Data Integrity, Compression, Serialization, File based Data Structures, Developing a MapReduce Application,			
Unit – III	INTRODUCTION TO TOOLS	Periods	9
Installing and running pig, Basics of Pig, Introduction to Hive, Installing and running Hive, IntroductiontoHiveQL, Introduction to Zookeeper, Installing and running Zookeeper, The Zookeeper Service.			
Unit – IV	BIG DATA DATABASE TOOLS	Periods	9
Introducing Oozie, Apache Spark, Limitations of Hadoop and overcoming the limitations, Core components and architecture of Spark, Introduction to Apache Flink, Batch analytics using Flink, Big Data Mining withNoSQL, Why NoSQL?, NoSQL databases, Introduction to MongoDB			
Unit – V	ENTERPRISE DATA SCIENCE OVERVIEW	Periods	9
Data Science Solutions in the enterprise, Enterprise data science – Machine Learning and AI, Enterprise Infrastructure solutions, Visualizing Big Data, Using Python and R for visualization, Big Data VisualizationTools..			
Total Periods			45

Content of the syllabus			
Unit- I	CLOUD COMPUTING BASICS	Periods	9
Technologies for Network-Based System – System Models for Distributed and Cloud Computing – NIST Cloud Computing Reference Architecture. Cloud Models:-Characteristics – Cloud Services – Cloud models (IaaS, PaaS, SaaS)–Public vs Private Cloud–Cloud Solutions-Cloud ecosystem–Service management–Computing on demand.			
Unit - II	VIRTUALIZATION	Periods	9
Basics of Virtualization - Types of Virtualization - Implementation Levels of Virtualization - Virtualization Structures - Tools and Mechanisms - Virtualization of CPU, Memory, I/O Devices - Virtual Clusters and Resource management – Virtualization for Data-center Automation.			
Unit – III	CLOUD ARCHITECTURE	Periods	9
Architectural Design of Compute and Storage Clouds – Layered Cloud Architecture Development – Design Challenges - Inter Cloud Resource Management – Resource Provisioning and Platform Deployment – Global Exchange of Cloud Resources.			
Unit - IV	SECURITY IN CLOUD	Periods	9
Security Overview–Cloud Security Challenges and Risks–Software-as-a-Service Security–Security Governance– Risk Management–Security Monitoring–Security Architecture Design–Data Security–Application Security– Virtual Machine Security-Identity Management and Access Control–Autonomic Security.			
Unit – V	APPLICATIONS OF CLOUD	Periods	9
Scientific Applications – Healthcare –Biology – Geo science – Business and Consumer Applications - Cloud Computing Collaboration - Multimedia – Storage – Corporate – Communication.			
Total Periods			45

Content of the syllabus			
Unit– I	Introduction and Explore Phase	Periods	9
Introduction – Need for design thinking – Design and Business –The Design Process – Design Brief – Visualization – Four Questions, Ten Tools – Explore – STEEP Analysis – Strategic Priorities – Activity System – Stakeholder Mapping – Opportunity Framing			
Unit- II	Empathize Phase	Periods	9
Visualization –Journey Mapping –Value Chain Analysis –Mind Mapping–Empathize– Methods and tools -Observations–Deep user Interview- Need Finding–User Personas –Team building activity			
Unit–III	Experiment Phase	Periods	9
Brainstorming–reasons for brainstorming- Zen of brainstorming –Brainstorming Activity-Concept Development–Experiment–Ideation–different ways of ideation-Prototyping –Idea Refinement.			
Unit- IV	Engage Phase	Periods	9
Assumption Testing – Need for assumption testing- steps - Rapid Prototyping – forms of prototyping- Engage – Storyboarding.-purpose and case study			
Unit– V	Evolve Phase	Periods	9
Customer Co-Creation Learning Launch– Leading Growth and Innovation– Evolve–Concept Synthesis – Strategic Requirements – Evolved Activity Systems – Quick Wins.

Content of the syllabus			
Unit – I	UNDERSTANDING AGILE VALUES AND PRINCIPLES	Periods	9
Preface to Agile, Understanding Agile Values – No Silver Bullet – Agile to Rescue – A fractured perspective – Agile Manifesto – Understanding the Elephant – Starting with New Methodology, Agile Principles –The principles – Delivering the project – Communicating and working together – Project Execution – Constantly improving the project and the team – Agile Project			
Unit – II	SCRUM AND SELF-ORGANISING TEAMS	Periods	9
Understanding Scrum, Rules of Scrum , Scrum Team owns the project, Daily Scrum , Sprint, Planning and Retrospective –Iterative or Incremental – Makes or Breaks of Sprint by product owner – Visibility and Value - Plan and run effective Scrum Sprint.			
Unit – III	SCRUM PLANNING AND COLLECTIVE COMMITMENT	Periods	9
User Stories – Make software useful – Build features –Condition of satisfaction, Story point and velocity – Burn-down chart – Planning and Running a Sprint –Generally Accepted Scrum Practices, Scrum Value Revisited			
Unit – IV	XP, SIMPLICITY AND INCREMENTAL DESIGN	Periods	9
Primary Practices of XP, An effective Mindsets starts with XP, Understanding XP principles, Code an Design, Make Code and Design decisions at the last responsible moment , Incremental Design and the Holistic XP practices			
Unit – V	LEAN, KANBAN AND AGILE COACH	Periods	9
Lean thinking – Lean values – Commitment, Option thinking and Set based development, Creating Heroes and Magical thinking – Eliminate Waste –Gain a deeper understanding - Deliver as fast as possible, Principles of Kanban, Improving process with Kanban, Emergent behavior with Kanban, Overview of Agile coach- Principles of Coaching.

