

(OR)

b)	Explain the NSTISSC Security Model and the importance of securing the components of Information System in details.	13	K2	CO1
12. a)	Illustrate the importance security investigation and highlight its need of business organization.	13	K2	CO2
(OR)				
b)	Outline the Legal, Ethical and Professional issues in Information Security.	13	K2	CO2
13. a)	Organize the different stages of Risk identification with examples.	13	K3	CO3
(OR)				
b)	Give an example of real life scenario of Risk Assessment and explain the different steps for Risk Assessment in detail.	13	K3	CO3
14. a)	Why NIST Models are important in Information Security and what are the importance of ISO 17799/BS 7799 Standard from your point of view?	13	K2	CO4
(OR)				
b) i.	Analyze the importance of different Security Policies in details from your point of view.	7	K3	CO3
ii.	Why Security Standards and Practices are essential to design a Security Architecture?	6	K2	CO4
15. a)	Explain the importance of IDS in Information Security and its different types.	13	K3	CO5
(OR)				
b)	Explain the need of access control devices and different Scanning and Analysis tools in Information Security.	13	K3	CO5

PART – C

(1 x 15 = 15Marks)

Q.No.	Questions	Marks	KL	CO
16. a)	Give a detail blueprint for Information Security with its different NIST models.	15	K2	CO4
(OR)				
b)	With an example of real life scenario demonstrate the need of cryptography in a software-based industries.	15	K3	CO5