Content of the syllabus			
Unit – I	Introduction To Software Project Management	Periods	9
Project Definition – Contract Management – Activities covered By Software Project Management – Overview of Project Planning – Stepwise Project Planning.			
Unit – II	Project Evaluation and Estimation	Periods	9
Strategic Assessment – Technical Assessment – Cost Benefit Analysis –Cash Flow Forecasting – Cost Benefit Evaluation Techniques – Risk Evaluation. Basis for software estimating – Software effort estimation techniques – Estimating by analogy – Albercht function point analysis – A Procedural code-oriented approach - COCOMO: a parametric Model			
Unit – III	Activity Planning and Risk Management	Periods	9
Objectives – Project Schedule – Sequencing and Scheduling Activities –Network Planning Models – Forward Pass – Backward Pass – Activity Float – Shortening Project Duration – Activity on Arrow Networks. Nature Of Risk – Types Of Risk – Managing Risk – Hazard Identification – Hazard Analysis – Risk Planning And Control- Evaluatin Risk to the schedule.			
Unit – IV	Monitoring and Control	Periods	9
Creating Framework – Collecting The Data – Visualizing Progress – Cost Monitoring – Earned Value – Prioritizing Monitoring – Getting Project Back To Target. Change Control – Managing Contracts – Introduction – Types Of Contract – Stages In Contract Placement – Typical Terms Of A Contract – Contract Management – Acceptance.			
Unit – V	Managing People and Organizing Teams	Periods	9
Introduction – Understanding Behavior – Organizational Behavior: A Background – Selecting The Right Person For The Job – Instruction In The Best Methods – Motivation – The Oldham – Hackman Job Characteristics Model – Working In Groups – Becoming A Team –Decision Making – Leadership – Organizational Structures – Stress –Health And Safety – Case Studies.

Content of the syllabus			
Unit – I	Block Chain	Periods	9
Blockchain - Features and challenges - Decentralisation - Tamper-resistant – Transparency - Security - Smart contracts - blockchain implementation: Bitcoin – Wallets - Hashing - Mining – Consensus – Blockchain Ecosystem.			
Unit - II	Bitcoin	Periods	8
Introduction to Bitcoin - History – Uses - Sending and receiving bitcoins – Bitcoin Working - Bitcoin Transactions - Transaction Forms - Constructing a Transaction - Bitcoin Mining - Mining transactions in blocks - Spending the transaction			
Unit – III	Key, Address and Transaction	Periods	9
<b>Key, Address:</b> Public key cryptography and crypto-currency - Private and Public - Bitcoin Addresses - Implementing Keys and Addresses in Python/Java. <b>Transactions:</b> Introduction - Transaction Lifecycle – Structure – Outputs and Inputs – Chaining – Script Language – Standard Transaction.			
Unit - IV	Network	Periods	9
Peer-to-Peer Network Architecture - Nodes Types and Roles - Extended Bitcoin Network - Network Discovery - Full Nodes – Inventory - Simplified Payment Verification Nodes Bloom Filters and Inventory Updates - Transaction Pools - Alert Messages.			
Unit – V	Mining	Periods	10
<b>Mining:</b> Introduction - Bitcoin Economics and Currency Creation - Decentralized Consensus - Independent Verification of Transactions - Mining Nodes - Aggregating Transactions into Blocks - Constructing the Block Header - Mining the Block - Validating a New Block - Assembling and Selecting Chains of Blocks - Hashing Race - Consensus Attacks			
Total Periods			45

Content of the syllabus			
Unit – I	Introduction to Quality Management	Periods	9
Definitions – TQM framework, benefits, awareness and obstacles. Quality – vision, mission and policy statements. Customer Focus – customer perception of quality, Translating needs into requirements, customer retention. Dimensions of product and service quality			
Unit – II	Principles and Philosophies of Quality Management	Periods	9
Overview of the contributions of Deming, Juran Crosby, Masaaki Imai, Feigenbaum, Ishikawa, Taguchi techniques – introduction, loss function, parameter and tolerance design, signal to noise ratio. Concepts of Quality circle, Japanese 5S principles			
Unit – III	Statistical Process Control and Process Capability	Periods	9
Meaning and significance of statistical process control (SPC) – construction of control charts for variables and attributed. Process capability – meaning, significance and measurement – Six sigma concepts of process capability. Reliability concepts – definitions, reliability in series and parallel, product life characteristics curve. Total productive maintenance (TMP)			
Unit – IV	Tools and Techniques for Quality Management	Periods	9
Quality functions development (QFD) – Benefits, Voice of customer, information organization, House of quality (HOQ), building a HOQ, QFD process. Failure mode effect analysis (FMEA) – requirements of reliability, failure rate, FMEA stages, design, process and documentation. Seven old (statistical) tools. Seven new management tools.			
Unit – V	Quality Systems Organizing and Implementation	Periods	9
Introduction to IS/ISO 9004:2000 – quality management systems – guidelines for performance improvements. Quality Audits. TQM culture, Leadership – quality council, employee involvement, motivation, empowerment, recognition and reward, Business process re-engineering (BPR) – principles, applications, reengineering process, benefits and limitations.

Content of the syllabus			
Unit – I	INTRODUCTION	Periods	9
Introduction to enterprise applications - Software engineering methodologies - Life cycle of raising an enterprise application - Key determinants of successful enterprise applications - Measuring the success of enterprise applications. Inception of enterprise applications: Enterprise analysis- business modeling-requirements elicitation and analysis-requirements validation- planning and estimation.			
Unit - II	ARCHITECTURE AND DESIGNING	Periods	9
Architecture, view and viewpoints-Enterprise application architecture perspective - Logical architecture - Technical architecture and Design- - Data architecture - Infrastructure architecture and design-infrastructure architecture and building blocks –Networking, internetworking and Communication Protocol – IT hardware and software – Middleware – Policies for infrastructure management – Deployment Strategy - Documentation: system architecture documentation - design documentation			
Unit – III	CONSTRUCTING ENTERPRISE APPLICATION	Periods	9
Construction readiness - code review – objective – Process - static code analysis – Coding style – Logical bugs – Security vulnerabilities – Code quality -build and testing-build process – unit testing - Dynamic code analysis – Code profiling – Code coverage			
Unit - IV	TESTING AND ROLLING OUT ENTERPRISE APPLICATION	Periods	9
Testing enterprise applications – enterprise application environments - integration testing - system testing – Performance, Penetration, Usability, Globalization, Interface Testing - user acceptance testing - rolling out enterprise application			
Unit – V	APPLICATION IMPLEMENTATION	Periods	9
Infrastructure services Layer Framework components – Presentation Layer Framework components – Business Layer Framework components – Data Access Layer Framework components			
Total Periods			45

Content of the syllabus			
Unit – I	Introduction to Game Theory	Periods	09
Reasoning about Behavior in Game- Best responses and Dominant Strategies -Nash Equilibrium-Mixed Strategies-Pareto Optimality -Dominated strategies and dynamic games..			
Unit - II	Non-cooperative Games	Periods	09
Discrete static games- Continuous static games- Relation to other Mathematical Problems: Nonlinear optimization Fixed point-problems.			
Unit – III	Equilibria and Dynamic Games	Periods	09
Existence of Equilibria -Computation of Equilibria- Special matrix games- Uniqueness of Equilibria -Repeated and Dynamic games- Games under uncertainty			
Unit - IV	Cooperative Games	Periods	09
Solutions based on characteristic function -Conflict Resolution - Multi objective optimization- Social choice.			
Unit – V	Case studies	Periods	09
A salesman’s Dilemma- Oligopoly in water management -A forestry management problem- International fishing Water-distribution problem			
Total Periods			45
Text Book:			
1.	David Easley and jon Kleinberg, “Networks, Crowds and Markets: Reasoning about a highly Connected World”, Cambridge University, 2010 (UNIT - I)

	CO 2					2							2		
	CO 3			2										1	
	CO 4		2				2						2	1	
	CO 5												2		
<b>Course Assessment Methods</b>															
<b>Direct</b>															
1. Continuous Assessment Test I, II & III 2. Assignment 3. End-Semester examinations															
<b>Indirect</b>															
1. Course - end survey															

Content of the syllabus			
Unit – I	Introduction	Periods	9
Introduction to Mobile Telephony – Mobile device – communication standards : GSM, CDMA, UMTS, Introduction to 1G/2G/3G/4G – LTE – Mobile applications – categories – Factors in Developing Mobile Applications - Mobile application development – software architecture – application models – Framework and tools - HTML 5 - Java script - AJAX			
Unit – II	Android	Periods	9
Introduction to Android – Installation - Android Architecture - Application Fundamentals - SDK features – Development framework – Android Applications and Activities – creating user interfaces – layouts – views – resources – menu – graphics – animation – intents			
Unit – III	Android File management tool	Periods	9
Android File management tool – database storage – working with SQLite – GPS functionality – location based API – creating map based activities - geocoding – location-based services – handling audio and videoservices - networking : using Bluetooth – managing connectivity – telephony – SMS. Android implementation tools: xcode, Android studio, Appcode.			
Unit – IV	iOS programming	Periods	9
iOS programming – introduction to Objective C: class-objects-methods – interface – inheritance – Introduction to Foundation Framework Classes - File Handling - Property Lists, NSCopy, and Archiving - Selectors and Targets - Dynamic Typing and Dynamic Binding. Introduction to iPhone Architecture - Introduction to Development IDE - XCODE, Interface Builder - Creating and building simple applications -Handling Basic Interaction - Creating basic view controllers - Monitoring events and actions – Creating advanced view controllers			
Unit – V	Storyboarding Integration	Periods	9
Storyboarding Integration - Programmatic Interface creation - Integrating with core services – Email, Contacts - Data actions – preferences - files and addresses - Camera, Web Kit - database with iPhone app - Core Data Integration - Advanced controllers – Navigation controller - Integrating with Core Services – Core Audio - Video - Even Handling - Gesture Recognition - Maps and location - Protocols and Categories - Communication with the Services - Using the Accelerometer - Bluetooth Programming			
Total Periods			45

Content of the syllabus			
Unit – I	Introduction to Robotics	Periods	9
Types and components of a robot, Classification of robots, closed-loop and open-loop control systems. Kinematics systems; Definition of mechanisms and manipulators, Social issues and safety.			
Unit – II	Robot Kinematics and Dynamics	Periods	9
Kinematic Modelling: Translation and Rotation Representation, Coordinate transformation, DH parameters, Jacobian, Singularity, and Statics. Dynamic Modelling: Equations of motion: Euler-Lagrange formulation.			
Unit – III	Sensors and Vision System	Periods	9
Sensor: Contact and Proximity, Position, Velocity, Force, Tactile etc. Introduction to Cameras, Camera calibration, Geometry of Image formation, Euclidean/Similarity/Affine/Projective transformations. Vision applications in robotics.			
Unit – IV	Robot Control and Actuation Systems	Periods	9
Basics of control: Transfer functions, Control laws: P, PD, PID. Non-linear and advanced controls. Actuators: Electric, Hydraulic and Pneumatic; Transmission: Gears, Timing Belts and Bearings, Parameters for selection of actuators.			
Unit – V	Control Hardware and Interfacing	Periods	9
Embedded systems: Architecture and integration with sensors, actuators, components, Programming for Robot Applications.			
Total Periods			45

<b>Unit – I</b>	<b>Distributed System Models</b>	Periods	<b>9</b>
Scalable computing – Network Based Systems – System Models – Software Environment for Distributed and Cloud computing – Performance – Security – Energy Efficiency.			
<b>Unit - II</b>	<b>Virtualization</b>	Periods	<b>9</b>
Implementation levels of Virtualization – Virtualization Structures – Tools and Mechanisms – CPU, Memory, I/O devicesVirtualization – Virtual Clusters and Resource Management – Virtualization for Data-Center Automation.			
<b>Unit – III</b>	<b>Cloud Platform Architecture over Virtualized Data Centers</b>	Periods	<b>9</b>
Cloud computing Service models – Data-Center Design and Interconnection Networks – Architectural Design of Compute and Storage Clouds.Public Cloud Platforms : Google App Engine – AWS – Azure – Inter-cloud Resource Management – Cloud Security – Trust Management.			
<b>Unit - IV</b>	<b>Cloud Programming and Software Environments</b>	Periods	<b>9</b>
Cloud and Grid Platforms – Parallel and Distributed Programming Paradigms – Programming Support: Google App Engine – Amazon AWS – Microsoft Azure – Cloud Frameworks : Eucalyptus – Nimbus – OpenNebula – Sector – Sphere – OpenStack – Manjrasoft Aneka Cloud and Appliances.			
<b>Unit – V</b>	<b>Ubiquitous Clouds and the Internet of Things</b>	Periods	<b>9</b>
Cloud Trends in supporting Ubiquitous Computing Performance of Distributed Systems and the Cloud – Enabling technologies forthe Internet of Things – Innovative Applications of the Internet of Things – Online Social and Professional Networking			
<b>Total Periods</b>			<b>45</b>

Content of the syllabus			
Unit – I	INTRODUCTION TO DATA STRUCTURES	Periods	9
Time and space complexity, Data Structures – Introduction to Data Structures, abstract data types, Linear list – singly linked list implementation, insertion, deletion and searching operations on linearlist, circular linked list implementation, Double linked list implementation, insertion, deletion and searching operations. Applications of linked lists			
Unit – II	LINEAR DATA STRUCTURES - STACK	Periods	9
Stacks-Operations, array and linked representations of stacks, stack applications -infix to postfix conversion, postfix expression evaluation, recursion implementation.			
Unit – III	LINEAR DATA STRUCTURES - QUEUE	Periods	9
Queues-operations, array and linked representations. Circular Queue operations, Dequeues, Applications of queues.			
Unit - IV	SEARCHING AND SORTING	Periods	9
Searching and Sorting – Sorting- selection sort, bubble sort, insertion sort, quick sort, merge sort, shell sort, radix sort, Searching-linear and binary search methods, comparison of sorting and searching methods			
Unit – V	NON LINEAR DATA STRUCTURE TREES	Periods	9
Trees – Definitions, tree representation, properties of trees, Binary tree, Binary tree representation, binary tree properties, binary tree traversals, binary tree implementation, applications of trees.			
Total Periods			45

Content of the syllabus			
Unit – I	INTRODUCTION	Periods	9
<b>Introduction:</b> Definition and Origins of the Word - Classifications of Cybercrimes- Installing and Configuring Kali Linux - Pre-penetration Testing Checklist, Information Gathering - External Pen-testing, Website Penetration Testing - Internal Network Penetration Testing and Wi-Fi Penetration Testing - Network Sniffing ,Exploitation - Social Engineering.			
Unit - II	CYBERCRIME: MOBILE AND WIRELESS DEVICES	Periods	9
<b>Trends in Mobility:</b> Credit Card Frauds in Mobile and Wireless Computing Era- Authentication Service Security- Attacks on Mobile/Cell Phone. <b>Mobile Devices:</b> Security Implications for Organizations - Organizational Measures for Handling Mobile Devices - Laptops: Physical Security Countermeasures.			
Unit – III	TOOLS AND METHODS USED IN CYBERCRIME	Periods	9
<b>Introduction:</b> Password Cracking: Online Attacks, Offline Attacks - Strong, Weak and Random Passwords. <b>Keyloggers and Spywares:</b> Software Keyloggers - Hardware Keyloggers – Antikeylogger - Spywares. <b>Virus and Worms:</b> Trojan Horses and Backdoors - Buffer Overflow - Attacks on Wireless Networks.			
Unit - IV	PHISHING AND ORGANIZATIONAL IMPLICATIONS	Periods	9
<b>Phishing and Identity Theft:</b> Phishing - Spear Phishing - Types of Phishing Scams - Phishing Toolkits and Spy Phishing - Phishing Countermeasures. <b>Social Media Marketing:</b> Security Risks andPerils for Organizations, Social Computing and the Protecting People's Privacy in the Organization.			
Unit – V	CYBER TERRORISM	Periods	9
<b>Introduction:</b> Intellectual Property in the Cyberspace - Copyright, Patent, Trademarks - Trade Secret - Trade Name - Domain Name. <b>Ethical Hackers:</b> The Psychology - Mindset and Skills of Hackers and Other Cybercriminals - Sociology of Cybercriminals - Information Warfare.

Content of the syllabus			
Unit - I	WEB ESSENTIALS	Periods	9
Creating a Website - Working principle of a Website - Browser fundamentals - Authoring tools - Types of servers: Application Server - Web Server - Database Server – HTML basics – HTML tags and their use			
Unit - II	SCRIPTING ESSENTIALS	Periods	9
Need for Scripting languages - Types of scripting languages - Client side scripting - Server side scripting - Introduction to JavaScript - Arrays - Strings - Functions - PHP - Working principle of PHP - PHP Variables - Constants - Operators			
Unit – III	DATABASE ESSENTIALS	Periods	9
Database management - Database terms - MySQL - commands – Data types – Indexes – Functions – Accessing MySQL using PHP.			
Unit - IV	NETWORKING ESSENTIALS	Periods	9
Fundamental computer network concepts - Types of computer networks - Network layers - TCP/IP model - Wireless Local Area Network - Ethernet - WiFi - Network Routing - Switching - Network components			
Unit – V	APPLICATION ESSENTIALS	Periods	9
Creation of simple interactive applications - Simple database applications – Multimedia applications - Design and development of information systems – Personal Information System – Information retrieval system – Social networking applications

## Content of the syllabus

<b>Unit –I</b>	<b>Business View of IT Applications</b>	Periods	<b>9</b>
Introduction to Business View of Information -Core Business Processes – Baldrige Business Excellence Framework – Purpose of using IT in Business – Characteristics of Internet-ready IT Applications – Enterprise Applications – Information users and their requirements.- Types of Digital Data: Introduction – Structured Data – Unstructured Data – Semi-Structured Data – Difference between semi-structured and structured data.			
<b>Unit - II</b>	<b>Business Intelligence and Data Interaction</b>	Periods	<b>9</b>
Business Intelligence: Definition – Evolution – Need for BI – BI Value Chain – Business Analytics – BI Framework – BI Users – BI Applications – BI Roles and Responsibilities – Data Integration : Need for Data Warehouse – Definition of Data Warehouse – Data mart – Ralph Kimball,,s Approach vs. W.H.Inmon,,s Approach – Goals of Data Warehouse – ETL Process – Data Integration Technologies – Data Quality – Data Profiling.			
<b>Unit –III</b>	<b>OLTP, OLAP and Multidimensional Data Modeling</b>	Periods	<b>9</b>
OLTP – OLAP – OLAP Architectures – Data Models – Role of OLAP Tools in BI – OLAP Operations – Basics of Data Modeling – Types of Data Model – Data Modeling Techniques – Fact Table – Dimension Table – Dimensional Models – Dimensional Modeling Life Cycle – Designing the Dimensional Model.			
<b>Unit - IV</b>	<b>Performance Management and Enterprise Reporting</b>	Periods	<b>9</b>
Measures, Metrics, KPIs and Performance Management: Understanding Measures and Performance – Measurement System – Role of metrics – KPIs – Enterprise Reporting: Reporting Perspectives – Report Standardization and Presentation Practices – Enterprise Reporting Characteristics – Balanced Scorecard – Dashboards – Creating Dashboards – Scorecards vs. Dashboards – Analysis.			
<b>Unit –V</b>	<b>BI Applications</b>	Periods	<b>9</b>
Understanding Business Intelligence and Mobility– the need for business intelligence on the move – BI Mobility time line – Data Security Concerns for Mobile BI – Business Intelligence and Cloud Computing – Business Intelligence for ERP systems – Social CRM and Business Intelligence

Content of the syllabus			
Unit– I	FUNDAMENTALS OF IoT	Periods	9
Introduction- Evolution of IoT-Networking Components-Addressing Strategies in IoT-Sensing and Actuation: IoT Sensing and Actuation-Sensors-Sensor Characteristics-Types -Scalar sensing- Virtual sensing- IoT Connectivity Technologies: Bluetooth-wifi.			
Unit-II	NETWORKING AND IoT PROTOCOLS	Periods	9
Network types-Connection Type-Network reachability-Physical topology-Security-Symmetric key cryptography-asymmetric key cryptography-M2M communication-Architecture components of M2M-Communicatio technologies:Infrastructure protocols-Multicast DNS-Data protocol-COAP-MQTT.			
Unit – III	IoT TECHNOLOGIES	Periods	9
Cloud computing-Virtualization- Advantages of virtualization-Types of virtualization-Cloud Models-Service- Fog computing applications: Fog nodes-Fog deployment model -Fog Computing Architecture-Fog Computing in IoT.			
Unit–IV	PARADIGMS, CHALLENGES, AND THE FUTURE	Periods	9
Evolution of New IoT- Paradigms Internet of battle eld things (IoBT)-Internet of vehicles (IoV)-Internet of drones (IoD) -Internet of space (IoSpace)-Internet of services (IoS) -Internet of people (IoP).			
Unit– V	CASE STUDIES/ INDUSTRIAL APPLICATIONS	Periods	9
Agricultural IoT-Smart irrigation management-Vehicular IoT-Crime assistance in a smart IoT transportation system Healthcare IoT.

<b>U19ITOE9</b>	<b>INTRODUCTION TO JAVA PROGRAMMING</b>					<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>		<b>40</b>	<b>60</b>	<b>100</b>																																																																																																																						
<b>Course Objective</b>	The main objective of this course is to: <ul style="list-style-type: none"><li>• Impart the fundamental concepts of core JAVA.</li><li>• Enable the students to gain programming skills in JAVA.</li><li>• Be able to use the Java SDK environment to create, run and execute the simple java programs.</li></ul>																																																																																																																																		
<b>Course Outcome</b>	At the end of the course, the students should be able to,																																																																																																																																		
	<b>CO1:</b> Understand the syntax, semantics and classes in Java language.										K2																																																																																																																								
	<b>CO2:</b> Discuss the programs using OOPS concepts.										K2																																																																																																																								
	<b>CO3:</b> Use the concept of Input and Output in Java										K3																																																																																																																								
	<b>CO4:</b> Create the programs using strings.										K3																																																																																																																								
<b>Pre-requisites</b>	<b>CO5:</b> Develop Applet, AWT and Event handlers in Java										K3																																																																																																																								
	<b>Pre-requisites</b>										Object Oriented Programming

Content of the syllabus			
Unit -I	Basics of Java	Periods	9
The Genesis of Java - Overview of Java - Data Types, Variables, and Arrays - Operators - Control Statements - Introducing Classes - Methods and Classes. Inheritance: Basics - Using Super – Creating a Multilevel Hierarchy - Method overriding – Using Abstract Classes			
Unit - II	Errors and Exception Handling	Periods	9
Packages and Interfaces: Packages - Access Protection - Importing Packages- Interfaces Definitions and Implementations - Compile time errors –Run time errors – Exception Handling: Types - Try and Catch - Throw - Finally – User defined exceptions			
Unit – III	Streams and Threads	Periods	9
File - The Byte Streams - The Character Streams - Using Stream I/ O - Serialization. Java threads – Priorities – Synchronization – Thread class and Runnable interfaces – Creating threads – Multiple threads – Inter thread communication			
Unit - IV	String Handling	Periods	9
String Handling: Special String operations and Methods - String Buffer - Exploring java.lang: Simple type Wrappers - System - Math - Collections Framework: Collections Interfaces and Classes - Utility Classes: String Tokenizer - Date and Time			
Unit – V	Introducing GUI Programming with JavaFX	Periods	9
Introducing Java FX GUI Programming:Java FX Basic ConceptsA Java FX Application Skeleton-Compiling and Running a JavaFX Program-The Application Thread-A simple JavaFX Control:Label-Using buttons and Events-Exploaring JavaFX Controls:Using image and imageview-Toggle button-Radio button-Checkbox-list view-Combo Box-Text Field.

Content of the syllabus			
Unit- I	Introducing to R	Periods	9
Introducing to R – R Data Structures – Help functions in R – Vectors – Scalars – Declarations – recycling – Common Vector operations – Using all and any – Vectorized operations – NA and NULL values – Filtering –Vectorised if-then else – Vector Equality – Vector Element names			
Unit – II	Matrices, Arrays And Lists	Periods	9
Matrices, Arrays And Lists Creating matrices – Matrix operations – Applying Functions to Matrix Rows and Columns – Adding and deleting rows and columns – Vector/Matrix Distinction – Avoiding Dimension Reduction – Higher Dimensional arrays – lists – Creating lists – General list operations – Accessing list components and values – applying functions to lists – recursive lists.			
Unit – III	Data Frames	Periods	9
Creating Data Frames – Matrix-like operations in frames – Merging Data Frames – Applying functions to Data frames – Factors and Tables – factors and levels – Common functions used with factors – Working with tables - Other factors and table related functions			
Unit – IV	Control statements, Functions, R graphs	Periods	9
Control statements – Arithmetic and Boolean operators and values – Default values for arguments - Returning Boolean values – functions are objects – Environment and Scope issues –Writing Upstairs - Recursion – Replacement functions – Tools for composing function code – Math and Simulations in R Creating Graphs – Customizing Graphs – Saving graphs to files – Creating three-dimensional plots			
Unit – V	Interfacing	Periods	9
Interfacing R to other languages – Parallel R – Basic Statistics – Linear Model – Generalized Linear models – Non-linear models – Time Series and Auto-correlation – Clustering			
Total Periods			45

Content of the syllabus			
Unit – I	Introduction to Hacking	Periods	9
Important Terminologies – Penetration Test – Vulnerability Assessments versus Penetration Test – Pre-Engagement – Rules of Engagement – Penetration Testing Methodologies – OSSTMM – NIST – OWASP – Categories of Penetration Test – Types of Penetration Tests – Vulnerability Assessment Summary – Reports.			
Unit - II	Information Gathering and Target Enumeration	Periods	10
Active , Passive and Sources of information gathering - Copying Websites Locally –Traceroute - NeoTrace - Cheops-ng - Intercepting a Response –WhatWeb –Netcraft - Basic Parameters -Xcode Exploit Scanner - Interacting with DNS Servers –Nslookup – DIG - Fierce, Zone Transfer with Host Command and Automation - DNS Cache Snooping-Attack Scenario - Automating Attacks - SNMP –Problem - Sniffing Passwords - SolarWinds Toolset -Sweep, Brute Force and Dictionary – Tools - Attack – Enumeration - Intelligence Gathering Using Shodan.			
Unit – III	Vulnerability Assessment & Network Sniffing	Periods	9
Introduction to Vulnerability Assessment - Pros and Cons –Nmap -Updation of database - Testing SCADA Environments with Nmap – Nessus. Sniffing: Types - Hubs versus Switches - Promiscuous versus Nonpromiscuous Mode - MITM Attacks - ARP Protocol Basics – working – Attacks -DoS Attacks –Dsnifftool - Using ARP Spoof to Perform MITM Attacks - Sniffing the Traffic with Dsniff - Sniffing Pictures with Drifnet - Urlnarf and Webspy - Sniffing with Wireshark.			
Unit - IV	Basics of Exploitation	Periods	9
Introduction to Remote Exploitation -Understanding Network Protocols – Server Protocols - Attacking Network Remote Services - Common Target Protocols -Tools for cracking network remote services - Attacking SMTP - Attacking SQL Servers - Client Side Exploitation Methods: E-Mails Leading to Malicious Attachments & Malicious Links - Compromising Client Side Update - Malware Loaded on USB Sticks .			
Unit – V	Wireless Hacking	Periods	8
Wireless Hacking – Introducing Aircrack– Cracking the WEP – Cracking a WPA/WPA2 Wireless Network Using Aircrack-ng – Evil Twin Attack – Causing Denial of Service on the Original AP			
Total Periods			45

Content of the syllabus			
Unit – I	Computer Investigations	Periods	9
Computer Investigations: Preparing a Computer investigation – Taking asystematic approach – Assessing the case – Planning Investigation – Securing evidence. Procedures for Corporate High: Tech investigations – Conducting an Investigation – Completing the case.			
Unit – II	Data Acquisition	Periods	9
Understanding storage formats for digital evidence – Determining the best acquisition method - Contingency planning for image acquisitions – Using Acquisition tools: Windows XP Write- protection with USB Devices – Validating Data Acquisitions: Windows Validation Methods – Performing RAID Data Acquisitions – Using Remote Network Acquisition tools – Using other Forensics Acquisition tools.			
Unit – III	Processing Crime and Incident Scenes	Periods	9
Identifying Digital Evidence – Collecting Evidence in Private Sector Incident Scenes – Processing Law Enforcement Crime Scenes – Preparing for a Search –Securing a Computer Incident or Crime Scene – Seizing Digital Evidence at the Scene –Storing Digital Evidence –Obtaining a Digital Hash – Reviewing a Case.			
Unit – IV	Computer Forensic Tools, Analysis and Validation	Periods	9
Evaluating Computer Forensics Tool Needs -Computer Forensics Software Tools – Computer Forensics Hardware Tools –Validating and Testing Forensic Software - Computer Forensics Analysis and Validation: Determining Data Collection and Analysis –Validating Forensic Data –Addressing Data-Hiding Techniques –Performing Remote Acquisitions.			
Unit – V	Recovering Graph Files, Email Investigations	Periods	9
Recognizing Graph File- Understanding Data Compression- Locating And Recovering Graphic Files- Identifying Un known File Formats- Understanding Copyright Issues- Investigating Email Crimes And Violations- Understanding Email Servers- Using Specialized Email Forensic Tools.			
Total Periods			45
CASE STUDY: Only for Assignment not for end sem examination. 1. Illegal money transfer 2. Network data reveals theft of trade secrets 3. Data from vehicle infotainment, telematics and black box systems 4. Intellectual property theft

Programme	B.TECH	Programme Code					104	Regulation			2019																																																																																																																																									
Department	INFORMATION TECHNOLOGY					Semester			OPEN ELECTIVE																																																																																																																																											
Course Code	Course Name	Periods Per Week			Credit	Maximum Marks																																																																																																																																														
		L	T	P	C	CA	ESE	Tot																																																																																																																																												
U19ITOE13	E LEARNING TECHNIQUES	3	0	0	3	40	60	100																																																																																																																																												
Course Objective	The student should be made to, <ul style="list-style-type: none"><li>Analyze and compare different on-line E-Learning tools- design course content for a specific subject from different perspective- plan and design the instruction</li><li>Support needs of learners of various backgrounds- levels and situations based on different learning methodologies</li></ul>																																																																																																																																																			
Course Outcome	At the end of the course- the student should be able to,																																																																																																																																																			
	CO1:Understand the broad perspective of e-learning techniques.							K2																																																																																																																																												
	CO2:Analyze the tools and mechanisms for implementing virtualization.							K3																																																																																																																																												
	CO3:Illustrate the cloud storage architecture along with resource management.							K2																																																																																																																																												
	CO4:Choose the appropriate programming models and apply.							K3																																																																																																																																												
	CO5:Understand the collaborative e learning techniques.							K2																																																																																																																																												
Pre-requisites	Nil

Content of the syllabus			
Unit – I	INTRODUCTION	Periods	9
E-Learning – E-Learning cycle – E-Learning types – challenges and opportunities – cognitive presence – Approaches to design E-Learning – E-Learning framework – 6C framework –E-Learning Tools			
Unit - II	E-LEARNING STRATEGY	Periods	9
Role of tutor – E-Learning strategy – Blended E-Learning – M-Learning- problem based learning– Enterprise learning – Corporate Learning – Web based Learning – Pod casting – Learning Management systems – Content development process – E-Learning standards SCORM standard – managing e-learning quality – case studies			
Unit – III	PRINCIPLES OF E-LEARNING	Periods	9
Philosophy of E-Learning – theory of learning – Applying principles of multimedia – Applying principles of contiguity – Applying principles of modality – Applying principles of redundancy – Applying principles of coherency – Applying principles of personalization – web-based learning communities – knowledge sharing and Knowledge management in e-learning – social networks and social media in e-learning			
Unit - IV	DESIGN	Periods	9
On line E-Learning technologies – visual communication techniques – Computer-based technologies – Computer-mediated communication (CMC) – Assessment and evaluation Organizing and designing learning sequences- Characteristics of Interactive Online Learning Media			
Unit – V	E LEARNING PLATFORMS	Periods	9
Leverages example in E-Learning – collaborative E-Learning – Learner control in E-Learning guidelines to solve issues in E-Learning – Implementation of an E-Learning Course Content for a complete online course- Research in content retrieval and generation for E-Learning- Role of cloud and semantic Grid in E-Learning			
Total Periods			45
Text Book			
1	D.Randy Garrison “E-Learning in the 21st century a framework for research and practice”- 2nd edition- Taylor and Francis- 2016.
